### **Introducing Large-Format Additions to Sharp 4K Ultra-HD Professional LCD Display Lineup**

**MONTVALE, NJ, August 3, 2022** – Sharp Imaging and Information Company of America (SIICA) and Sharp NEC Display Solutions of America (SNDSA) introduced today the PN-HC and PN-HE 4K Ultra-HD LCD professional display series. The large-format monitors complement the existing Sharp lineup of monitors for commercial and professional environments, which launched in February 2022 with the [PN-HS and PN-HY displays](#).

Offering vivid, ultra-high definition and lifelike images with incredible realism, the PN-HE and PN-HC are available in 65" Class (64 ½" diagonal) and 75" Class (74 ½" diagonal) sizes, while the PN-HC series also carries an 86" Class (85 9/16" diagonal) version. The PN-HC series boasts up to 450 nits of brightness and is an ideal solution for indoor retail, apparel and reception areas. The PN-HE series is even brighter at up to 600 nits and is perfect for indoor spaces with direct or indirect sunlight, such as windows and skylights.

“The PN-HC and PN-HE series are the perfect complements to our Ultra-HD lineup of professional and commercial displays, offering solutions for environments in need of larger formats,” says Gary Bailer, Director of Product Management. “We’re excited to offer these options to allow professionals to showcase stunning imagery and capture their audiences’ attention in an impactful way.”

With four times the pixel resolution of Full HD, the two new LCD monitor series come with built-in media players, so images and videos can display via USB drive and without the need of a PC. They also offer flexible installation in all major orientations – landscape, portrait, tilt-forward or tilt-backward.

The PN-HC751 and PN-HE751 will ship in July/August 2022, while the PN-HC651, PN-HC861 and PN-HE651 are expected to ship in early September 2022.
