NEC DISPLAY SOLUTIONS DESKTOP PRODUCTS RECEIVE EPEAT™ GOLD RATING

MultiSync LCD175VXM+BK, LCD195VX+BK Qualify for Elite Green Rating

CHICAGO – April 22, 2008 – NEC Display Solutions of America, a leading stand-alone provider of commercial and residential LCD and plasma displays and projectors, announced today the MultiSync LCD175VXM+BK and MultiSync LCD195VX+BK desktop displays have been registered with EPEAT at the Gold level. This is the first EPEAT Gold rating for NEC Display Solutions.

EPEAT (Electronic Product Environmental Assessment Tool) is a system in which manufacturers declare their products' conformance to a comprehensive set of environmental criteria in eight environmental performance categories. Products are ranked in EPEAT according to three tiers of environmental performance: Bronze, Silver and Gold. All registered products must meet 23 required criteria to achieve Bronze status. Manufacturers may then achieve a higher level EPEAT rating for products by meeting additional optional criteria.

To earn EPEAT Gold status, an electronic product must meet all required environmental criteria, such as being ENERGY STAR® compliant and containing a minimum of 65 percent reusable or recyclable materials, in addition to meeting at least 75 percent of the optional criteria. To obtain a Gold rating, NEC's MultiSync LCD175VXM+BK and MultiSync LCD195VX+BK desktop displays met 80 percent of the optional criteria, fulfilling EPEAT's rigid requirements and furthering NEC's environmental initiatives.

“We are excited to have two of our desktop displays join 70 of our other products in EPEAT certification, but we are especially honored to earn the privileged Gold rating,” said Pat Summers, Manager of Environmental Affairs at NEC Display Solutions. “Our EPEAT manufacturer status greatly complements our overarching environmental initiative, and we are very proud to be one of the only manufacturers to offer EPEAT Gold desktop products.”

The 17-inch MultiSync LCD175VXM+BK and 19-inch MultiSync LCD195VX+BK deliver the latest LCD technology and design. These feature-rich desktop monitors include Rapid Response™ for virtually uninterrupted viewing of high-speed, full-motion video, Ambix® digital/analog inputs, enhanced cable management, a height adjustable stand, NaViSet™ intuitive display settings control and worry-free No Touch Auto Adjust™. The MultiSync LCD175VXM+BK and MultiSync LCD195VX+BK displays are available for an estimated street price of \$249.99 and \$279.99, respectively. Both come standard with a 3-year limited parts and labor warranty. The EPEAT versions will be available for July 2008 shipment.
