NEC DISPLAY SOLUTIONS INTRODUCES TWO TRADE-COMPLIANT LCD MONITORS FOR THE GOVERNMENT MARKET

Two AccuSync LCD Monitors Are Only Trade-Compliant Displays Also Silver-Certified through EPEAT

CHICAGO –December 15, 2006 – NEC Display Solutions of America, the leading stand-alone provider of flat panel desktop displays, today announced two TAA, trade-compliant AccuSync LCD monitors. TAA, the Trade Agreement Act of 1979, requires certain products be manufactured or significantly altered in the U.S. or designated countries to be eligible for government purchase.

NEC Display Solutions is offering two LCD monitors – the 17-inch ASLCD72VX-BK-TA and 19-inch ASLCD92VX-BK-TA with a sharp, native resolution of 1280 x 1024 and brightness at 250 cd/m². The monitors have a three-year limited warranty and 24/7 support from NEC Display Solutions.

“I’m excited to enter the government market with two of NEC’s best AccuSync LCD monitors,” said Clinton Wilhight, Senior Product Manager for NEC Display Solutions. “These products will be listed on federal government purchasing schedules, making acquisition easy for procurement managers.”

Currently, NEC is the only monitor company to offer both trade-compliant monitors that also are EPEAT silver-certified. EPEAT stands for the Electronic Product Environment Assessment Tool. EPEAT-compliant monitors are recognized for helping reduce hazardous waste and electricity usage, resulting in lower energy costs and increased protection for the environment.

“As a recognized industry leader known for delivering high-quality display products, NEC has competitively priced its trade-compliant monitors, while delivering NEC’s superior performance,” said Wilhight.

The ASLCD72VX-BK-TA has an estimated price of \$254.99 and the ASLCD92VX-BK-TA has an estimated price of \$299.99. Estimated delivery date for the two monitors is early January 2007.

The new AccuSync displays are RoHS (Restriction on Hazardous Substances) compliant, containing fully disposable plastics and minimal amounts of hazardous materials such as lead, hex-chrome, cadmium, mercury, PBDE and PBB.
