About Conversion Cables Used with the AV Terminal ......81

NOTE: (1) The contents of this manual may not be reprinted in part or whole without permission.

- (2) The contents of this manual are subject to change without notice.
- (3) Great care has been taken in the preparation of this manual; however, should you notice any questionable points, errors or omissions, please contact us.
- (4) The image shown in this manual is indicative only. If there is inconsistency between the image and the actual product, the actual product shall govern.
- (5) Notwithstanding articles (3) and (4), we will not be responsible for any claims on loss of profit or other matters deemed to result from using this device.
- (6) This manual is commonly provided to all regions so they may contain descriptions that are pertinent for other countries.

### **Cable Information**

CAUTION: Use the provided specified cables with this product so as not to interfere with radio and television reception. For mini D-Sub 15-pin and USB, use shielded signal cables with ferrite core. For the HDMI and AV cables, use shielded signal cables. The use of other types of cables and adapters may cause reception problems.

### **FCC** Information

WARNING: The Federal Communications Commission does not allow any modifications or changes to the unit EXCEPT those specified by Sharp NEC Display Solutions of America, Inc. in this manual. Failure to comply with this government regulation could void your right to operate this equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Tel. No.:

Model.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult your dealer or an experienced radio/TV technician for help.

If necessary, the user should contact the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet, prepared by the Federal Communications Commission, helpful: "How to Identify and Resolve Radio-TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C., 20402, Stock No. 004-000-00345-4.

### SUPPLIER'S DECLARATION OF CONFORMITY

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions. (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

U.S. Responsible Party: Sharp NEC Display Solutions of America, Inc. Address: 3250 Lacev Rd. Ste 500 Downers Grove, IL 60515 (630) 467-3000 Type of Product: LCD Monitor Equipment Classification: Class B Peripheral E758, E868

- The intended primary use of this product is as an Information Technical Equipment in an office or domestic environment.
- The product is intended to be connected to a computer and is not intended for the display of television broadcast signals.

#### (For Customers in U.K.)

### IMPORTANT

• The wires in this mains lead are coloured in accordance with the following code:

| GREEN-AND-YELLOW: | "Earth"   |
|-------------------|-----------|
| BLUE:             | "Neutral" |
| BROWN:            | "Live"    |
|                   |           |

- As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
  - The wire which is coloured GREEN-AND-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol or coloured green or green-and-yellow.
  - The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured black.
  - The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured red.
- · Ensure that your equipment is connected correctly. If you are in any doubt consult a qualified electrician.

### "WARNING: THIS APPARATUS MUST BE EARTHED."

### **Safety Precautions and Maintenance**

### FOR OPTIMUM PERFORMANCE, PLEASE NOTE THE FOLLOWING WHEN SETTING UP AND USING THE LCD COLOR MONITOR:

### About the Symbols

To ensure safe and proper use of the product, this manual uses a number of symbols to prevent injury to you and others as well as damage to property. The symbols and their meanings are described below. Be sure to understand them thoroughly before reading this manual.

| <b>WARNING</b> Failing to heed this symbol and handling the product incorrectly could result in accide leading to major injury or death.      |  |
|---|--|
| <b>CAUTION</b> Failing to heed this symbol and handling the product incorrectly could result in persinjury or damage to surrounding property. |  |

### Examples of symbols

| <u>A</u> | Indicates a warning or caution.<br>This symbol indicates you should be careful of electric shocks.                    |
|----------|---|
|          | S Indicates a prohibited action.<br>This symbol indicates something that must be prohibited.                          |
|          | Indicates a mandatory action.<br>This symbol indicates that the power cord should be unplugged from the power outlet. |

|  | Unplug the power cord if the product malfunctions. |  |  |
|--|--|--|--|
| 1  | UNPLUG THE<br>POWER CORD                           | Should the product emit smoke or strange odors or sounds, or if the product has been dropped or the cabinet broken, turn off the product's power, then unplug the power cord from the power outlet. Contact your dealer for repairs. |  |
|  |  | Never try to repair the product on your own. Doing so is dangerous.  |  |
| Do not open or remove the product's cabinet. |  | Do not open or remove the product's cabinet.   |  |
|  | HAZARDOUS  | Do not disassemble the product.  |  |
| 2  |  | There are high voltage areas in the product. Opening or removing product covers and modifying the product may expose you to electric shock, fire, or other risks.  |  |
|  | DO NOT<br>DISASSEMBLE                              | Refer all servicing to qualified service personnel.  |  |
|  |  |  |  |
|  |  | Do not use the product if it has structural damage.  |  |
| 3  | PROHIBITED   | If you notice any structural damage such as cracks or unnatural wobbling, please refer servicing to qualified service personnel. If the product is used in this condition, the product may fall or cause personal injury.            |  |

|  | WARNING    |  |  |  |  |  |
|--|------------|--|--|--|--|--|
| Handle the power cord with care. Damaging the cord could lead to fire or ele |            |  |  |  |  |  |
|  | PROHIBITED | Do not place heavy objects on the cord.  |  |  |  |  |
|  |            | Do not place the cord under the product.   |  |  |  |  |
|  |            | Do not cover the cord with a rug, etc.   |  |  |  |  |
| 4  | REQUIRED   | Do not scratch or modify the cord.   |  |  |  |  |
|  |            | Do not bend, twist or pull the cord with excessive force.  |  |  |  |  |
|  |            | Do not apply heat to the cord.   |  |  |  |  |
|  |            | If the cord gets damaged (exposed core wires, broken wires, etc.), turn off the product's power, then unplug the power cord from the power outlet. Ask your dealer to replace it.  |  |  |  |  |
| 5  |            | Do not touch the power plug if you hear thunder. Doing so could result in electric shock.  |  |  |  |  |
|  | REQUIRED   | Please use the power cord provided with this product in accordance with the power cord table.  |  |  |  |  |
| 6  | REQUIRED   | If a power cord is not supplied with this product, please contact us. For all other cases, please use the power cord with the plug style that matches the power socket where the product is located. The compatible power cord corresponds to the AC voltage of the power outlet and has been approved by, and complies with, the safety standards in the country of purchase. |  |  |  |  |
|  |            | For proper installation it is strongly recommended to use a trained service person.  |  |  |  |  |
| 7  | REQUIRED   | Failure to follow the standard installation procedures could result in damage to the product or injury to the user or installer.   |  |  |  |  |
|  |            | Please install the product in accordance with the following information.   |  |  |  |  |
|  | REQUIRED   | This product cannot be used or installed without the table top stand or other mounting accessory for support.  |  |  |  |  |
|  | PROHIBITED | When transporting, moving, or installing the product, please use as many people as necessary to be able to lift the product without causing personal injury or damage to the product.  |  |  |  |  |
|  |            | We recommend four or more people.  |  |  |  |  |
|  |            | Four handles are required when transporting.   |  |  |  |  |
|  |            | Please refer to the instructions included with the optional mounting equipment for detailed information about attaching or removing.   |  |  |  |  |
| 8  |            | Do not cover the vent on the product. Improper installation of the product may result in damage to the product, an electric shock or fire.   |  |  |  |  |
|  |            | Do not install the product in the locations below:   |  |  |  |  |
|  |            | Poorly ventilated spaces.  |  |  |  |  |
|  |            | Near a radiator, other heat sources, or in direct sunshine.  |  |  |  |  |
|  |            | Continual vibration areas.   |  |  |  |  |
|  |            | Humid, dusty, steamy, or oily areas.   |  |  |  |  |
|  |            | Outdoors.  |  |  |  |  |
|  |            | High-temperature environment where humidity changes rapidly and condensation is likely to occur.   |  |  |  |  |
|  |            | <ul> <li>A ceiling or wall that is not strong enough to support the product and mounting<br/>accessories.</li> </ul>   |  |  |  |  |
|  |            | Do not mount the product upside down.  |  |  |  |  |

| WARNING |                        |  |  |  |
|---------|------------------------|--|--|--|
|         | PROHIBITED<br>REQUIRED | Prevent tipping and falling for<br>earthquakes or other shocks.<br>To prevent personal injury or damage<br>to the product caused by tipping over<br>due to earthquakes or other shocks,<br>make sure to install the product in a<br>stable location and take measures to<br>prevent falling.<br>The measures to prevent falling and<br>tipping are intended for reducing the<br>risk of injury, but may not guarantee<br>the effectiveness against all<br>earthquakes.   |  |  |
| 9       |                        | <ul> <li>The product may tip causing personal injury.</li> <li>When using the product with the optional table top stand, fasten the product to a wall using a cord or chain that can support the weight of the product in order to prevent the product from falling. Depending on the table top stand, the stand has the structure for preventing tipping. Please refer to the table top stand manual.</li> <li>Be sure to remove the cord or chain from the wall before moving the product to prevent personal injury or damage to the product.</li> <li>The product may fall causing personal injury.</li> <li>Do not attempt to hang the product using an installation safety wire.</li> <li>Please install the product in an area on the wall or ceiling strong enough to support the weight of the product.</li> <li>Prepare the product using mounting accessories, such as hook, eyebolt, or mounting parts, and then secure the product with a safety wire. The safety wire must not be tight.</li> </ul>  |  |  |
|         |                        | <ul> <li>Please make sure the mounting accessories are strong enough to support the product weight and size before installing it.</li> <li>Stability Hazard.</li> <li>The product may fall, causing serious personal injury or death. To prevent injury, this product must be securely attached to the floor/wall in accordance with the installation instructions.</li> <li>Many injuries, particularly to children, can be avoided by taking simple precautions such as:</li> <li>ALWAYS use stands or installation methods recommended by the manufacturer of the product set.</li> <li>ALWAYS use furniture that can safely support the product.</li> <li>ALWAYS ensure the product is not overhanging the edge of the supporting furniture.</li> <li>ALWAYS educate children about the dangers of climbing on furniture to reach the product or its controls.</li> <li>ALWAYS route cords and cables connected to your product so they cannot be tripped over, pulled or grabbed.</li> <li>NEVER place a product in an unstable location.</li> <li>NEVER place the product on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the product to a suitable support.</li> </ul> |  |  |

