

NEC'S FE SERIES: ALL THE BRIGHTNESS AND QUALITY YOU NEED TO DO YOUR CONTENT JUSTICE.

You're looking for the ultimate, eye-catching display for your content, but you don't need 24/7 capability. NEC's FE Series delivers the splash, flexibility and seamless display you need to do your content justice.

NEC's FE Series of dvLED displays is designed to deliver the perfect indoor view from 3-30 feet, even in bright light. It's ideal for retail settings, auditoriums or even in a window display.

Just because you're not operating in a mission-critical environment, where your content will be on display round the clock, there's no need to compromise on performance. The FE solution is a great fit for organizations that don't need always-on capability but still want the quality and service that NEC is recognized for.

With FE displays, attention-grabbing clarity comes as standard. Enjoy all the high-quality benefits of NEC technology in an easy-to-scale, flexible solution, including:

Exceptional brightness and contrast

Even in bright conditions, get up to 1200 cd/m² and a contrast ratio of up to 7,000:1.

Genuine ease of maintenance

Front access and easy-to-replace, hot-swappable pixel cards reduce maintenance overhead and time.

Installation included

All FE screens include installation by Sharp/NEC experts, or certified Sharp/NEC resellers, to ensure you get maximum benefit from your design and investment.

FE displays give you all the performance you expect from NEC, without adding layers of features you don't need.

Make a real splash with NEC's FE Series of dvLED displays

- Easy-to-scale, bezel-free display for distraction-free viewing.
- Complete solution for different-sized screens, starting at 110", ranging from 0.9 - 3.8mm pixel pitch for the sharpest resolution up to ultra-HD.
- Refresh rate of up to 3840Hz for ultimate image quality.
- High flexibility – front-serviceable design enables installation in locations where backyards can't be secured.
- Easy upgrades for future-proof investment: It's easy to upgrade to a finer pixel pitch by simply upgrading the card, instead of having to reinvest in a new wall-mounting structure.

Get the crystal-clear experience you need with NEC's FE series

NEC's FE series delivers a high-performance, crystal-clear visual experience for even the most demanding applications. And with seven pixel pitch options to choose from, you can get the ultimate viewing experience at your preferred viewing distance. From auditoriums to boardrooms, airports and retail settings, there's a solution that will integrate perfectly.

SKU	PIXEL PITCH	APPLICATION
LED-FE009i2	0.9mm pixel pitch	UHD Applications
LED-FE012i2	1.2 mm pixel pitch	e.g., boardroom
LED-FE015i2	1.5mm pixel pitch	e.g., corporate entrance
LED-FE019i2	1.9mm pixel pitch	e.g., control room
LED-FE025i2	2.5mm pixel pitch	e.g., medium meeting room
LED-FE031i2	3.1mm pixel pitch	e.g., showroom
LED-FE038i2	3.8mm pixel pitch	e.g., airport large screen

YOUR VISION IS LIMITLESS.
