Impactful Displays that Deliver

Say goodbye to dull, inconsistent displays

Professionally Crafted for High-Impact Messaging

The Sharp MultiSync[®] PN-P Series is your trusted choice for bold, ultra-reliable digital signage—built to perform in environments with higher ambient lighting and extended runtime needs such as healthcare, command centers, finance, retail, and corporate settings. Featuring factory-calibrated color precision, flexible performance options, and a tough all-metal chassis, these displays deliver stunning visuals and commercial-grade durability straight out of the box.

Key Pain Points—Solved

Tired of inconsistent colors across displays? SpectraView[™] Engine gives you pixel-perfect factory calibration and pro-level customization.

Looking for more accurate color reproduction? These displays have wide color gamut panels, allowing you access to a broader range compared to standard displays. This will give you more accurate color reproduction for retail, corporate or education branding.

Dealing with outdated or clunky setups? Enjoy seamless modular upgrades with Intel[®] SDM and Raspberry Pi Compute Module 4 support.

Struggling with overheating or display dimming? Smart cooling tech keeps your visuals bright and your system protected.

Need 24/7 uptime in tough environments? Full metal build, active cooling, and secure LAN controls ensure long-term reliability.

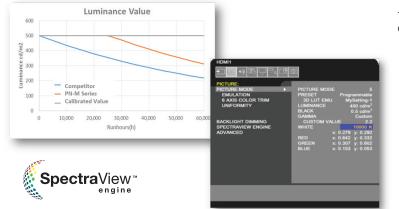

High-End UHD Visuals, All Day, Every Day

Get next-level clarity with native 3840 x 2160 resolution and anti-glare, highhaze glass across the entire PN-P Series lineup. Imagery and messaging can become more vivid and lifelike than ever before! Additionally, these models boast an impressive 700 cd/m² in brightness, ensuring that your message cuts through—even in high-ambient light spaces.

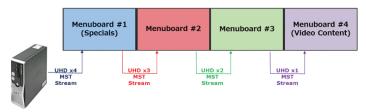

Consistent Color with SpectraView[™] Engine

Pre-calibrated for luminance, white point, gamma, and uniformity, every PN-P display features SpectraView Engine Technology and is ready to go, right out of the box. Want deeper control? Through the SpectraView Engine, dial in white point with adjustments of 100k, select brightness based on luminance level, or even input your own CIE color coordinates, giving users capabilities like never before. Bonus: backlight stabilization keeps your visuals looking fresh longer - no early fade-outs here. All of these features are specifically engineered to give you the best visual quality for an extended duration.

Smarter Daisy Chaining & Multi-Display Sync

Connect up to 4 independent displays from one source thanks to DisplayPort 1.4 connectivity and HBR3 capabilities with Multi-Stream Transport (MST*). MST capabilities can drive up to 4 independent displays from a single DisplayPort source by multiplexing several video streams into a single stream and sending it to the display that then acts as a branch device to demultiplex the signals into the original streams -ideal for menu boards, video walls, and synchronized signage. Additionally, the display can daisy chain the LAN connection, which allows for the pass-through of RS-232C, TCP/IP and IR communications. This gives the customer the ability to control full arrays of displays remotely or via the IR remote control, streamlining the ease of use to the customer.

*MST capabilities depends on the video card driving the system.

Power, Connect, Control—Simplified

Each PN-P product features an integrated USB hub, with a USB-C input that supports both DP-Alt mode and upstream data transfer. It includes two downstream USB ports (one USB-A and one USB-C) for connecting and managing peripherals. This built-in hub reduces the need for additional equipment, lowering overall setup costs. Additionally, the USB-C input provides 65W of Power Delivery, enabling devices like laptops to charge directly from the display-ideal for huddle spaces and presentation environments.

Commercial Toughness You Can Trust

A full-metal chassis, carrying handles, and active cooling system mean it's ready for harsh environments without compromising the sleek design. Integrated temperature sensors keep your brightness consistent without thermal dimming - your content stays front and center, even in the harsher conditions found in commercial environments.

Built for Flexibility

The MultiSync PN-P Series is **modular by design**, ready to integrate Intel® Smart Display Modules (SDM-L/SDM-S) and Raspberry Pi Compute Module 4 for embedded intelligence without external gear or messy cabling. Through clever mechanical and electrical design, the PN-P Series allows for sleek all-inone intelligence and interoperability in a small form factor setting, giving you everything you need for digital signage applications while also offering the ability to enhance your screen through multiple integrated professional technologies all while simplifying installations and allowing for clean and easy set-up.