|  | $\bigotimes$  | NEVER place the product on cloth or other materials that may be located between the product and supporting furniture.   |  |  |  |
|--|---|---|--|--|--|
| 9  | PROHIBITED  | • NEVER place items that might tempt children to climb, such as toys and remote controls, on the top of the product or furniture on which the product is placed.  |  |  |  |
|  | REQUIRED  | If the existing product is going to be retained and relocated, the same considerations as above should be applied.  |  |  |  |
| 10   | 10 Do not place this product on a sloping or unstable cart, stand or table. Doing so could lead falling or tipping and cause personal injury. |   |  |  |  |
|  |   | Do not insert objects of any kind into the cabinet slots. It may cause electric shock, fire, or product failure. Keep objects away from children and babies.  |  |  |  |
| 11   | HAZARDOUS   | If objects get into the cabinet slot, turn off the product's power, then unplug the power cord from the power outlet. Contact your dealer for repairs.  |  |  |  |
|  |   | Do not spill any liquids into the cabinet or use your product near water.   |  |  |  |
| 12   | DO NOT WET  | Immediately turn off the power and unplug your product from the wall outlet, then refer servicing to qualified service personnel. It may cause an electric shock or start a fire.   |  |  |  |
| 13 Do not use flammable gas sprays to remove dust when cleaning the product. Doing lead to a fire. |   | Do not use flammable gas sprays to remove dust when cleaning the product. Doing so could lead to a fire.  |  |  |  |
| 14   | PROHIBITED  | Usage of the monitor must not be accompanied by fatal risks or dangers that, could lead directly to death, personal injury, severe physical damage or other loss, including nuclear reaction control in nuclear facility, medical life support system, and missile launch control in a weapon system. |  |  |  |

|   |                                | Handling the power cord.   |  |  |  |
|---|--------------------------------|--|--|--|--|
|   | REQUIRED                       | Handle the power cord with care. Damaging the cord could lead to fire or electric shock.   |  |  |  |
|   |                                | <ul> <li>When connecting the power cord to the product's AC IN terminal, make sure the connector<br/>is fully and firmly inserted.</li> </ul>  |  |  |  |
|   | DO NOT TOUCH<br>WITH WET HANDS | <ul> <li>Fasten the power cord to the product by attaching the screw and clamp to prevent loose<br/>connection. (Recommended Fasten Force: 120 - 190 N•cm).</li> </ul>   |  |  |  |
|   | UNPLUG THE<br>POWER CORD       | Do not connect or disconnect the power cord with wet hands.  |  |  |  |
|   |                                | <ul> <li>When connecting or disconnecting the power cord, pull the power cord out by holding onto<br/>its plug.</li> </ul>   |  |  |  |
| 1 | HAZARDOUS<br>VOLTAGE           | <ul> <li>When cleaning the product, for safety purposes, unplug the power cord from the power<br/>outlet beforehand. Regularly dust off the power cord by using a soft dry cloth.</li> </ul>   |  |  |  |
|   | VOLIAGE                        | <ul> <li>Before moving the product, make sure the product power is off, then unplug the power<br/>cord from the power outlet and check that all cables connecting the product to other<br/>devices are disconnected.</li> </ul>  |  |  |  |
|   |                                | <ul> <li>When you are not planning to use the product for an extended period of time, always<br/>unplug the power cord from the power outlet.</li> </ul>   |  |  |  |
|   |                                | • This equipment is designed to be used in the condition of the power cord connected to the earth. If the power cord is not connected to the earth, it may cause electric shock. Please make sure the power cord is connected to the wall outlet directly and earthed properly. Do not use a 2-pin plug converter adapter. |  |  |  |
| 2 |                                | Do not bind the power cord and the USB cable. It may trap heat and cause a fire.   |  |  |  |
|   |                                | Do not connect to a LAN with excessive voltage.  |  |  |  |
| 3 | PROHIBITED                     | When using a LAN cable, do not connect to a peripheral device with wiring that might have excessive voltage. Excessive voltage on the LAN port may cause an electric shock.  |  |  |  |
| 4 | PROHIBITED                     | Do not climb on the table where the product is installed. Do not install the product on a wheeled table if the wheels on the table have not been properly locked. The product may fall, causing damage to the product or personal injury.  |  |  |  |
|   |                                | Installation, removal, and height adjustment of the optional table top stand.  |  |  |  |
| 5 | REQUIRED                       | When installing the table top stand, handle the unit with care to avoid pinching your fingers.   |  |  |  |
|   |                                | <ul> <li>Installing the product at the wrong height can cause tipping.<br/>Please install your product at proper height to prevent personal injury or damage to the<br/>product.</li> </ul>  |  |  |  |
| 6 | $\bigcirc$                     | Do not push or climb on the product. Do not grab or hang onto the product.   |  |  |  |
| 6 | PROHIBITED                     | The product may fall, causing damage to the product or personal injury.  |  |  |  |
| 7 |                                | Do not impact the LCD panel surface, it can cause serious damage to the product or personal injury.  |  |  |  |

|    | 0        | Incorrect usage of batteries can result in leaks or bursting.   |  |  |  |
|----|----------|---|--|--|--|
|    | REQUIRED | • Insert batteries matching the (+) and (-) signs on each battery to the (+) and (-) signs of the battery compartment.  |  |  |  |
|    |          | Do not mix battery brands.  |  |  |  |
|    |          | Do not combine new and old batteries. This can shorten battery life or cause liquid leakage of batteries.   |  |  |  |
| 8  |          | Remove dead batteries immediately to prevent battery acid from leaking into the battery compartment.  |  |  |  |
|    |          | Do not touch exposed battery acid, it may injure your skin.   |  |  |  |
|    |          | Disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, can result in an explosion.  |  |  |  |
|    |          | <ul> <li>Leaving a battery in an extremely high temperature surrounding environment, or a<br/>battery subject to extremely low air pressure, can result in an explosion or the leakage of<br/>flammable liquid or gas.</li> </ul>     |  |  |  |
|    |          | Contact your dealer or local authorities when disposing of batteries.   |  |  |  |
| 9  | REQUIRED | Suitable for entertainment purposes at controlled luminous environments, to avoid disturbing reflections from the screen.   |  |  |  |
| 10 | REQUIRED | We recommend wiping clean the ventilation holes a minimum of once a month. Failure to do so could lead to fire or electric shock or damage to the product.  |  |  |  |
| 11 | REQUIRED | To ensure the product's reliability, please clean the ventilation holes at the rear side of the cabinet at least once a year to remove dirt and dust. Failure to do so could lead to fire or electric shock or damage to the product. |  |  |  |
|    | REQUIRED | Avoid locations with extreme temperatures and humidity. Failure to do so could damage to the product or lead to electric shock or fire. The usage environment for this monitor is as follows.   |  |  |  |
| 12 |          | <ul> <li>The operating temperature: 0 °C to 40 °C/32 °F to 104 °F/<br/>humidity: 20 to 80% (without condensation)</li> </ul>  |  |  |  |
|    |          | The storage temperature: -20 °C to 60 °C/-4 °F to 140 °F/<br>humidity: 10 to 90% (without condensation)   |  |  |  |

Please use the power cord provided with this display in accordance with the table below. If a power cord is not supplied with this equipment, please contact your supplier. For all other cases, please use a power cord that matches the AC voltage of the power outlet and has been approved by and complies with the safety standard of your particular country.

| Plug Type   | North America | European Continental | U.K. | Japanese |
|-------------|---------------|----------------------|------|----------|
| Plug Shape  |               |                      | SOU  |          |
| Region      | U.S.A./Canada | EU (except U.K.)     | U.K. | Japan    |
| Voltage (V) | 120*          | 230                  | 230  | 100      |

\* Please use this power cord under 125 V power supply.

NOTE: This product can only be serviced in the country where it was purchased.

This display operates on 100-240 volts 50-60 Hz, AC current. Insert the power cord into a 100-240 volts 50-60 Hz outlet. The mains plug is used as the disconnect device and shall remain readily operable.

# **Recommended Use & Maintenance**

### **Recommended Use**

### Ergonomics

To realize the maximum ergonomic benefits, we recommend the following:

- For optimum performance of the monitor, allow 20 minutes for warming up. Avoid reproduction of still patterns on the monitor for long periods of time to avoid image persistence (after image effects).
- · Rest your eyes periodically by focusing on an object at least 5 feet away. Blink often.
- Position the monitor at a 90° angle to windows and other light sources to minimize glare and reflections.
- · Adjust the monitor's brightness, contrast and sharpness controls to enhance readability.
- · Get regular eye checkups.
- Use the preset Size and Position controls with standard input signals.
- Use the preset color settings.
- · Use non-interlaced signals.
- Do not view the primary color blue on a dark background. It is difficult to see and may cause eye fatigue due to insufficient contrast.

### Maintenance

### Cleaning the LCD Screen

- When the LCD screen is dusty, please gently wipe with a soft cloth.
- · Clean the LCD screen surface with a lint-free, non-abrasive cloth. Avoid using any cleaning solution or glass cleaner!
- Please do not rub the LCD screen with a hard or abrasive material.
- · Please do not apply pressure to the LCD screen surface.
- · Please do not use OA cleaner as it will cause deterioration or discoloration on the LCD screen surface.

### **Cleaning the Cabinet**

- Unplug the power supply.
- Gently wipe the cabinet with a soft cloth.
- To clean the cabinet, dampen the cloth with a neutral detergent and water, wipe the cabinet and follow with a dry cloth.
- **NOTE:** DO NOT clean with benzene thinner, alkaline detergent, alcoholic system detergent, glass cleaner, wax, polish cleaner, soap powder, or insecticide. Rubber or vinyl should not be in contact with the cabinet for an extended period of time. These types of fluids and materials can cause the paint to deteriorate, crack or peel.
- NOTE: Continuous operating time and warranty.

This product is designed for a maximum daily use of 18 hours. Continual use in excess of 18 hours per day is not covered by the warranty.

# Chapter 1 Installation

### This Chapter Includes:

- ⇒ "Setup Overview" on page 11
- ⇒ "Mounting (for Customer)" on page 14
- ⇒ "Prevent Tipping" on page 14
- ⇒ "Changing the Logo Ornament Position" on page 14
- ⇒ "Mounting (for Trained Installers)" on page 15
- ⇒ "Mounting Location" on page 16
- ⇒ "Orientation" on page 17
- ⇒ "Ventilation Requirements" on page 19
- ⇒ "Mounting on Ceilings" on page 19
- ⇒ "Attaching Mounting Accessories" on page 20
- ⇒ "Installing and Removing the Optional Table Top Stand" on page 21

### NOTE:

For box contents, please refer to the Setup Manual.

Product warranty does not cover damage caused by improper installation. Failure to follow these recommendations could result in voiding the warranty.

