**Notes and limitations using the PN-ZCMS1 with web conferencing services/applications**

| Item | Overview |
|---|---|
| "Call" and "End call" buttons on remote control | The "Call" and "End call" buttons on the remote control included with the PN-ZCMS1 may not be usable depending on the application.<br>*We have confirmed that the buttons can be used when using the corporate account of Teams for Windows. |
| Function to reduce or eliminate ambient noise in web conferencing services/applications | The function to reduce or eliminate ambient noise in the settings of the web conferencing service/application should be switched off.<br>The PN-ZCMS1 has a noise reduction function that is constantly running, so duplication of the same type of function may cause other disturbances. |
| Resolution of the camera image displayed by the web conferencing service/application | Due to the specifications and limitations of the web conferencing service/application, the camera image may not support 4K display.<br>In addition, the resolution of the transmitted camera images may be low due to network conditions. |
| Noise reduction function and installation environment | The noise reduction function of the PN-ZCMS1 does not reduce or eliminate all environmental noise. Depending on your installation environment, please take ambient noise into consideration, for example by installing partitions, etc. |
