Sharp/NEC's New MultiSync® E Series Displays Feature a Sleek Design with Workspace Essentials at a Cost-Conscious Price

The feature-rich enterprise displays include adjustability, ergonomics and connectivity, meeting the needs of cost-conscious corporate buyers

CHICAGO, IL – June 6, 2023 – [Sharp NEC Display Solutions of America](#) (SNDSA), a global leader in the projector and display markets, and Sharp Imaging and Information Company of America (SIICA) today announced the launch of the new MultiSync® E Series displays (E224F-BK, E244F-BK, E274F-BK, E224FL, E244FL, E274FL) that will provide corporate customers flexibility in their work environment and presents all the reliable performance you expect from Sharp/NEC, against a very competitive price tag. NEC's new E Series displays feature ergonomic functionality, future-ready design with 3-sided ultra-narrow bezels, internal speakers and VESA mounting capability for arms and wall mounts.

"The new connectivity options and design make the new E Series displays ideal for multi-monitor applications," said Horacio Alzate, Product Manager, Desktop Displays at Sharp/NEC Display Solutions. "They are perfect for side-by-side usage in both landscape and portrait orientation. The workspace ergonomics is a key design feature. Height adjustability to 120 mm with swivel, tilt and pivot functionality ensures a personalized set up. And built-in Low Blue Light and Flicker-Free technology protects the viewers' eyes without sacrificing best picture quality."

Displays in this category typically have one or two input signals, but the E224FL, E244FL and E274FL include USB-C, HDMI, DisplayPort and VGA connections providing additional flexibility and adaptability for customers. They also feature LAN connectivity for customers looking to connect their computers, servers, video game consoles, and other devices to the Internet. Customers who do not need additional USB-C and LAN options may consider the E224F-BK, E244F-BK and E274F-BK models.

"The E Series displays offer high-end features at a cost-conscious price, and with a fresh On-Screen Display (OSD) design, users benefit from highly intuitive operation, saving time and frustration during set up and adjustment. This Full HD display with VA screen technology is well placed to equip the home office and small to medium sized businesses for general office applications, making them optimal for education, retail, financial and corporate settings, to name a few," added Alzate.

This series of displays includes Sharp/NEC's 3-year warranty.