# **Setup Overview**

### 1. Determine the installation location

A WARNING: Please refer to "WARNING 7", "WARNING 8", "WARNING 9", and "WARNING 12".

**NOTE:** To avoid scratching the LCD panel, always place a soft cloth, such as a blanket that is larger than the monitor's screen area, on the table before laying the monitor face down when installing the monitor stand or mounting accessories.

### 2. Install the remote control batteries

The remote control is powered by two 1.5 V AAA batteries. To install or replace batteries:

▲ CAUTION: Please refer to "CAUTION 8".

- **NOTE:** The batteries supplied with the remote control may become empty quickly depending on their condition. Therefore, replace them with new batteries early.
  - If you do not intend to use the remote control for a long period of time, remove the batteries.

### 3. Connect external equipment

- To protect the external equipment, turn off the main power before making connections.
- Refer to the user's manual of your equipment for further information.
- **NOTE:** Do not connect/disconnect cables when turning on the monitor or other external equipment as this may result in loss of image.

### 4. Connect the supplied power cord

### 5. Cable information

**CAUTION:** Use the provided specified cables with this product so as not to interfere with radio and television reception. For mini D-Sub 15-pin and USB, use shielded signal cables with ferrite core. For the HDMI and AV cables, use shielded signal cables. The use of other types of cables and adapters may cause reception problems.

### 6. Turn the power button on

Switch on the monitor power before turning the computer or external equipment on.

### 7. Operate the connected external equipment

Select the input source for the monitor to display the video from the external equipment on the screen.

### 8. Adjust the sound

Make volume adjustments when required.

### 9. Adjust the picture settings

When using an HDMI input terminal, select the appropriate setting between [Mode 0], [Mode 1], and [Mode 2] in [EDID] under [HDMI Settings] in the [Setup] OSD menu.

### 10. Recommended adjustments

The backlight used for this monitor has a limited life and its brightness decreases with the usage time.

Also, if the same still image is shown for a long time, "Image Persistence" may occur. "Image Persistence" is a phenomenon in which the image of an LCD remains visible after the image has changed.

The "Image Persistence" is gradually eliminated by changing the screen, but if the same screen is shown for too long, the "Image Persistence" will not disappear.

To avoid shortening the monitor's lifetime, consider the following:

- Turn off the monitor's main power switch when not in use.
- Use the 0 button on the main unit or the 0 button on the remote control to put the monitor in standby mode.
- If using a cover made of glass or acrylic to protect the panel surface of the main unit, the panel is sealed and the internal temperature rises.

Reduce the monitor's brightness to prevent the internal temperature from rising. If the monitor is connected to a computer, use the computer's power management function to control the monitor's automatic power off.

• Use [Schedule] in the OSD menu to automatically control the monitor's on and standby power states as required.

NOTE: When using the schedule function, set [Current Time settings] in the [Schedule] OSD menu.

# **Mounting (for Customer)**

**WARNING:** Please refer to "WARNING 7", "WARNING 8", "WARNING 9", and "WARNING 12".

Contact your supplier as they may be able to provide a list of qualified installation professionals. Mounting the product on a wall or ceiling and hiring a technician are the customer's responsibility.

### Maintenance

- Periodically check for loose screws, gaps, distortions, or other problems that may occur with the mounting equipment. If a problem is detected, refer to the qualified personnel or the supplier for service.
- Depending on the environment, the mounting location may weaken due to natural degradation. Regularly ask the qualified personnel to inspect the mounting location and carry out maintenance.

## **Prevent Tipping**

A WARNING: Please refer to "WARNING 7" and "WARNING 9". Before attaching the monitor to the wall, make sure that the wall can support the weight of the monitor.

## **Changing the Logo Ornament Position**

When using the monitor in the portrait position, the logo ornament position can be changed.

Removing the logo ornament: Unscrew the installed screw then take off the logo ornament.

Attaching the logo ornament: Make sure the holes for the screws on the logo ornament and the holes for the screws on the bezel are aligned. Install the logo ornament with the screws, which are used for installing the logo ornament. (Recommended Fasten Force: 30-40 N•cm).

NOTE: Do not use any other screw to install the logo ornament.

# **Mounting (for Trained Installers)**

### MARNING: Please refer to "WARNING 9".

Carefully inspect the location where the unit is to be mounted. Not all walls or ceilings are capable of supporting the weight of the monitor.

The weight of this monitor is provided in the specifications (see "E758" on page 65, "E868" on page 66).

The product warranty does not cover damage caused by improper installation, re-modeling, or natural disasters.

Failure to comply with these recommendations could result in voiding the warranty.

To ensure safe installation, use two or more brackets to mount the unit. Mount the unit to at least two points on the installation location.

### Mounting bracket

**WARNING:** Please refer to the "Important Information" section.

Please note the following when mounting on a wall or ceiling:

- We recommend mounting interfaces that comply with UL1678 standard in North America.
- Prior to mounting, inspect the installation location to ensure that it is strong enough to support the weight of the unit so that the unit will be safe from harm.
- For detailed information, refer to the instructions included with the mounting equipment.

We strongly recommend using the screws as shown below.

If using screws longer than below mentioned, check the depth of the hole.

| Screw Size |          | Bracket Hole | No Thread | Recommended Fasten Force |  |
|------------|----------|--------------|-----------|--------------------------|--|
| (A)        | (B)      | (C)          | (D)       | Recommended Fasten Force |  |
| M8 (4 pcs) | 16-18 mm | ≤Ø 12 mm     | 6 mm      | 950-1600 N•cm            |  |

**NOTE:** When used in a video wall configuration for a long time, a slight expansion of the monitors may happen due to temperature changes. It is recommended that a gap of over one millimeter is kept between adjacent monitor edges.

### Installing a safety wire

When installing the monitor to a wall or a ceiling, use commercially-available wall or ceiling mounting brackets, but also a safety wire.

MARNING: Please refer to "WARNING 9".

**CAUTION:** Please refer to "CAUTION 7".

**NOTE:** When installing, do not apply pressure to the LCD panel or excessive force to any part of the monitor by pushing or leaning on it. This may cause the monitor to become distorted or damaged.

### Possible locations for the handles used to attach the safety wire

Attach the safety wire to the handles shown in the figure below.

**Solid line:** Handle for safety wire in landscape position. **Dotted line:** Handle for safety wire in portrait position.

### **Mounting Location**

- MARNING: Please refer to "WARNING 8".
- **NOTE:** Allow for adequate ventilation or provide air conditioning around the monitor, so that heat can properly dissipate away from the monitor and from the mounting equipment.

## Orientation

• When using the monitor in the portrait position, it should be rotated counterclockwise so that the right side is moved to the top and the left side is moved to the bottom. Improper ventilation may shorten the lifetime of the monitor.

Power Indicator

**NOTE:** The OSD menu is always shown in the landscape orientation.

**WARNING:** Please refer to "WARNING 8".

The monitor cannot be used when inclined  $15^\circ$  or more.

**WARNING:** Installing the monitor at an angle of  $15^{\circ}$  or more may cause a malfunction.

## **Ventilation Requirements**

When mounting the monitor in an enclosed space or recessed area, leave adequate room between the monitor and the enclosure to allow heat to disperse, as shown below.

- **NOTE:** The maximum environmental operating temperature of the monitor is 40°C. This monitor has internal temperature sensors.
- NOTE: If the monitor overheats, a "Warning" appears. If a "Warning" appears, stop using the monitor, turn off the power and allow it to cool.
   For more information on this function, see "Thermal Management" (page 74).
   If the monitor is used in an enclosed area or if the LCD panel is covered with an acrylic protective sheet, check the temperature around the monitor.

## **Mounting on Ceilings**

**WARNING:** Please refer to "WARNING 8" and "WARNING 9".

## **Attaching Mounting Accessories**

Be careful to avoid tipping the monitor when attaching accessories.

### 1. Attach eyebolts for mounting

This model is equipped with pre-installed eyebolt brackets for attaching eyebolts (not included) to aid in mounting.

- · Screw the eyebolts into eyebolt holes in eyebolt brackets as shown in the picture.
- · Be sure the eyebolts are secure.
- · In order to move the monitor into position, use a lifting device attached to the eyebolts.
- **CAUTION:** DO NOT mount the monitor using only the eyebolts. Eyebolts are for temporary use only.

### 2. Attach Mounting Accessories

Be careful to avoid tipping the monitor when attaching accessories.

Mounting accessories can be attached with the monitor in the face down position. To avoid scratching the LCD panel, always place a soft cloth, such as a blanket that is larger than the monitor's screen area, on the table before laying the monitor face down. Make sure there is nothing on the table that can damage the monitor.

**NOTE:** Prior to installation, place the monitor face down on a flat even surface that is larger than the monitor screen. Use a sturdy table that can easily support the weight of the monitor.

## Installing and Removing the Optional Table Top Stand

- MARNING: Please refer to "WARNING 8".
- **CAUTION:** Please refer to "CAUTION 5".

For installation, follow the instructions included with the stand or mounting equipment. Use only those devices recommended by the manufacturer.

NOTE: • Use the ST-801.

- ONLY use screws which are included with the optional table top stand. Install the stand so the long end of the feet face forward.
- The monitor can only be used in the landscape orientation with the tabletop stand.

# Chapter 2 Parts Names and Functions

### This Chapter Includes:

- ⇒ "Control Panel" on page 23
- ⇒ "Terminal Panel" on page 24
- ⇒ "Wireless Remote Control" on page 26

# **Control Panel**

### • U Button (power button)

Switches between power on and standby. See page 35.

### **2** MENU/EXIT Button

Opens the OSD menu when the OSD menu is closed.

Acts as a back button within the OSD menu to move to the previous OSD menu.

Acts as an exit button to close the OSD menu when on the main menu.

### **3** Multi-direction Key/Central Button<sup>\*1</sup>

 $\triangleleft$ / $\triangleright$ : Left/Right control.

- Navigates to the left or right through the OSD Control menus.
- Increases or decreases adjustments for individual OSD settings.
- Directly adjusts the VOLUME when the OSD menu is closed.

 $\nabla / \triangle$ : Up/Down control.

• Navigates up or down through the OSD Control menus. OSD Control menus.

### Central: (button press)

- Selects, or sets the setting for, the highlighted function in the OSD menu.
- \*1: The  $\lhd, \, \rhd, \, \bigtriangleup$  and  $\bigtriangledown$  functions change according to the monitor orientation (landscape/portrait).

