## Sharp Introduces Newest PN-E Series Displays to Power the Next Generation of Visual Communication

---

*High-resolution imaging, flexible installation, and plug-and-play functionality meet the essential demands of modern businesses*

**MONTVALE, NJ – August 12, 2025** – Meeting today’s demand for smarter, more adaptable display tech, [Sharp Imaging and Information Company of America](#) (SIICA), a division of Sharp Electronics Corporation (SEC), has unleashed the new PN-E Series—a powerful new lineup of commercial-grade displays, built to meet the evolving needs of digital signage, workplace collaboration and dynamic information sharing.

The PN-E Series packs seven screen sizes—32", 43", 50", 55", 65", 75" and 86" Class sizes—into a sleek design that looks just as sharp as it performs. Whether lighting up retail spaces, energizing classrooms, or commanding boardrooms, the PN-E Series is engineered for flexibility and visual impact. High haze panels reduce glare, while its minimalist four-sided bezel ensures streamlined viewing.

With **UHD 3840x2160 resolution** (Full HD for 32"), **350 nits of brightness**, and support for **landscape, portrait, and 0-±20° tilt orientations**, the PN-E Series fits seamlessly into a variety of settings. Add in dual HDMI 2.0 inputs, a USB-C input, and an integrated media player, and you’ve got plug-and-play simplicity with high-quality performance.

Built tough with **metal bezels, high haze anti-glare panels**, and rated for **16/7 operation**, these displays deliver next-level reliability—and they’re backed by Sharp’s **three-year limited commercial warranty**. The PN-E Series also supports both Sharp and NEC’s legacy command protocols, making them a smart, scalable fit for both enterprise rollouts and one-off installs.

“With the PN-E Series, we set out to cut the complexity and give integrators and end-users exactly what they need—rock-solid displays with impressive performance that blend perfectly with other tech” said Patrick Dure, Associate Product Manager, SIICA. “Whether it’s enhancing a classroom or supporting a retail signage network, this essential series offers the perfect balance of quality, versatility and value.”

Purpose-built to perform across a wide range of industries, including enterprise, retail environments, K-12 education, and houses of worship, the PN-E Series is a great option for digital signage networks, corporate collaboration spaces, and higher ed environments.
