Sharp Expands dvLED Line With New E Series

MEETING ROOM W207A Sharp NEC Display Solutions is introducing its E Series to its dvLED portfolio. The E Series offers a wide array of available pixel pitches, from 1.2 mm to 1.8 mm, and is ideal for indoor installations in corporate, education and House of Worship environments for customers looking to upgrade current digital signage.

The E Series offers bright dvLED panels, ranging from 600 cd/m² to 800 cd/m² with a tight pixel pitch from as low as 1.2 mm for indoor use. The E Series is the ideal entry into dvLED for those looking to replace aging projection or tiled LCD video walls. Similar to the FA/FE series, the E series is offered in a variety of popular sizes as kits, with everything you need to deploy an LED wall.