### **4** INPUT Button

INPUT: Cycles through the available inputs when the OSD menu is closed.

[HDMI1], [HDMI2], [HDMI3], [VGA(RGB)]/[VGA(YPbPr)], [AV], [Media Player]. Input names are shown as their factory preset name.

### **6** Security Slot

Security and theft protection lock slot compatible with Kensington security cables/equipment.

NOTE: For products, visit Kensington's website.

### **6** Power Indicator

- Normal operation (On mode): Lit blue<sup>\*2</sup>
- Auto power save mode: Blinking red
- · Auto standby mode: Lit red
- Turn off the monitor by the remote control: Glowing red
- \*2: If [Off] is selected under the [LED indicator] in the [Other settings] of the [Setup] menu, the LED will not glow when the monitor is in active mode. See page 74.

### Remote Control Sensor

Receives the signal from the remote control (when using the wireless remote control). See page 36.

### Ambient light sensor

Detects the level of ambient light, allowing the monitor to make automatic adjustments to the backlight setting, resulting in a more comfortable viewing experience. Do not cover this sensor. See page 71.

# **Terminal Panel**

### AC IN Connector

Connects with the supplied power cord.

### **2** Main Power Switch

On/Off switch to turn main power ON/OFF.

### **3** LAN port (RJ-45)

Use the HTTP server function and a Web browser on a computer to manage the LAN settings of the monitor.

**NOTE:** The LAN port of the monitor is not intended to be connected directly to a public network (including via routers rented by an Internet service provider). This is the reason why connecting the wired LAN port directly to a public network is forbidden according to the Telecommunications Business Act.

### A RS-232C input terminal (D-sub)

For connection to a computer. Receives control commands from the computer.

### **G** USB Type-C port (power supply 5 V/ 3 A)

Check the shape of the connectors when connecting a USB cable. When supplying power via the USB Type-C<sup> $\odot$ </sup> port, use a USB cable supporting 3 A.

Do not tie the USB cable. Otherwise, it may cause overheating or fire.

### **6** HEADPHONE terminal (stereo mini jack)

Outputs the selected audio signal.

### **7** Digital audio output terminal

For connection to an audio device equipped with a digital audio input terminal.

### 8 AV input terminal

For connection to a video output terminal (composite) of a video player or other devices.

### HDMI input terminals (HDMI1 (ARC)/HDMI2/HDMI3)

For connection to devices with digital video interface complying with the HDMI standard. HDMI1 terminal also supports ARC (Audio Return Channel) for audio output. Connect an HDMI cable supporting ARC to this terminal.

Connect audio devices supporting ARC to the HDMI1 (ARC) terminal.

**NOTE:** ARC sends the monitor's sound to the audio equipment from the HDMI1 ARC terminal. Use the included ARC-supported HDMI cable. The audio equipment supporting ARC, such as AV amplifiers, will output the monitor's audio. The volume and other functions of the audio equipment can be controlled with the included remote control.

### **1** VGA input terminal

For connection to the video output terminal (analog) of a computer.

When connecting the monitor to the video output terminal (component) of a video player or another device, go to [Setup] in the OSD menu -> [VGA Options] -> [VGA Mode], and select [YPbPr].

### Audio input terminal (stereo mini jack)

For connection to the audio output terminal of a computer or another device.

### USB Type-A port

Can be used to display photos (still images) and play video and music files stored in a USB storage device.

Check the shape of the connectors when connecting a USB storage device or USB cable.

- Handle
- Label

## **Wireless Remote Control**

### **1** POWER Button

Switches between power on and off (standby).

**NOTE:** To completely turn the power off, disconnect the power plug from the outlet.

### **2** SOURCE Button

Cycles through the available inputs.

The input names are shown as their factory preset name.

### **3** MUTE Button

Silences the audio signal. Press the button again to restore the previous volume.

### 4 Keypad

Press the buttons to enter numerical values, such as the passwords.

**5 D** Button Not used with this monitor.

**O DASH Button** Not used with this monitor.

### SOUND Button

Selects the sound mode.

Available sound modes are [Standard], [Music], [Movie], and [Custom].

### PICTURE Button

Selects the picture mode.

Available picture modes are [Dynamic], [Standard], [Energy Savings], [Conferencing], [HighBright], [Custom], and [HDR Video].

### $( \mathbf{9} \mathbf{A}, \mathbf{\nabla}, \mathbf{\triangleleft}, \mathbf{\blacktriangleright}, \mathbf{OK}$ (cursor buttons)

Used to navigate inside and select the menus.

VOL- Button (volume minus button) VOL+ Button (volume plus button)

Increases or decreases the audio output level.

### MENU Button

Opens and closes the OSD menu.

**()** EXIT Button Closes the OSD menu.

CH- Button CH+ Button Not used with this monitor.

**EPG Button** Not used with this monitor.

**(b)** INFO Button Shows/Hides the information OSD.

**(b)** FREEZE Button (still image button) Turns the still image function on/off.

**MTS Button** Not used with this monitor.

CH.LIST Button
 Not used with this monitor.

FAV Button
 Not used with this monitor.

 ASPECT Button
 Selects the aspect ratio of the image between [Normal], [1:1], [Full], and [Zoom].

CC Button
Press to activate the Closed Caption.

PLAY, PAUSE, STOP, ROTATE,
 I ← , → → , ← , → → (navigation buttons)

Used to operate the media player functions and the HDMI CEC function.

# Chapter 3 Connections

### **This Chapter Includes:**

- ⇒ "Wiring Diagram" on page 28
- ⇒ "Headphones Connection" on page 28
- ⇒ "Connecting to a Personal Computer" on page 29
- ⇒ "Connecting to a Media Device with HDMI" on page 30
- ⇒ "HDMI-CEC Command" on page 31
- ⇒ "Internal Video Sources" on page 32
- ⇒ "Media Player" on page 32
- ⇒ "Connecting a USB Device" on page 32

### **Connecting External Equipment**

- **NOTE:** Do not connect or disconnect cables when turning on the monitor's main power or other external equipment's power as this may result in loss of image.
  - Do not use an attenuating (built-in resistor) audio cable. Using an audio cable with a built-in resistor will lower the sound level.

### Before making connections:

- Turn off the device's power before connecting it to the monitor.
- Refer to the device's user manual for available connection types and instructions for the device.
- We recommend turning off the monitor's main power before connecting or disconnecting a USB storage device to avoid data corruption.

# Wiring Diagram

# **Headphones Connection**

When using headphones, connect them to the HEADPHONE terminal of the monitor.

- A CAUTION: Do not connect the headphones while wearing them. Otherwise, your ears may be injured depending on the sound volume.
- **NOTE:** Headphones with a stereo mini jack plug can be connected to the monitor. If the plug of your headphones is too large to enter the connector, buy a 6.35 mm stereo jack plug to stereo mini jack plug adapter in your audio store.
  - The sound from the speakers is muted when headphones are connected.
  - Adjustment of the volume control as well as the equalizer to other settings than the center position may increase the ear-/headphones output voltage and therefore the sound pressure level.

### **Connecting to a Computer with HDMI**

The monitor can be connected to and used with video players and computers equipped with an HDMI output. For more information, refer to the user's manual of the player or the other devices.

- Use an HDMI cable with the HDMI logo.
- It may take a moment for the signal to appear after turning on the device outputting the HDMI signal.
- · Depending on the video card or driver used, the image may not be shown correctly.
- When you use a computer with HDMI, go to the OSD menu [Video] -> [Advanced Video] and set [Overscan] to [Auto] or [Off].
- If the monitor's main power is turned on after the connected computer has been turned on, the image may not be displayed. In this case, turn off the computer then turn it on again.
- If the source signal is 4K (50 Hz/60 Hz), HDCP 2.2 or HDR, got to the OSD menu [Setup] -> [HDMI Settings] -> [EDID] and set [Mode 2].
- When inputting a 4K signal, use a high-speed or premium high-speed HDMI cable.

# **Connecting to a Media Device with HDMI**

The monitor can be connected using a single HDMI cable to Blu-ray players, streaming media players, or game consoles for the highest picture and audio quality. 4K UHD content is shown when the connected media player also supports 4K content. Supports HDCP (High-bandwidth Digital Contents Protection) coding, a type of digital rights management that prevents high-

definition content, in Blu-ray discs, DVDs and streaming media, from being copied or broadcast illegally.

- **NOTE:** Connect the HDMI cable when both the media player and the monitor are powered off.
  - · Use an HDMI cable with the HDMI logo.
  - · Some HDMI cables and devices may not show the image correctly due to different HDMI specifications.
  - With the implementation of HDCP, there may be cases in which certain content is protected by HDCP and might not be displayed. This is not a malfunction.

### **Connecting to Audio Equipment with ARC Function**

When audio equipment with the ARC function is connected to the HDMI1 (ARC) terminal of the monitor using the included ARC-supported HDMI cable, the speakers connected to the audio equipment outputs the monitor's sound.

- The sound output via HDMI1 (ARC) is not adjustable with the OSD menu.
- When the ARC function is activated, the monitor's internal speakers are muted.

### HDMI-CEC (Consumer Electronics Control)

HDMI-CEC provides compatible video devices connected via HDMI with the ability to communicate and allows limited control between the device and the monitor. For example, turning on a Blu-ray player can immediately switch input to the Blu-ray player without using the remote control. Not all devices are fully compatible, and, in some cases, the media device manufacturer may only provide compatibility with its own monitors or TVs. See "HDMI-CEC Command" (page 31).

When supported, the monitor's remote control can be used to control the video device.

### **Enabling CEC**

- 1. Connect an HDMI-CEC compatible device to the HDMI terminal. Press the HDMI button of the remote control.
- 2. Press the MENU button to open the OSD menu.
- 3. In the OSD menu, go to [Setup] -> [HDMI Settings] -> and select [On] in [CEC].
- 4. In the OSD menu, go to [Setup] -> [HDMI Settings] -> [Device list] and press the OK button of the remote control. When the device search is complete, connected devices are shown by their names.
- In the OSD menu, select [Yes] under [Search device].
   When the device search is complete, the HDMI terminals to which a device is connected are shown with the device name.

If no HDMI-CEC compatible device is found, make sure the device is connected, turned on, that it supports CEC, and that CEC is enabled. Depending on the manufacturer, the CEC feature may have a different name. Refer to the device's user manual.

