**NEC DISPLAY SOLUTIONS INTRODUCES VALUE-DRIVEN
LED-BACKLIT ACCUSYNC DESKTOP MONITOR**

Economical Monitor with Latest Certifications and Technologies

CHICAGO – November 6, 2012 – [NEC Display Solutions of America](#), a leading [provider](#) of commercial LCD display and projector solutions, announced today its new 19-inch AccuSync™ AS192WM desktop monitor. This LED-backlit model is suited for small-to-medium-sized business users looking for an environmentally conscious model.

The widescreen AS192WM offers a 33% reduction in power consumption due to the elimination of its predecessor's CCFL backlight. Mercury-free LED backlighting improves energy efficiency and allows for a near 20% reduction in weight, while enabling easy transport and wall mounting capabilities. The AS192WM is compliant with the latest regulations including ENERGY STAR® 6.0 and TCO 6.0, is EPEAT™ Silver rated and includes ECO Mode™ and carbon footprint meter tools.

“NEC’s AccuSync Series continues to deliver essential values to business users at an affordable price,” said Lynn Gu, Product Manager at NEC Display Solutions. “This model follows the green industry trend with its LED backlighting and environmental certifications. The added functionality and reliability it provides allow it to earn the NEC badge.”

The AS192WM includes the following features:

- 19-inch, 16:10 wide screen LED-backlit LCD desktop monitor

- 1440 x 900 native resolution
- VGA and DVI-D connectivity
- Tilt adjustability
- Touch-integratable
- Integrated speakers (1W x 2) with headphone jack
- ECO Mode and carbon footprint meter
- ENERGY STAR 6.0, TCO 6.0 and EPEAT Silver compliance

The AS192WM will be available in November at an estimated street price of \$149 and ships with a standard three-year parts and labor warranty, including the backlight.
