## **NEC DISPLAY SOLUTIONS INTRODUCES NEW TOUCH SCREEN LCD MONITORS**

### ***NEC's LCD Monitors with State-of-the-Art Touch Technology Deliver Integrated Touch screen Solution***

**CHICAGO – October 31, 2005** – Aiming to bring its award-winning LCD products and solutions to retail and point-of-sale markets, NEC Display Solutions of America, the leading stand-alone provider of flat panel desktop displays, today announced the availability of the new AccuSync line of touch screen LCD monitors.

The four new NEC touch-enabled displays use the 15" AccuSync LCD52V and the 17" AccuSync LCD72V monitors with a choice of either capacitive or resistive touch screen technology to deliver interactive touch capabilities to markets such as retail point-of-sale, entertainment, hospitality, kiosks, medical, industrial, education and transportation.

NEC's new capacitive-enabled AccuSync monitors are ideal for applications that require fast, reliable and accurate touch performance. This high level of performance is achieved through the use of 3M's ClearTek™ capacitive touch screens which have the added benefit of increased durability by resisting scratches, abrasions and everyday contaminants such as dirt, liquids and harsh chemicals. The new resistive-enabled AccuSync monitors incorporate 3M's MicroTouch™ resistive touch screen technology and offers, economical and enhanced input flexibility by being capable of responding to multiple input stimuli, including a finger, gloved hand or pen stylus.

“The new AccuSync touch models illustrate the value NEC delivers to our customers by offering fully integrated and ready-to-use touch display solutions,” said Clinton Wilhight, Senior Product Manager, NEC Display Solutions. “By giving our resellers and end-customers market-ready solutions with fast and reliable user interfaces, we can expedite the deployment of projects and deliver comprehensive touch solutions at a competitive price.”

The NEC AccuSync Touch LCD Series with Rapid Response™ technology provides for uninterrupted display of full-motion video with response times of 25ms or less. This remarkably quick motion makes these models better than ever for applications such as presentations and streaming video. Using approximately 70% less power and emitting less heat than comparable CRT monitors, NEC's AccuSync Touch LCD Series monitors deliver greater power management and a lower total cost of ownership.

### **Series Features and Benefits**

- Capacitive touch screen technology offers fast, reliable and accurate performance, resisting scratches, abrasions and everyday contaminants.
- Resistive touch screen technology provides a more economical performance with increased input flexibility with any input device, including a finger, gloved hand or pen stylus.
- USB interface allows easy connection of the display's touch interface to today's computer systems.
- Exceptional screen performance provides a more comfortable and productive visual experience with crisp, sharp and accurate text and images.
- NaViSet™ software offers an expanded and intuitive control interface, allowing adjustments to display settings via mouse and keyboard.
- Slim footprint liberates the work space (up to 70% weight reductions and up to 60% less space required compared to CRT monitors).
- Low power consumption reduces electrical costs and lowers total cost of ownership.
- Rapid Response technology delivers virtually uninterrupted, undistorted viewing of high-speed, full-motion video.
- On Screen Manager (OSM®) provides easier control of screen setting adjustments.
- Full three-year limited warranty on parts and labor.

The new NEC AccuSync Touch LCD Series products are RoHS (Restriction on Hazardous Substances) compliant, containing fully-disposable plastics and free of hazardous materials. Estimated street prices for the products are:

- \$594.99 for the 15 inch Resistive Touch AccuSync LCD52V (#ASLCD52V-TR)
- \$654.99 for the 17 inch Resistive Touch AccuSync LCD72V (#ASLCD72V-TR)
- \$739.99 for the 15 inch Capacitive Touch AccuSync LCD 52V (#ASLCD52V-TC)
- \$779.99 for the 17 inch Capacitive Touch AccuSync LCD72V (#ASLCD72V-TC)

###