6. Press the EXIT button of the remote control.

## **HDMI-CEC Command**

Connect an HDMI-CEC compatible device to the HDMI terminal.

| OSD menu                                    | HDMI-CEC<br>command name       | Explanation   | Setting  |  |
|---|--------------------------------|---|--|--|
| CEC<br>(Consumer<br>Electronics<br>Control) | One Touch Play                 | When an HDMI-CEC compatible device<br>is turned on, the monitor connected<br>to the device with an HDMI cable also<br>automatically turns on.<br>After the monitor powers on, Input<br>terminal automatically switches.<br>If the monitor is already turned on when<br>the HDMI-CEC compatible device is<br>turned on, it only changes the Input<br>terminal.   | HDM1<br>Setup<br>CEC<br>Audio Receiver<br>Device list<br>In the OSD menu, go to [Setup] -> [HDMI<br>Settings] -> and select [On] in [CEC]. |  |
|   | Remote Control Pass<br>Through | The monitor's remote control button<br>operation can function with HDMI-CEC<br>compatible devices connected with an<br>HDMI cable.<br>For example, part of the HDMI-CEC<br>compatible device menu can be operated<br>using the remote control.  |  |  |
|   | Power Status                   | The connected HDMI-CEC compatible devices can obtain the monitor's power status, such as if the monitor is in standby mode or on.   |  |  |
|   | System Information             | This function obtains information from a connected HDMI-CEC compatible device (CEC version, physical address, etc.).  |  |  |
| Auto Turn Off                               | System Standby                 | If the monitor is set to standby using the<br>remote control, the HDMI-CEC compatible<br>device connected with an HDMI cable<br>also goes into standby at the same time.<br>If the monitor goes into standby while<br>an HDMI-CEC compatible device is<br>recording, the device remains on.<br>Refer to the user's manual supplied with<br>the HDMI-CEC compatible device for<br>further information. | In the OSD menu, go to [Setup] -> [HDMI<br>Settings] -> [CEC] and select [Enable] in<br>[Auto Turn Off].                                   |  |
| Audio<br>Receiver                           | System Audio<br>Control        | Connect audio equipment with the ARC<br>function to the HDMI1 (ARC) terminal<br>using the included ARC-supported HDMI<br>cable. |   | Routing Control                | By selecting a device name, the HDMI-<br>CEC compatible device input switches to<br>the input you selected. After selecting the<br>device, the remote control operates for<br>the selected device.  | and press the OK button of the remote control.   |  |

**NOTE:** Depending on the connected device, sometimes the device does not work properly.

## **Internal Video Sources**

### **Media Player**

The internal Media Player will play audio and video files that are stored on a USB storage device. See page page 41 for instructions on using the Media Player.

### **Compatible USB Storage Devices**

If the USB storage device connected to the monitor is not recognized, check its format. The USB storage device used with the Media Player should be in the FAT32 or FAT16 format. For more information on how to format a storage device, see the manual or the help section of your Windows<sup>®</sup> computer.

Connect the USB storage device to the USB Type-A port of the monitor.

- NOTE: The monitor is not guaranteed to work with all USB storage devices sold commercially.
  - · Check that the USB storage device is connected to the USB Type-A port of the monitor.

## **Connecting a USB Device**

Connect a USB storage device to the USB Type-A of the monitor as shown in the figure below to display images and videos using the Media Player function.

▲ CAUTION: Please refer to "CAUTION 2".

- NOTE: Check the connector shape and orientation when connecting the USB device or cable.
  - Do not connect a USB storage device to the monitor when the monitor is turned on. To prevent damage to the monitor and possible corruption of the connected device's data files, the monitor's main power switch should be off before making connections.

# Chapter 4 Basic Operation

### This Chapter Includes:

- ⇒ "Power On and Off Modes" on page 34
- ⇒ "Operating Range for the Remote Control" on page 36
- ⇒ "Showing the Information OSD" on page 37
- ⇒ "Switching Between Sound Modes" on page 37
- ⇒ "Switching Between Picture Modes" on page 37
- ⇒ "Setting the Aspect Ratio" on page 38
- ⇒ "OSD (On-Screen Display) Controls" on page 39
- ⇒ "Using the Media Player Menu" on page 41
- ⇒ "Using the Media Player Menu" on page 41

### **Power On and Off Modes**

#### Power indicator status

The monitor operates as follows in On mode when no signal is input from an external device.

| Mode            | Normal operation | Auto power save mode | Auto standby mode    |
|-----------------|------------------|----------------------|----------------------|
|                 | (On mode)        | (energy-saving mode) | (energy-saving mode) |
| Power indicator | Lit blue         | Blinking red         | Lit red              |

### **Energy Mode**

The three following modes are available on the monitor.

LAN and RS-232C can be selected for the monitor control. The way the energy modes operate varies depending on the selected control method.

#### When [RS-232C] is selected for control, [Power supply] and [Quick Start] are set to [Off]

#### Home/Office mode

- When no signal is input, "No signal" is displayed and the monitor enters the auto standby mode after a while.
- When a signal is input into the selected input terminal, the On mode is resumed.
   When the AV terminal and VGA (YPbPr) terminal are selected, the On mode is not resumed even if a signal is input. In this case, enable the Quick Start function. (With this function enabled, the On mode is resumed.)

#### **Retail mode**

- The monitor does not enter the energy-saving mode when no signal is input. (The On mode is maintained.)
- **NOTE:** If the monitor power is turned off while the monitor is in auto standby mode, it will still be in auto-standby mode when it is turned on again.

### When [LAN] is selected for control, [Power supply] and [Quick Start] are set to [Off]

### Home mode

- When no signal is input, "No signal" is displayed and the monitor enters the auto power save mode after a while.
- During auto power save mode, the monitor enters the auto standby mode if no LAN signal is received for 3 minutes. If a LAN signal is input during auto standby mode, the auto power save mode is not resumed. To maintain the auto power save mode, use the Office mode.
- When a signal is input into the selected input terminal, the On mode is resumed. When the AV terminal and VGA (YPbPr) terminal are selected, the On mode is not resumed even if a signal is input. In this case, enable the Quick Start function. (With this function enabled, the On mode is resumed.)

#### Retail mode

• The monitor does not enter the energy-saving mode when no signal is input. (The On mode is maintained.)

#### Office mode

- When no signal is input, "No signal" is displayed and the monitor enters the auto power save mode after a while. The auto power save mode is maintained regardless of LAN signal input.
- When a signal is input into the selected input terminal, the On mode is resumed.
   When the AV terminal and VGA (YPbPr) terminal are selected, the On mode is not resumed even if a signal is input. In this case, enable the Quick Start function. (With this function enabled, the On mode is resumed.)
- **NOTE:** If the monitor power is turned off during auto power save mode or auto standby mode, the power-on mode will not resume automatically when a signal is detected.

The Main Power switch must be in the ON position in order to power up the monitor using the POWER ON button on the remote control or the 0 button on the Control Panel.

### **Operating Range for the Remote Control**

Point the top of the remote control toward the monitor's remote control sensor during button operation.

Use the remote control within a distance of about 7 m (23 ft.) from the remote control sensor, or within a horizontal and vertical angle of 30° and within a distance of about 3.5 m (10 ft.).

**NOTE:** The remote control system may not function when direct sunlight or strong illumination strikes the remote control sensor, or near fluorescent lamps.

### Handling the remote control

- Do not expose to strong shock.
- Do not allow water or other liquid to splash on the remote control. If the remote control gets wet, wipe it dry immediately.
- · Avoid exposure to heat and steam.
- Ask your supplier or your municipality for information on how to dispose of the batteries.
- · Do not open the remote control, except to install the batteries.

### Showing the Information OSD

The Information OSD provides information such as the selected video input terminal, resolution, and IP address. Press the INFO button of the remote control to bring up the information OSD.

NOTE: When the input signal is [Media Player], the information OSD will not be displayed.

### **Switching Between Sound Modes**

Press the SOUND button of the remote control to change the Sound Mode setting between Standard, Music, Movie, and Custom.

### **Switching Between Picture Modes**

Press the PICTURE button of the remote control to change the Picture Mode setting between Dynamic, Standard, Energy Savings, Conferencing, HighBright, Custom, and HDR Video\*.

\* HDR Video can be selected only when an HDR signal is input.

### **Setting the Aspect Ratio**

Press the ASPECT button of the remote control to change the Aspect Ratio setting between Normal, 1:1, Full, and Zoom.

**NOTE:** This setting cannot be changed when [Media Player] is selected for the input signal.

|              | Normal  | 1:1   | Full   | Zoom   |
|--------------|---|---|--|--|
| Video signal | <ul> <li>The aspect ratio of<br/>the input signal is<br/>maintained and the<br/>image is enlarged/<br/>reduced.</li> <li>Black bars are<br/>added vertically or<br/>horizontally.</li> <li>The screen is not cut,<br/>neither vertically nor<br/>horizontally.</li> </ul> | The image is displayed<br>with the number of panel<br>pixels corresponding<br>to the resolution of the<br>input signal.<br>When the input signal<br>is larger than the<br>number of the panel<br>pixels, the aspect ratio<br>is maintained and the<br>image is reduced. | <ul> <li>The aspect ratio of the input signal is ignored and the image is enlarged.</li> <li>There are no black bars, neither vertically nor horizontally.</li> <li>The screen is not cut, neither vertically nor horizontally.</li> </ul> | <ul> <li>The aspect ratio of<br/>the input signal is<br/>maintained and the<br/>image is enlarged.</li> <li>There are no black<br/>bars, neither vertically<br/>nor horizontally.</li> <li>Part of the image,<br/>vertically or<br/>horizontally, is not<br/>displayed.</li> </ul> |
| 4096         | 3840  | 3840  | 2160   | 3840   |
| 1920         | 2160  | 1920  | 2160   | 3840   |
| 960          | 3840  | 1920<br>960   | 2160   | 3840   |
| 768          | 2880 2160   | 1024  | 3840   | 3840   |

**NOTE:** Note that changing the aspect ratio to compress or stretch an image and display it publicly or for commercial purposes in coffee shops, hotels, or other such places, may violate the rights of the copyright holder.

### **OSD (On-Screen Display) Controls**

The monitor features an OSD (On-Screen Display) menu that allows the user to easily adjust the screen. By operating the menu displayed at the top of the screen, you will be able to adjust the brightness and the other screen settings.

OSD menu structure The OSD menu is composed of the following elements.

