**NEC DISPLAY SOLUTIONS INTRODUCES NEW 21-INCH, 4:3 ASPECT  
MULTISYNC P SERIES DESKTOP DISPLAYS FOR PROFESSIONAL  
APPLICATIONS**

***Standard Gamut Displays with IPS LCD Panels Deliver Consistent Color;  
SpectraView Bundles Also Available***

**CHICAGO – August 6, 2015** – [NEC Display Solutions of America](#), a leading provider of commercial LCD display and projector solutions, announced today the newest MultiSync P Series displays, the MultiSync® P212. The P212 desktop display is designed for use in digital image acquisition, command and control, and industrial applications, and capable of 24/7 usage. In medical environments, all of the P Series displays can even be calibrated to the DICOM standard for conformance.

The P212 comes in four configurations – P212 (white cabinet), P212-BK (black cabinet), P212-SV ([SpectraView<sub>II</sub>](#) model in white) and P212-BK-SV (SpectraView model in black) – and features a conventional format 4:3 aspect ratio and 1,600 x 1,200 resolution in an IPS panel that covers 97.9 percent of sRGB color space.

“These new MultiSync P Series desktop displays deliver consistent color and unique features for always-on environments,” said Art Marshall, Senior Product Manager of Professional and Medical Displays at NEC Display Solutions. “Our award-winning SpectraView<sub>II</sub> software also works with the new P212 models, ensuring accurate color without loss of detail because the adjustments are made in the monitors rather than the video card lookup tables.”

Other features of the P212 include:

- Professional-grade backlight technologies, which help deliver a long display life
- 440 cd/m<sup>2</sup> brightness
- Black level control to manage contrast ratio (1500:1)
- Digital Uniformity Correction to ensure consistent color and brightness over the entire screen area
- Internal 14-bit 3D programmable lookup tables (LUTs)
- Multiple connectivity options, including DisplayPort 1.2, HDMI 2.0, DVI and VGA, for connecting most devices
- Built-in 3 port USB 3.0 hub, which provides connectivity for the latest devices
- Free MultiProfiler software, which provides complete control over the five picture modes, including loading any ICC profile directly into the monitor for optimal color space matching
- Ergonomic flexibility, including tilt, swivel, height and pivot between landscape/portrait orientations
- 5 custom presets, completely customizable using the MultiProfiler software
- 2W (1W + 1W) business-class speakers
- 4 Year Warranty with 48-hour Advanced Exchange service

The MultiSync [P212](#), [P212-BK](#), [P212-SV](#) and [P212-BK-SV](#) displays ship with a 4-year limited parts and labor warranty, and will be available in September 2015 at a minimum advertised price of \$899, \$899, \$1,149 and \$1,149, respectively.
