**NEC DISPLAY SOLUTIONS INTRODUCES AFFORDABLE NEW LINE OF  
HIGH-DEFINITION, FLAT-PANEL LCD DISPLAYS**

***New AccuSync Multimedia Series Delivers Feature-Rich Affordability,  
NEC Reliability to Residential Customers***

**CHICAGO – September 6, 2007** – NEC Display Solutions of America, a leading stand-alone provider of LCD desktop and large-screen LCDs, plasma displays and projectors, today introduced a new line of affordable, feature-rich LCD displays. The new AccuSync Multimedia Series combines intelligent design with innovative display technology for performance-minded residential customers.

By incorporating key features, such as a built-in HD Tuner and comprehensive input panels, the AccuSync Multimedia displays bring new value to the entry level LCD display market. With a detachable TruSurround XT sound system and 5000:1 contrast ratio, the AccuSync Multimedia does not sacrifice performance to get there. The Series also uses progressive scan technology, which produces more image detail and better picture quality. The AccuSync Multimedia display family includes the 32-inch PV32, the 40-inch PV40 and the 46-inch PV46.

“These new AccuSync displays provide a level of value and performance not currently offered by displays in this size and space,” said Hans Baumann, Sr. Product Manager for NEC Display Solutions. “They bring together best-in-class display technology with a host of features to deliver incredible screen performance no matter the content, input or environment.”

With the detachable two-way TruSurround XT sound system, which includes an industry-leading 50-watt speaker system (25W x 2) on the AccuSync PV46, the AccuSync Multimedia Series is an ideal solution for light- to medium-duty digital signage and information display applications.

The integrated HD tuner allows for crisp, clear and free over-the-air HD content, making the AccuSync Multimedia Series a perfect component for the residential market. A sleek, contemporary design – in addition to an input panel that includes HDMI, DVI with HDCP – adds both style and versatility to any room or any peripheral. The new displays also include RF input for direct cable connectivity.

The new AccuSync Multimedia Series LCD displays include the following features:

- **High-definition display**, which provides optimal resolution (1366 x 768) for almost any application
- **Built-in HD tuner**, which allows for high-definition broadcast capabilities
- **Contemporary bottom mount speaker system** with industry leading 50-watt speakers (25W x 2) (PV46), including two-way TruSurround XT sound system, seven-band equalizer and auto volume leveler
- **Progressive scan**, which produces more detailed images and better image quality
- **Motion adaptive and enhancement de-interlace**, which provides superior interpolation for moving video, resulting in a smooth image with greater detail
- **Timer Function**, which includes a clock, on/off and sleep programmable timer
- **Comprehensive input panel**, including component, HDMI and DVI with HDCP (allows copy protected HD content to be displayed properly). Interface with PCs, DVD players and video game consoles, utilizing the monitor's superior performance
- **Multiple aspect ratio control**, which allows flexibility with today's many source choices
- **PIP/POP**, which allows two sources to be displayed on the screen at one time
- **5000:1 contrast ratio** for superior quality and commanding images (PV40, PV46)
- **V-chip**, which enables users to block the display of television programming based upon its rating, and child lock prevents unwanted changes to the display
- **RoHS compliance**, which ensures the displays are free of lead, hex-chrome, cadmium, PBDE and PBB, with reduced mercury
- **Industry leading service and support** with superior 24/7 customer service and technical support. NEC is among the leaders in lowest return rates and highest overall customer satisfaction
- **VESA compliant** – Easily mount displays on walls or arm mounts
- **WEEE Compliant** – The AccuSync Multimedia Series complies with e-waste standards, ensuring easier, more environmentally friendly product transitions
- 1-year warranty, including 24/7 support from NEC

The displays are available today with estimated street prices of \$899.99 for the AccuSync PV32, \$1,399.99 for the AccuSync PV40, and \$1,999.99 for the AccuSync PV46.
