Sharp NEC Display Solutions Introduces NC2403ML RB Laser Projector

Featuring native 2K resolution and 50,000 hours of life, Sharp/NEC's NC2403ML adds to its line of next generation of module projectors

CHICAGO – December 1, 2021 – [Sharp NEC Display Solutions, a global leader in the projector and display market](#), today announced the availability of the NC2403ML laser projector, the latest upgraded model in its digital cinema projection series. With an improved, replaceable RB laser module and laser light source lifespan of up to 50,000* hours, this new model is the ideal projection solution for theaters with medium and large screens. The NC2403ML is also suitable for museum, House of Worship, and higher education applications.

Exhibitors now have a cost-conscious cinema projection solution offering interchangeable laser light sources in the projector head for ultimate versatility and future-proofing. The interchangeable laser module can be purchased separately and switched between projector heads for different sized auditoriums. Its improved RB laser module generates 24,000 lumens of brightness and features adjustable brightness levels for 2D and 3D feature films. Its 2K DCI-compliant laser produces an outstanding image that is bright enough to display on screens up to 72 ft/22 m.

“The introduction of the NC2403ML broadens our lineup of next generation, modular laser projectors,” said Richard McPherson, Senior Product Manager at Sharp NEC Display Solutions. “Projectors with this replaceable laser module, such as this model and our recently announced NC1803ML, are low-maintenance and provide exhibitors with substantial protection on their investment.”

In addition to improved projection and imaging, the NC2403ML offers flexible placement installation and a reliable nature. For more information on Sharp NEC Display Solutions, visit <https://www.sharpnecdisplays.us/>.

*The lifetime may vary depending upon environmental conditions and does not constitute the warranty period.
