**NEC DISPLAY SOLUTIONS ADDS LATEST LED-BACKLIT, COMMERCIAL-  
GRADE LCD TO V SERIES WITH THE V463 DISPLAY**

***LED-Backlight, Slimmer Cabinet Depth, and OPS-Compliant Expansion Slot  
Among Highlights***

**CHICAGO – March 13, 2013** – [NEC Display Solutions of America](#), a leading [provider](#) of commercial LCD display and projector solutions, announced today its latest addition to its commercial-grade V Series, the V463 display, powered by an LED-backlight, slimmer cabinet depth and an OPS-compliant expansion slot.

Delivering a 54 percent decrease in power consumption compared to its predecessor, the V463 large-screen display maintains its extraordinary brightness. Its edge-lit LED backlight enables a slimmer cabinet depth and lightweight design, providing flexibility for a variety of installations. With a full HD panel, integrated temperature sensors and fans, the V463 is ideal for applications that require extended use, including retail stores, restaurants, indoor venues, training facilities and corporate boardrooms.

The V463 also features built-in, 10-watt speakers and an Open Pluggable Specification (OPS) compliant expansion slot. This future-proofs the display and allows for the seamless integration of a computer or other NEC/third-party accessories. Moreover, video, RS-232 control and power are passed internally from the display to the computer, eliminating additional cabling and simplifying installations.

“Like the other LED backlit models in the V Series, the V463 delivers vivid imagery and makes an impression while offering a compelling total cost of ownership equation, too,”

said Rachel Karnani, Product Manager of Large-Screen Displays at NEC Display Solutions. "Organizations benefit from the economic and environmental benefits of the display, hallmarks of NEC's innovation."

The V463 includes the following features:

- LED backlighting technology for reduced power consumption
- Commercial-grade LCD panel and components, which enable extended run times
- 1920 x 1080 full HD native resolution, which provides stunning clarity
- 350/500 cd/m<sup>2</sup> brightness (typical/maximum) and 4000:1 contrast ratio for vivid imagery
- DisplayPort, HDMI, DVI-D (in/out), VGA 15 pin D-sub (Composite, Component, S-Video), which enable connectivity to a wide range of peripherals
- RS-232C, Ethernet (RJ45), IR Remote, DDC/CI for external control
- Built-in, 10-watt speakers enhance the experience with superior sound
- TileMatrix™, which facilitates video walls up to 10 x 10
- Built-in ATSC digital tuner, which allows for high-definition broadcast capabilities (V463-AVT model only)
- Bundled solution, which includes a V463 display and single board computer (OPS-PCAF-WS) for simple digital signage (V463-PC model only)
- Optional accessories, including speakers, stand, a variety of internal and external computers, digital tuner, calibration kit and wall mount

The V463 display is available at a minimum advertised price of \$1199. The V463-AVT and V463-PC models are priced at \$1399 and \$1949, respectively. All products ship with a three-year limited parts and labor warranty.
