News Release

Sharp Launches New Series of Bright 4K Ultra-HD Professional LCD Displays for Commercial Environments

MONTVALE, NJ, February 1, 2022 – Sharp Imaging and Information Company of America (SIICA), a division of Sharp Electronics Corporation (SEC), introduced today the PN-HS and PN-HY 4K Ultra-HD Professional LCD Monitor Series, offering vivid, high-definition signage solutions to showcase lifelike images with incredible realism.

Built for commercial and professional environments, the PN-HS and PN-HY professional displays are available in three large sizes: 55" class (54 5/8" diagonal), 50" class (49 1/2" diagonal) and 43" class (42 1/2" diagonal). The PN-HY series provides a brightness of 500 nits, which is 111% brighter than its predecessor line, the PN-Y series, and is ideal for indoor retail, apparel and reception areas with bright lighting. Meanwhile, the PN-HS series, which succeeds the PN-R series, is even brighter, boasting a brightness of 700 nits that is perfect for spaces receiving either direct or indirect sunlight, including windows and skylights.

Both professional LCD monitor series provide vivid 4K Ultra-HD to display realistic looking still images and video. They offer flexible installation for 24/7 operations and can be installed in a portrait or landscape orientation, as well as face-up, face-down, tilted-forward, or tilted-backward. Additionally, they come equipped with built-in media players, offering USB connectivity to easily share still images or video without the need for a separate PC.

"We are thrilled to announce the launch of the PN-HS and PN-HY series as we continue to innovate and advance our LCD display technology solutions to serve professional environments," says Gary Bailer, Director of Product Management. "Their large size and high brightness levels make them ideal solutions for a variety of indoor commercial settings where you want vivid colors to really pop off the screen."

The PN-HS and PN-HY 4K Ultra-HD Professional LCD Monitor Series are available to ship in early 2022.
