SHARP NEC DISPLAY SOLUTIONS EXPANDS USB-C CONNECTIVITY WITHIN NEC MULTISYNC® EA SERIES

Building on the success and core feature set of the NEC MultiSync EA Series, these new models provide a feature-rich experience for the enterprise environment with USB-C connectivity and charging capability

CHICAGO – November 11, 2020 [Sharp NEC Display Solutions](#), a global leader in the display market, announces two new additions to its NEC MultiSync® EA Series desktop portfolio. The 24" EA242F and 27" EA272F boast full ergonomic capabilities and full connectivity to meet the needs of demanding corporate users. These new EA Series displays also include USB-C charging capabilities, a feature that NEC has implemented in advance of industry standards. USB-C helps users optimize connectivity and declutter the workspace by replacing video, audio, power and USB cabling with a single cable to connect and charge any notebook, tablet PC or mobile device universally using the display. These new models also have the option to include NEC SpectraView™ calibration software for color critical applications.

This launch comes on the heels of the company celebrating the 35th anniversary of its iconic MultiSync product line. NEC was the first to produce and distribute a CRT monitor that could self-synchronize its display to differing horizontal and vertical frequencies from graphics adapters and signals in various formats, setting a new standard for quality and compatibility. The MultiSync monitor became one of the first future-ready peripheral devices in computer history and a permanent industry standard.

“We are building on the success of our current EA Series to strengthen our product offering and continuing the 35-year tradition of our MultiSync product line,” said Horacio Alzate, Product Manager, Desktop Displays/Large E-Series at Sharp NEC Display Solutions. “The upgrades enable full digital connectivity to connect to multiple platforms and are ideal for environments where great imaging is desired but cost is a factor.”

Known worldwide for a commitment to high-quality products, focus on customer support and outstanding partner relationships, Sharp NEC Display Solutions is eager to continue offering customers products that meet the needs of the corporate buyer.
