**NEC-MITSUBISHI ELECTRONICS DISPLAY LAUNCHES
HIGH-PERFORMANCE, WIDE-FORMAT 23-INCH
MULTI-FUNCTION MONITOR FOR PC AND TV USE**

Company's First Entry in High-End Multi-Function LCD Category Combines Wide Range of Luxury Features with Outstanding Style

CHICAGO – JAN. 5, 2005 – NEC-Mitsubishi Electronics Display of America, Inc., the leading stand-alone vendor of flat panel desktop displays, today announced its first entry in the high-performance, wide-format multi function monitor segment, the NEC MultiSync LCD2335WXM monitor.

The MultiSync LCD2335WXM monitor delivers high performance luxury features, including powerful integrated speakers, digital inputs, an analog TV tuner and HDTV-readiness, despite its very competitive price tag.

“The MultiSync LCD2335WXM monitor is designed with one thing in mind: to provide the ultimate viewing experience,” said Preston Harris, senior product specialist for NEC-Mitsubishi Electronic Display of America, Inc. “We are thrilled to introduce NEC quality and technology into the wide format multi function monitor segment with such an exciting personal entertainment device.” The newest member of NEC-Mitsubishi’s best-selling 35 series of flat panel monitors, the 23-inch MultiSync LCD2335WXM has an estimated street price of \$1,199.

The 23-inch multi-function MultiSync LCD2335WXM monitor can be used either as a stand-alone television or combined with a personal computer. Key features of the monitor include:

- Stylish industrial design that adapts well to home or office
- HDTV-ready
- Picture in picture
- Analog TV tuner with remote control
- Integrated multimedia speakers
- 1280 x 768 viewing resolution
- Analog VGA and DVI-D PC inputs
- S-video, component, and composite video inputs
- Super bright 500 cdm/2 panel technology
- One-year limited warranty
- 24/7 support from NEC-Mitsubishi
