**NEC DISPLAY SOLUTIONS' MULTISYNC 90GX² SELECTED AS ONE OF
PC WORLD'S "100 BEST PRODUCTS OF 2007"**

***LCD Desktop Display Chosen As One Of The Best
For Gaming and Home Entertainment***

CHICAGO – June 1, 2007 – NEC Display Solutions of America, a leading provider of innovative LCD displays, professional grade plasmas and projectors, and integrated display solutions, today announced that its MultiSync 90GX² desktop display has been named one of PC World's "100 Best Products of 2007." With the MultiSync LCD2180WG-LED being named one of the top 25 Most Innovative products of 2006, this is the second year in a row that one of NEC's displays has placed in a PC World's "Best" list. (See <http://www.pcworld.com/article/id,131935-page,1/article.html>.)

In their quest for the top technical products of the year, PC World calculates each item's design, performance, features, and value on a 100-point scale. NEC's MultiSync 90GX² earned an average of 82 points across all four categories. Contributing factors included its sleek style, vibrant color picture, and especially its response time of just 4 milliseconds. This faster response time enhances the clarity of video images and animated action which has made the display a success in the gaming community.

"The NEC MultiSync 90GX² was designed for anyone who enjoys an optimal gaming or multimedia experience," Andy Anderson, Product Manager for NEC Display Solutions, explains. "Our goal was to create an exceptional desktop display that would improve speed, performance, and graphic presentation for the graphics-focused user. We are thrilled that PC World has chosen to recognize the MultiSync 90GX² as one of the best products of 2007."

The MultiSync 90GX² is not the only NEC product to win an award in 2007. NEC also took home Government Computer News' FOSE "Best of Show" for the MultiSync LCD2690WUXi in March and MacWorld's "Best of Show" for the MultiSync LCD2690WUXi in January. NEC's complete product listing can be found on the company website at www.necdisplay.com.