The function of each OSD menu element is briefly explained below. For more details on the content of the menu, see "OSD Controls List" (page 69).

**Video settings:** Select one of the default picture modes, manually adjust the color settings, adjust the aspect ratio, and adjust the other settings related to the image.

Audio settings: Adjust the volume, balance, equalizer, and the other settings related to the audio.

Setup settings: Display the monitor information, select the language, or return the settings to their default values.

Control settings: Configure settings such as the network information.

Media Player settings: Configure the USB Demo Mode and other settings.

Schedule settings: Create auto power on/off schedules for the monitor and set the sleep timer.

### **Using the Media Player Menu**

The Media Player plays image, video, and music files located on a USB storage device connected to the USB Type-A port of the monitor (page 25).

To open the Media Player menu, press the SOURCE button of the remote control and select [Media Player].

- **NOTE:** Connect the USB storage device where the files are stored to the USB Type-A port of the monitor.
  - The Media Player does not auto-rotate content when changing the monitor's orientation from landscape to portrait and vice versa. Content must be created in the same orientation that matches the installed orientation of the monitor to display correctly.
  - The Media Player menu is always shown in the landscape orientation.

### Media Player Menu

This function can be used to display photos (still images) and play video and music files stored in the USB storage device.

Select the type of the file you want to play between [Photo], [Music], and [Movie].

### **Selecting Files to Play**

Playing a file

Select a file using the  $\blacktriangle$ ,  $\bigtriangledown$ ,  $\triangleleft$ , and  $\triangleright$  buttons of the remote control, and then press the  $\triangleright$  button. Press the  $\parallel$  button to pause the playback.

- Playing multiple files
  - 1. Select files using the ▲, ▼, ◀, and ▶ buttons of the remote control.
  - 2. Press the OK button of the remote control to add a checkmark next to each file.
  - 3. This saves the files as a playlist in the USB storage device.
  - **NOTE:** The selected files play in the order they are displayed in the folder.
    - File names must contain only alphanumeric characters.

### **Operation buttons**

- Press the OK button of the remote control while playing a file to display the OSD operation menu on the screen.
- Press the ◀, ▶ buttons to highlight an item in the operation menu and then press the OK button to select it.
- Press the ▼ button of the remote control to close the operation menu.

### **Slideshow Operation**

- Select files using the ▲, ▼, ◀, ▶ buttons and press the ▶ button to start a slideshow.
   Press the ∐ button to pause the slideshow.
- To pause the slideshow using the OSD menu, select .
   Select to resume the slideshow.
- Select Sor press the d button of the remote control to return to the previous image.
- Select or press the bitton of the remote control to go to the next image.
- Select solution of the remote control to stop the slideshow.

### **Repeat play**

Repeat setting can be configured for file playback. The following modes can be selected.

#### Repeat off

No selected files.

- All files in the folder are played once, in the sorted order.

One or more selected files.
 Any files you checked are played once, in the sorted order.

Contemporation File

- A file is playing: the current file plays on a loop.
  No file is playing: the highlighted file in the folder plays on a loop.
- One or more selected files.
   The first checked file in the sorted order plays on a loop.

· No selected files.

- All files in the folder are played on a loop, in the sorted order.

One or more selected files.
 The selected files are played on a loop, in the sorted order.

### **Other functions**

- Select 🔝 to view the playlist of files. You can also select the files to play from the list.
- While a file is being played, select S to show information on the file being displayed.

### **Video and Music Operations**

- Select files using the ▲, ▼, ◀, ▶ buttons of the remote control and press the ▶ button to start playback.
   Press the ↓ button to pause the playback.
- To pause the playback using the OSD menu, select .
   Select : to resume the playback.
- Select to start fast forward.
   FF2X, FF4X, FF8X, FF16X, FF32X (The sound is not output.) (FF32X can be selected only when a video file is played.)
- Select to start fast backward.
   FB2X, FB4X, FB8X, FB16X, FB32X (The sound is not output.)
   (FB32X can be selected only when a video file is played.)
- Select Select or press the d button of the remote control to return to the previous file.
- Select or press the b button of the remote control to return to go to the next file.
- Select select select button of the remote control to stop the playback.

### **Repeat play**

Repeat setting can be configured for file playback. The following modes can be selected.

- Repeat off
- No selected files.
   All files in the folder are played once, in the sorted order.
- One or more selected files.
   Any files you checked are played once, in the sorted order.
- Repeat one file
  - A file is playing: the current file plays on a loop.No file is playing: the highlighted file in the folder plays on a loop.
- One or more selected files. The first checked file in the sorted order plays on a loop.
- Repeat all files
  - No selected files. - All files in the folder are played on a loop, in the sorted order.

One or more selected files.
The selected files are played on a loop, in the sorted order.

### **Other functions**

- Select 🔝 to view the playlist of files. You can also select the files to play from the list.
- While a file is being played, select 2 to show information on the file being played.
  - NOTE: Only use USB mass storage class devices.
    - We cannot guarantee to support all commercially-available USB mass storage devices.
    - Do not use a USB hub.
    - Do not use a multi-partition USB storage device.
    - The USB Type-A port of the monitor supports 5 V / 500 mA. When using a USB device of more than 500 mA, we recommend using the AC adapter supplied with the USB device.
    - When connecting a USB device formatted as FAT16 or FAT32 to a computer, a message prompting you to scan and fix the USB device may appear. If that occurs, execute "Scan and fix".

### **Data Format for USB**

| Supported file system           | FAT16 (max 2 GB),  |                                 |                                 |
|---------------------------------|--|---------------------------------|---------------------------------|
| -                               | FAT32 (max 4 GB)   |                                 |                                 |
| Max folder level                | 9  |                                 |                                 |
| Max number of photos            | 997  |                                 |                                 |

\*1: It is played with down-converted to 2 ch.

 $^{\ast}2:$  It may not play smoothly with a combination of max bit rate of video and audio.

**NOTE:** Sometimes, it may not be possible to play a video file even when the conditions above are met. The file may not be played properly depending on the bit rate. Video files made with a codec not supported by the monitor cannot be played.

# Chapter 5 Advanced Operation

### This Chapter Includes:

- ⇒ "Creating a Power Schedule" on page 45
- ⇒ "Using Picture Modes" on page 46
- ⇒ "Setting Security and Locking the Monitor Controls" on page 47
- ⇒ "Locking the Button Controls" on page 48

### **Creating a Power Schedule**

The schedule function allows the monitor to automatically switch between power on and standby mode at different times.

#### To program the schedule:

- 1. Enter the [SCHEDULE] menu in the OSD menu.
  - a. Use the ▲/▼ buttons of the remote control to select [Current Time settings].
  - b Press the OK button of the remote control. Press the ◀, ► buttons of the remote control to move between the hours and minutes fields.
  - c Use the  $\blacktriangle/\nabla$  buttons of the remote control to set the time.
- 2. After setting the time, press the MENU button of the remote control.
- Use the ▲/▼ buttons of the remote control to select [Schedule settings].
- Schedule Sleep Timer Current Time settings Schedule settings Power On 12 : 00 Power Off 12 : 00 Power Off 12 : 00 EXIT

14)11131121

a. Press the OK button of the remote control. Place the cursor on [Power On] and press the OK button of the remote control to enable the [Power On]. Press the ◀, ▶ buttons of the remote control to move between the hours and minutes fields. Use the ▲/▼ buttons of the remote control to set the time.

b Use the ◀, ▶ buttons of the remote control to place the cursor on [Power Off] and then press the OK button of the remote control to enable [Power Off]. Press the ◀, ▶ buttons of the remote control to move between the hours and minutes fields.

Use the  $\blacktriangle/\nabla$  buttons of the remote control to set the time.

4. After setting the schedule, press the MENU button of the remote control to return to the previous menu or press the EXIT button to close the OSD menu.

### **Using Picture Modes**

There are different picture modes available. They have been configured for different applications as described in the "Picture Mode Types" table below.

### To change picture modes:

In the OSD menu, go the [Video] -> [Picture Mode], or press the PICTURE button of the remote control to select a mode.

```
HDR Video -> Dynamic -> Standard -> Energy Savings -> Conferencing -> HighBright -> Custom
```

| Picture Mode   | Purpose   |
|----------------|---|
| HDR Video      | Setting for HDR format video (can be selected only when an HDR signal is input) |
| Dynamic        | High-contrast video setting   |
| Standard       | Standard video setting  |
| Energy Savings | Video setting complying with the International Energy Star standard.            |
| Conferencing   | Video setting suited for video conferences                                      |
| HighBright     | Video setting suited for brighter environments                                  |
| Custom         | Customizable settings   |

### **Picture Mode Types**

### **Setting Security and Locking the Monitor Controls**

Under normal operation, the monitor can be controlled by any person using the remote control or the monitor control panel. You can prevent unauthorized use and changes to the monitor settings by enabling the security and lock settings.

The security and locking functions covered in this section are:

- · Locking the monitor control panel buttons (See page 23.)
- · Locking the remote control buttons (See page 26.)

### Locking the Button Controls

The lock settings prevent the monitor from responding to button presses on the remote control or monitor control panel. When locking the button controls, some buttons can be configured to remain unlocked. Locking and unlocking the button controls do not require a password.

### Locking the Control Panel Buttons

The [Key Lock Settings] prevent the monitor from being controlled using the buttons on the monitor control panel.

- 1. In the OSD menu, go to [Setup] -> [Other settings] and select [Key Lock Settings].
- 2. Select the key lock range.
  - Off: All buttons operate normally.
  - Mode1: Only the power button and the input switching function operate.
  - Mode2: All buttons are locked. (Only the power button can be used during standby mode.)
  - **NOTE:** The buttons are locked 3 seconds after Mode1 or Mode2 has been selected.

### **Unlocking the Monitor Panel Button Controls**

Carry out the following with the monitor in On mode.

- **OSD menu:** To remove the lock and restore normal button operation, set the [Key Lock Settings] to [Off] using the remote control.
- Monitor buttons: To remove the lock and restore normal button operation, hold the MENU/EXIT button pressed for 5 seconds or more.

### Locking the Remote Control Buttons

The [IR Lock Settings] prevent the monitor from being controlled using the remote control.

- 1. In the OSD menu, go to [Setup] -> [Other settings] and select [IR Lock Settings].
- 2. Select the key lock range.
  - · Off: All buttons operate normally.
  - Mode1: Only the POWER and the SOURCE buttons operate.
  - Mode2: All buttons are locked. (Only the power button can be used during standby mode.)
  - **NOTE:** The buttons are locked 3 seconds after Mode1 or Mode2 has been selected.