Smart Input Prioritization

Auto-switch between up to three prioritized inputs or power on with a live signal - no more blank screens or manual resets. If a primary source goes down, the display will automatically switch to whatever the customer has prioritized next. The first detect option also allows for the display to automatically switch to any source that plugs into it, allowing the display to wake on any synced signal.

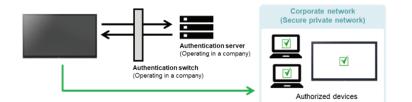

Typical Display

Built-in Security for IT Peace of Mind

With **IEEE802.1x authentication via the LAN connection**, SSL/TLS browser control, LAN and USB port disabling, and MAC/IP filtering, the MultiSync PN-P Series helps keep your network secure and locked down.

Total Control with NaViSet Administrator™

Remotely manage all your PN-P Series - and other Sharp or NEC displays - from a single, centralized dashboard using **NaViSet Administrator 2[™]**. Perfect for multi-display setups, this free tool lets you monitor status, automate tasks, generate reports, and make on-demand changes from anywhere. Want even more power? Upgrade to the **Server Edition** for enhanced features and full remote access across your ecosystem.

PN-P Series

If the source fails, the display automatically switches to the next prioritized source, allowing for zero down time on the display

First Detect

Bottom Line:

The Sharp MultiSync PN-P Series brings next-gen display power, all-day reliability, and built-in flexibility—wrapped in a clean, modern design that makes your content pop. Whether you're running a control room or creating an unforgettable retail experience, the PN-P Series is here to boost your signage game and keep it fresh 24/7.

		External Control	LAN (100Mbit, carries RS-232C and IR)						
		On (Typ/Max Brightness/ All Max)	115W/180W/365W						
		Network Standby	0.5W						
POWER CONSU	MPTION	Normal Standby	2W						
		Current Rating	4.1A - 1.7A @ 100V - 240V						
		Speaker Rating	Optional through SP-RM3a						
		Bezel Width (L/R, T/B)	11.0mm/11.0mm, 11.0mm/13.9mm						
PHYSICAL SPEC	IFICATIONS	Net Dimensions (Without stand; W x H x D)	48.7 x 27.9 x 2.3 in. 1235.6 x 709.3 x 59.5mm						
		Net Weight	20.5kg/45.2lbs.						
		VESA Hole Configuration	4 × M6 (300 × 300)						
Ambient Light Sensor			Integrated						
SENSORS		Human Sensor	Optional through PN-KTRC3						
		Temperature Sensor	Integrated and programmable; linked to cooling fans						
		NFC Sensor	N/A						
ENVIRONMENT	٨١	Operating Temperature	0 to 40C						
CONDITIONS	AL.	Operating Humidity	20-80%						
		Operating Altitude	3000m (9843ft)						
LIMITED WARRA			5 years Advanced Replacement AMX Support, Automated Email Alert Function, CEC Suppor through HDMI, Crestron Connected V2 Support with XiO Cloud, IEEB02.1 x Wired Network Authentication, SSH, Naviset Secure, Signed FW upon Install, Admin Login, IP Address Filtering, MAC Address Filtering, SNMP V1/2/3, USB/LAN Lockout Capability, PD Comms Tool Support, NEC Firmware Update Tool, Display Browser Control, Display Wa Calibrator Compatible, HDR Support (PQ, HLC, HDR10), Key Guide, NaViset Administrator 2 Compatible, oSD Rotation for Portrait Orientation, SDM Compatible, PJ Link Support, USB Power Delivery via USB-C (65W), Raspberry PI Comput Module Compatible, Real Time Clock, Local Dimming,						
SHIPS WITH	AKERS		Multi Picture Mode, SpectraView Engine Technology, Quick Input Change, Quick Start, Internet Time Server, Auto ID/IP Settings, Energy Star 8.0 3m AC Power Cord, 2.0m HDMI Cable, IR Remote Control, Batteries, AAA batteries SP-RM3a						
			PN-ST431, ST-43M						
OPTIONAL STAN			All SDM Option Cards, Raspberry Pi Compute Module 4 with						
OTHER ACCESS	DRIES		optional NEC Interface Board, Human Sensor (PN-KTRC3)
