GREAT IDEA! WE MAKE IT HAPPEN

Want to create visual art? Want to show everyone that you believe in what you do?
With our stunning LED solutions it is no problem at all.

Over the past 15 years, Sharp NEC's line of S[quadrat] LEDs have been installed in numerous large scale projects around the globe. We distinguish ourselves by service, knowledge, quality and reliability of our display solutions.

Bring your ideas to life with us, we are there for you from the first planning step.

6 POINTS OF SERVICE

1

CONSULTING

We are happy to evaluate your existing or new display solution ideas to advise you on how to best maximize the impact of your digital display platform. We can also bring the full breadth of the Sharp NEC portfolio to the discussion for more than just LED solutions.

2

DESIGN

Our engineers can create a detailed plan, design and even build the ideal LED display solution for your project, making sure the it's completed on time and within budget.

3

PRODUCTION

We manufacture standard and customized product solutions; this applies to the LED modules as well as the associated substructures and mounting. We produce all the components ourselves or with tightly controlled specifications with 3rd parties in order to provide timely and quality fit and finish.

Did we pique
your interest?
Please send us an email
or give us a call.
The team is
looking forward to
working with you.

4

CONSTRUCTION

Our on-site engineers are an important factor to ensure your project's success. Their knowledge and flexibility can help your project be successful from concept to final commissioning.

5

TRAINING

Our trainers are real experts. They pass on their knowledge relating to your display system to those who will be supporting the system after installation. In turn they become experts.

6

AFTER-SALES SERVICE

After the project, you can rely on us just as much as during the project. All of our products carry standard warranty backed up by our North American service team and our additional warranty service options offer additional peace of mind.

CENTER HUNG CUBES

Center Hung Cubes

Center hung cubes are the central focal point for important and entertaining information. In a stadium or hall, the center hung cube sits enthroned directly above the field and allows the spectators to see replays, slow-motion sequences, current scores, etc., without taking their eyes off the action. A quick look up allows viewers to stay up to date, while the playing field remains in their peripheral vision.

ARENA DISPLAYS & SCOREBOARDS

Arena Displays & Scoreboards

They are the source of information, per se, for the spectator – whether it's the team line-up, the current score, or the remaining playing time. Scoreboards provide the spectator with a wealth of information covering all aspects of the game. Missed what the announcer said under the fans' chants? No problem, it's right there on the scoreboard – clearly legible and displayed in color.

FASCIAS & BANNERS

Fascias & Banners

The news ticker below the center hung cube keeps the crowd up to date. On a fascia, information can be displayed as if on a moving band for everyone in the stadium or hall to see. The motion effect really catches spectators' attention. And, of course, these devices also work excellently with pictures and animations. Create excitement through the use of banners to get the crowd involved.

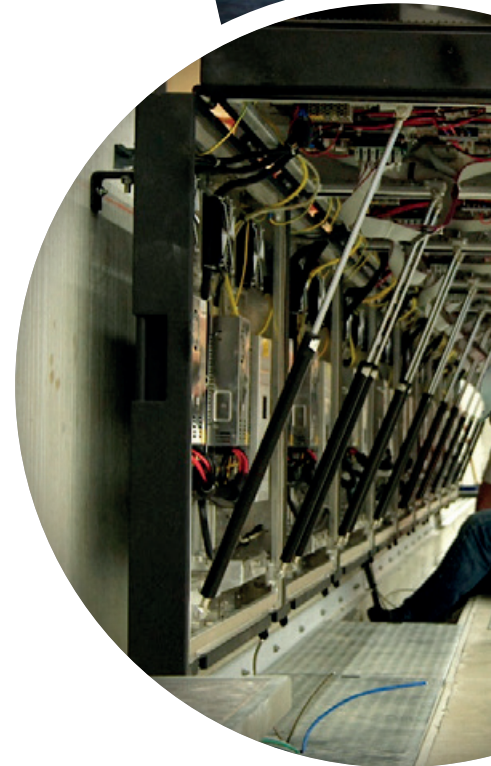

PERIMETERS

Perimeters

These provide variation within the perimeter advertising. They therefore increase not only the attention of the viewers, but also the advertising revenues. Because the clips are being displayed alternately, the space can be used for many different advertisements. This means there's also no need to change the perimeter sections before each use. Furthermore, a perimeter opens up completely new dimensions for advertising, namely the possibility of using animation and video to inspire spectators.
