Sharp NEC Display Solutions Launches Powerful New Projector

The new projector's short-throw lens and compact design is ideal for small spaces in corporate offices, higher education, museums and golf simulation settings.

CHICAGO – June 28, 2022 – [Sharp NEC Display Solutions](#), a global leader in the projector and display markets, launched the brand-new PE456USL Entry Installation Projector today. This new model is made to accommodate tight rooms, specifically in museums, golf simulators, corporate offices and higher education classrooms.

The new projector, which will be part of Sharp/NEC's PE Series, provides a short-throw, 4,500-lumen projection in areas where space is limited or where casting a shadow on the screen is a concern. The model's 20,000-hour laser life is a huge benefit for companies and schools trying to get the most out of their projectors.

The PE456USL's compact design also means shipping and installation costs will remain low, making it a great choice for tight budgets.

"The PE456USL short-throw, laser projector can make challenging applications simple with close projector placement and minimal shadowing," said Ryan Pitterle, Senior Product Manager at Sharp/NEC. "It's a great choice for any organization with limited space and in need of a reliable projector that produces impressive high resolution images. We can't wait to see how the PE456USL opens new doors for projection across the country."

As with all of Sharp/NEC's laser projectors, the PE456USL is backed by an industry-leading 5-year warranty which includes Instacare, Sharp/NEC's replacement program. Also included is

NaViset Administrator 2 software, designed to provide remote management and network based control.
