

WHEN THERE'S NO TIME FOR DOWNTIME, NEC'S FA SERIES HAS THE DISPLAY YOU NEED.

You don't have to sacrifice quality for continuity; NEC's FA series delivers all the brightness, clarity, contrast and color you need, with the high performance your business demands.

Whether you're running an air traffic control room or a corporate lobby where 24/7 display is critical, you can't afford downtime. NEC's FA Series of dvLED displays is designed specifically to give you that high performance you're looking for, in an indoor setting.

FA displays deliver all the high-quality benefits and services you expect from NEC, from attention-grabbing brightness and contrast to ease of maintenance, including:

Always-on

Hot-swappable pixel cards mean you can replace without having to turn the display off.

Unmatched LED Reliability

The Multi-Color™ LEDs used in the FA Series are engineered to reduce the risk of common LED failures, ensuring your display is always at its best.

Installation included

All FA screens include installation by NEC experts, or certified NEC resellers, to ensure you get maximum benefit from your design and investment.

Give your content the display it deserves with NEC's FA series

NEC's FA series delivers a high-performance, crystal-clear visual experience for even the most demanding applications. And with six pixel pitch options to choose from, you can get the ultimate, always-on viewing experience at your preferred viewing distance. From auditoriums to airports, there's a solution that will integrate perfectly.

For businesses with high-performance needs, FA builds on the quality of NEC's FE series with exceptional reliability:

Genuine ease of maintenance

Front access and easy-to-replace pixel cards reduce maintenance overhead and time.

Built-in redundancy protection

Data and power redundancy built into each module to ensure there is always an image on the screen, minimizing downtime.

Installation included

All FA screens include installation by Sharp/NEC experts, or certified Sharp/NEC resellers, to ensure you get maximum benefit from your design and investment.

Make a real splash with NEC's FA Series of dvLED displays

In addition to 24/7 high performance, your organization can make a splash with high-visibility video:

- Easy-to-scale, bezel-free display.
- Exceptional brightness and contrast, even in bright conditions, with up to 1200 cd/m² and a contrast ratio of up to 7,000:1.
- Improved Multi-Color LED performance for better contrast, uniformity, viewing angles and brightness.
- Refresh rate of up to 3840Hz for the ultimate image quality.
- High flexibility – front-serviceable design enables installation in locations where backyards can't be secured.
- Easy upgrades for future-proof investment: It's easy to upgrade a 3.8 mm display to a finer pixel pitch by simply upgrading the card, instead of having to reinvest in a new wall-mounting structure.
- SuperBlack high-contrast model available for improved clarity and contrast needed in broadcast environments.

| SKU | PIXEL PITCH | APPLICATION |
|-------------|--------------------|----------------------------|
| LED-FA009i2 | 0.95mm pixel pitch | UHD APPLICATIONS |
| LED-FA012i2 | 1.2 mm pixel pitch | e.g., boardroom |
| LED-FA015i2 | 1.5mm pixel pitch | e.g., medium meeting room |
| LED-FA019i2 | 1.9mm pixel pitch | e.g., corporate entrance |
| LED-FA025i2 | 2.5mm pixel pitch | e.g., showroom |
| LED-FA031i2 | 3.1mm pixel pitch | e.g., control room |
| LED-FA038i2 | 3.8mm pixel pitch | e.g., airport large screen |

YOUR VISION IS LIMITLESS.