### **Unlocking the Remote Controls**

Carry out the following with the monitor in On mode.

- **OSD menu:** To remove the lock and restore normal button operation, set the [IR Lock Settings] to [Off] using the monitor buttons.
- Remote control: To remove the lock and restore normal button operation, hold the EXIT button pressed for 5 seconds or more.

# Chapter 6 External Control

### This Chapter Includes:

- ⇒ "Controlling the Monitor via RS-232C" on page 51
- ⇒ "Controlling the Monitor via LAN" on page 52
- ⇒ "HTTP Browser" on page 53
- ⇒ "Commands" on page 57

### Connecting an external device

There are two options to connect an external device to control the monitor.

- RS-232C Interface
   Connecting an external device to the RS-232C terminal of the monitor.
- Network (LAN) Interface Connecting a network to the LAN port of the monitor with a LAN cable.

### **Controlling the Monitor via RS-232C**

This monitor can be controlled by connecting a personal computer with an RS-232C terminal to the RS-232C terminal of the monitor with a commercially-available RS-232C crossover cable. The following operations are possible.

- Turning the monitor on or putting it into standby.
- · Switching between input signals.
- · Switching between mute On and Off.

NOTE: Set [Control Interface] under [Control Settings] to [RS-232C] (page 75).

### Connection

Monitor + computer.

- Turn off the monitor and the computer before connecting a computer to the monitor.
- · First, turn the computer on, and then turn the monitor on.
- To control the monitor via commands sent from a computer connected with an RS-232C cable, use the control commands. Instructions for the control commands can be found in "Commands" in "External Control" in this manual or in "External\_ Control.pdf" (see "Appendix B External Resources" page 68).

- NOTE: If your computer is equipped only with a 25-pin serial port connector, a 25-pin serial port adapter is required.
  - · Contact your supplier for details.
  - · For the pin assignment, see "Pin Assignment RS-232C input/output".

This monitor uses RXD, TXD and GND lines for RS-232C control.

A commercially-available crossover cable (not included) should be used for RS-232C control.

### **Pin Assignment**

### RS-232C input / output

| Pin No. | Name |
|---------|------|
| 1       | NC   |
| 2       | RXD  |
| 3       | TXD  |
| 4       | NC   |
| 5       | GND  |
| 6       | NC   |
| 7       | NC   |
| 8       | NC   |
| 9       | NC   |

D-sub 9-pin (monitor side)

This monitor uses RXD, TXD and GND lines for RS-232C control.

### **Controlling the Monitor via LAN**

The monitor is equipped with a LAN port (RJ-45). Connecting the monitor to a network allows you to receive email notifications from the monitor and control the monitor from a computer via a network. To use a LAN connection, you are required to assign an IP address to the monitor (page 75).

The monitor will obtain an IP address automatically when connected to a DHCP network.

NOTE: Set [Control Interface] under [Control Settings] to [LAN] (page 75).

#### **Example of LAN connection**

### **HTTP Browser**

### **Overview**

Connect the monitor with a commercially-available LAN cable to configure the LAN settings using the HTTP server function. This monitor uses "JavaScript" and "Cookies" and the browser should be set to accept these functions. Refer to the help files for the Web browser to change the settings to use JavaScript and Cookies.

To access the HTTP server, launch a web browser on a computer connected to the same network as the monitor and enter the following URL in the Web address field.

#### **Network Settings**

http://<Address IP of the monitor>

- **NOTE:** The control software can be downloaded from our website.
  - By default, the IP address of the monitor is set automatically. After a reset, the IP address is obtained automatically.
  - Depending on the network environment, the display speed and response to commands or clicks on buttons may
    be slow, or the operations may not be recognized. In such a case, consult your network administrator.
    The monitor may not respond if the buttons shown on the browser are repeatedly pressed in rapid intervals. In
    such a case, wait a moment and try again. If you still can't get a response, turn the monitor off and then back on.
  - If the monitor Network Settings screen does not appear in the Web browser, press the Ctrl+F5 keys to refresh your Web browser.
  - To control the monitor via a LAN, see "External\_Control.pdf" in our Website (see "Appendix B External Resources" page 68). If the screen does not appear, clear the cache of the Web browser.

#### **Preparation Before Use**

Connect the monitor to the network using a commercially-available LAN cable before attempting to use browser operations.

Operation with a browser that uses a proxy server may not be possible depending on the type of proxy server and the setting method. Although the type of the proxy server will be a factor, it is possible that items that have been set will not be shown depending on the effectiveness of the cache, and the settings configured from the browser may not be reflected in operation. It is recommended that a proxy server is not used unless the network environment requires it.

### Screen Adjustment Using a Browser

Access the following address to show HOME. Click the links on the left-hand column on the HOME screen to access the setting screens.

http://<Address IP of the monitor>

The default login password is "admin".

### **OSD Menu Settings in the Monitor Web Controls**

The functions related to the network can be configured the same way as in the OSD menu using the links below.

| INPUT SOURCE: HDMI1                   |                  | Τορ                      |
|---------------------------------------|------------------|--------------------------|
| STATUS<br>OVERVIEW<br>PROTOCOL<br>TCP | NEC              |                          |
| ROOMVIEW                              |                  |                          |
| CRESTRON CONTROL                      | SYSTEM           |                          |
|                                       | MODEL NAME       | E758                     |
| AMX                                   | SERIAL           | XXXXXXXXXX               |
| NAME                                  | FIRMWARE VERSION | Vx.x.x / Vx.x.x          |
| NETWORK                               | LOCAL TIME       | WWW MMM DD XX:XX:XX 20YY |
| SYSTEM                                | UPTIME           | XXh XXm XXs              |
| LOGOUT                                | NETWORK          |                          |
|                                       | IP ADDRESS       | 192.168.0.10             |
|                                       | SUBNET MASK      | 255.255.255.0            |
|                                       | DEFAULT GATEWAY  | 0.0.0.0                  |
|                                       | DNS PRIMARY      | 0.0.0.0                  |
|                                       | DNS SECONDARY    | 0.0.0.0                  |
|                                       | MAC Address      | XX:XX:XX:XX:XX           |
|                                       |                  |                          |

#### **Network Settings**

Click on "NETWORK" on the left-hand column on the HOME screen to enter the setting screen.

| INPUT SOURCE: HDMI1<br>STATUS<br>PROTOCOL<br>TCP | NEC              |               |
|--|------------------|---------------|
| ROOMVIEW   | NETWORK SETTINGS |               |
| CRESTRON CONTROL                                 | INTERFACE        |               |
| АМХ  | DHCP             | Off           |
| NAME   | IP ADDRESS       | 192.168.0.10  |
| NETWORK  | SUBNET MASK      | 255.255.255.0 |
| SYSTEM   | DEFAULT GATEWAY  | 0.0.0.0       |
| LOGOUT   | DNS PRIMARY      | 0.0.0.0       |
|  | DNS SECONDARY    | 0.0.0.0       |

| DHCP            | Select a method for setting the IP ADDRESS.         Off:       Sets fixed network settings.         On:       Obtains the network settings from the DHCP server on the network.         Manual DNS:       Obtains the network settings from the DHCP server on the network but the DNS is set manually.         NOTE:       Consult your network administrator if you have any trouble with the connection. |  |
|-----------------|---|--|
| IP ADDRESS      | Set the IP address for the monitor connected to the network when [Off] is selected for [DHCP].  |  |
| SUBNET MASK     | Set the subnet mask for the network to which the monitor is connected when [Off] is selected for [DHCP].  |  |
| DEFAULT GATEWAY | Set the default gateway for the network to which the monitor is connected when [Off] is selected for [DHCP].<br>Enter [0.0.0.0] to delete the setting.  |  |
| DNS PRIMARY     | Enter the IP address of the primary DNS server of the network connected to the monitor.<br><b>NOTE:</b> Enter [0.0.0.0] to delete the setting.  |  |
| DNS SECONDARY   | Enter the IP address of the secondary DNS server of the network connected to the monitor.<br><b>NOTE:</b> Enter [0.0.0.0] to delete the setting.  |  |

### **ROOMVIEW Settings**

Click on "ROOMVIEW" on the left column below HOME.

The monitor supports Crestron's ROOMVIEW, allowing multiple devices connected in the network to be managed and controlled from a computer or a controller.

| ROOMVIEW | Enables or Disables managing from the computer.         |
|----------|---|
| PORT     | Sets the Crestron port used for Ethernet communication. |

For further information, visit https://www.crestron.com

### **CRESTRON CONTROL Settings**

| CRESTRON CONTROL      | Enables or Disables managing from the controller.       |
|-----------------------|---|
| CONTROLLER IP ADDRESS | Sets the IP address of the CRESTRON SERVER.             |
| IP ID                 | Sets your CRESTRON SERVER IP ID.                        |
| PORT                  | Sets the Crestron port used for Ethernet communication. |

Click on "CRESTRON CONTROL" on the left column below HOME.

**HINT:** The CRESTRON CONTROL settings are required only for use with Crestron's ROOMVIEW. For further information, visit https://www.crestron.com

### **AMX Settings**

Click on "AMX" on the left-hand column on the HOME screen to enter the setting screen.

| AMX BEACON | When the monitor is connected to a network supporting the NetLinx control system by AMX, enables or disables the function to send a beacon to the system from AMX Device Discovery. |
|------------|---|
|            |   |

**NOTE:** When using a device that supports AMX Device Discovery, all AMX NetLinx control systems will recognize the device and download the appropriate Device Discovery Module from an AMX server.

### Commands

Connecting the monitor to a computer via RS-232C or to a network via LAN allows for the transmission of commands to the monitor, providing remote control of the monitor from a connected device. Instructions for each command format can be found in "External\_Control.pdf" in our Website (see "Appendix B External Resources" page 68).

