NEC DISPLAY UPDATES POPULAR PROFESSIONAL DESKTOP DISPLAY FOR COLOR-CRITICAL USES

The 27-inch MultiSync® PA271Q provides even greater performance

CHICAGO, June 21, 2018 – NEC Display Solutions of America, Inc., a leading provider of commercial LCD displays and projectors, today announced the launch of the MultiSync PA271Q, a new professional 27-inch wide color gamut monitor.

“The MultiSync PA271Q replaces the PA272W, one of our most popular professional wide color gamut desktop displays,” said Art Marshall, Senior Product Manager for Desktop Displays at NEC Display Solutions. “It provides much better black levels and contrast, and new cutting-edge features have been added to provide improved color coverage to meet the color-critical needs of the print production, digital photography, photo editing, and video production markets, among others.”

This advanced desktop display provides incredibly accurate color due to each unit’s individual factory calibration. It features true 10-bit color with a 14-bit 3D LUT for impeccable accuracy and supports all professional color spaces (sRGB and Adobe RGB) and standard video color spaces (Rec. 709, Rec. 2020). This model also includes the SpectraView_{ii}™ Engine, NEC’s custom color processor, and an always-on backlight sensor for stable color and brightness for the life of the display and a low-latency mode when working with live video. In addition, Picture in Picture, Picture by Picture and ICC profile support simplify color-critical workflows.

Optimized for professional use, the PA271Q has a high-quality IPS panel, 178-degree viewing angle, and 150mm high adjust, tilt, swivel, and rotate. It offers best-in-class connectivity with DisplayPort, Mini DisplayPort, HDMI (2), USB-C with 30W power delivery, Ambix, and a USB hub with DisplaySync Pro™ (3 up/3 down) and human sensors that save energy when a user isn’t nearby.

Designed and built to last, the MultiSync PA271Q is backed by a 4-year, 48-hour exchange warranty. It is available June 2018 at a minimum advertised price of \$1,299 and in a SpectraView bundle for \$1,549. For additional information and specs, please [visit NEC Display Solutions](#).