### **RS-232C Interface**

| Item         | Details    |
|--------------|------------|
| PROTOCOL     | RS-232C    |
| BAUD RATE    | 9600 [bps] |
| DATA LENGTH  | 8 [bits]   |
| PARITY       | NONE       |
| STOP BIT     | 1 [bit]    |
| FLOW CONTROL | NONE       |

### **Network (LAN) Interface**

| Item                | Details                    |
|---------------------|----------------------------|
| PROTOCOL            | ТСР                        |
| PORT NUMBER         | 7142                       |
| COMMUNICATION SPEED | AUTO setting (10/100 Mbps) |

## Chapter 7 Troubleshooting

### This Chapter Includes:

- $\Rightarrow$  "When a problem occurs with the monitor..." on page 59
- ⇒ "Nothing is displayed..." on page 59
- ⇒ "The image is not displayed correctly..." on page 60
- ⇒ "An instruction or caution screen is displayed..." on page 61
- ⇒ "Others (when connected to a computer)" on page 61
- ⇒ "Others (remote control, speakers)" on page 61
- ⇒ "Others (when connected via RS-232C or LAN)" on page 62
- ⇒ "When using a media player" on page 62
- ⇒ "When using a video device" on page 62

### When a problem occurs with the monitor...

In such a case, refer to the following.

#### Nothing is displayed...

| Symptom                              | Condition   | Cause and solution  | Reference     |
|--------------------------------------|---|---|---------------|
| Nothing is displayed                 | The power indicator is off  | Check that the power cord is properly connected.  | P.12          |
| on the screen.                       | In the OSD menu, [Setup]<br>-> [Other Settings] -> [LED<br>Indicator] is set to [On]  | Use another device to check that power is correctly supplied to the outlet.   |               |
|                                      | The power indicator is lit blue   | A terminal with no signal input may be selected. Press the input switch button to select a different input terminal.  | P.23          |
|                                      |   | Open the OSD menu and check the following settings.   | P.39          |
|                                      |   | <ul> <li>If the OSD menu does not open, the monitor may be<br/>malfunctioning.<br/>Contact your supplier.</li> </ul>  |               |
|                                      |   | <ul> <li>If the OSD menu opens properly, the monitor is not<br/>malfunctioning. Adjust [Backlight / Brightness] and<br/>[Contrast] in the [Video] settings.</li> </ul>  | P.71          |
|                                      |   | • If the image is not displayed after adjusting [Backlight /<br>Brightness] and [Contrast] in the OSD menu, check that<br>the connected device operates correctly. If the monitor is<br>connected to a computer, check the frequency, resolution,<br>and type of output signal on the computer. | P.29          |
|                                      | The power indicator is lit<br>a color other than blue or<br>it is flashing.   | The monitor automatically goes into standby at the preset time period after the video signal is lost. Press the power on button on the remote control or press the <b>U</b> button on the monitor.  | P.26,<br>P.34 |
|                                      |   | Check that the signal cable is correctly connected to the input and output terminals of the monitor and the connected device.   | P.28          |
|                                      |   | Check that the power adaptor is properly connected.   | P.29          |
|                                      |   | Check that the connected computer or video device is turned on.   |               |
| The image on the screen disappeared. | The screen, on which<br>the image was correctly<br>displayed, turned black,<br>started to blink, or did not<br>display anything.* | The LCD panel needs to be replaced. Contact your supplier.  |               |

\* The lifespan of the backlight used in the monitor may end.

Check for HDCP (High-bandwidth Digital Content Protection) content. HDCP is a system for preventing illegal copying of video data sent over a digital signal. If you are unable to view material via the digital inputs, this does not necessarily mean that the monitor is not functioning properly. With the implementation of HDCP, there may be cases in which certain content is protected by HDCP and might not be shown due to the decision/intention of the HDCP community (Digital Content Protection, LLC).

### The image is not displayed correctly...

| Symptom  | Cause and solution  | Reference     |  |  |  |  |
|--|---|---------------|--|--|--|--|
| Black dots (dots not lit) or bright<br>dots (dots always lit) appear on<br>the screen.                                   |   |               |  |  |  |  |
| The brightness of the image is not even.   | This may happen depending on the content displayed. This is due to the characteristics of LCD panels and is not a malfunction.  |               |  |  |  |  |
| The shadow of thin vertical lines appears on the screen.   | This may happen depending on the content displayed. This is due to the characteristics of LCD panels and is not a malfunction.  |               |  |  |  |  |
| Moiré appears when detailed patterns are displayed.  | This may happen when detailed patterns are displayed. This is due to the characteristics of LCD panels and is not a malfunction.  |               |  |  |  |  |
| The colors do not look correct depending on the viewing angle.   | The tint may greatly vary depending on the viewing angle (the angle from which the screen is viewed).   | P.65,<br>P.66 |  |  |  |  |
| The display condition of the screen is changing gradually.   | The display condition changes gradually while the monitor is being used. The ambient temperature may also have an impact on the display condition. This is due to the characteristics of LCD panels and is not a malfunction.   | P.13          |  |  |  |  |
| After changing the screen, the<br>image of the previous screen<br>remains slightly.                                      | When the same still image is displayed for a long time, this phenomenon of persisting image may occur.<br>You may press the POWER button of the remote control or the $O$ of the monitor to put the monitor on standby, or display changing images for about one day until the persisting image disappears naturally. If the still image is displayed for a really long time, the persisting image may not disappear. This is not a malfunction. It is recommended to turn the monitor off when not using it. |               |  |  |  |  |
| The colors are not displayed   | Open the OSD menu and check the following settings.   | P.39          |  |  |  |  |
| correctly.   | <ul> <li>If the OSD menu does not open properly, the monitor may be<br/>malfunctioning.<br/>Contact your supplier.</li> </ul>   | P.71,<br>P.71 |  |  |  |  |
|  | • If the OSD menu opens properly, the monitor is not malfunctioning.<br>Select [Color] and adjust the colors as needed, or execute [Reset Video<br>Settings] under the [Video] settings to return the settings to their default<br>values.  | P.71,<br>P.71 |  |  |  |  |
|  | • If the OSD menu opens properly and the computer screen does not<br>appear correctly after executing [Reset Video Settings] under [Video],<br>check the connection to the computer as well as the frequency, resolution<br>and output signal type setting on the computer.   | P.28,<br>P.64 |  |  |  |  |
| The image is not displayed<br>correctly (problems not<br>mentioned above)<br>or the video is interrupted<br>momentarily. | The image quality may decrease or the video may be interrupted if a transponder, a splitter, or a long cable is used. Replace the cable you are using with a shielded cable, or connect directly to the monitor without using a transponder or a splitter. If a twisted pair cable extender is used, make sure it supports shielded cables. Noise may also appear on the screen or the video may be interrupted depending on the usage environment and the cable used.  |               |  |  |  |  |
|  | Open the OSD menu and check the following settings.   | P.39          |  |  |  |  |
|  | <ul> <li>If the OSD menu does not open properly, the monitor may malfunction.<br/>Contact your supplier.</li> </ul>   |               |  |  |  |  |
|  | <ul> <li>If the video is interrupted when an HDMI signal with the 3840 x 2160 or<br/>4096 x 2160 resolution is input, use an HDMI cable supporting 4K.</li> </ul>   |               |  |  |  |  |
| The power turns off automatically.   | Check the setting in [Setup] -> [Power save settings] -> [Auto Power Down].<br>Set the [CEC] setting under [Setup] -> [HDMI Settings] to [Off].<br>Check the setting in [Schedule] -> [Sleep Timer].  |               |  |  |  |  |
| The monitor does not operate according to the schedule function.   | Check the setting in [Schedule] -> [Current Time settings].<br>Enable [Power On] under [Schedule] -> [Schedule settings].<br>Enable [Power Off] under [Schedule] -> [Schedule settings].  | P.77          |  |  |  |  |
| The display is disturbed.  | The display may be disturbed when power is turned on or when the settings have been changed. This is not a malfunction.   |               |  |  |  |  |
|  |   |               |  |  |  |  |

### An instruction or caution screen is displayed...

| Symptom  | Cause   | Solution  | Reference |
|--|---|---|-----------|
| A caution message is<br>displayed on the screen.* <sup>1</sup><br>Attention !      | The signal cable may not be connected<br>properly to the input or output terminals<br>of the monitor or the computer. | Check that the signal cable is securely<br>connected between the input terminal<br>of the monitor and the output terminal<br>of the connected device. | P.28      |
| No Signal<br>Please check input signal or Connection.                              | The HDMI input may have switched.   | Set the [CEC] setting under [Setup] -> [HDMI Settings] to [Off].  | P.73      |
|  | The signal cable may be damaged.  | Check that the signal cable is not damaged.   |           |
|  | The computer may be turned off.   | Check that the computer is turned on.   |           |
|  | The power management function of the computer may be functioning.   | Move the mouse or press a key on the keyboard.  |           |
| Out of Range   | An improper signal may be input to the monitor.   | Change the frequency of the input signal or the resolution of the computer.   | P.64      |
|  | A signal with a resolution higher than<br>the resolution supported by the monitor<br>may be input.                    | Change the frequency of the input signal or the resolution of the computer.   | P.64      |
| A temperature warning is displayed on the screen.                                  | The ambient temperature exceeds the operation guaranteed temperature.   | Turn off the power of the monitor since<br>this problem may cause a malfunction.  | P.74      |
| Waning!<br>The internal temperature is high. Please check the ambient temperature. |   |   |           |

\*1 Depending on the computer, a proper signal may not be output immediately after changing the resolution or the frequency and the caution may be displayed for a while. In such a case, wait for a while. If the screen display returns to normal, it means the input signal is correct.

### Others (when connected to a computer)

| Symptom  | Cause  | Solution  |
|--|--|---|
| Cannot change the resolution or the number of colors / The | Sometimes, the signal cannot be input and output.                | Restart the monitor and the computer.   |
| resolution or the number of colors is fixed.               | The video card driver may not be correctly recognized by the OS. | Reinstall the video card driver. For more<br>information on the reinstallation procedure,<br>refer to the computer manual or the support<br>service for the computer. |

#### Others (remote control, speakers)

| Symptom  | Cause and solution  |                        |  |  |  |
|--|---|------------------------|--|--|--|
| The remote control is not functioning.           | <ul> <li>The batteries may be drained.</li> <li>Check that the batteries are inserted correctly (check the + and - sides).</li> <li>The [IR Lock Settings] may be set to [Mode 1] or [Mode 2].</li> </ul>   | P.11,<br>P.74          |  |  |  |
| The video is displayed<br>but there is no sound. | <ul> <li>Check that the audio cable is correctly connected. Check also that the audio balance is not fully set to one side only. If the balance is set to one side only, set it to the center.</li> <li>The sound may be muted. Press the MUTE button on the remote control or the main unit and check that the sound is output.</li> <li>The volume may be set to the minimum. Adjust the volume using the + and - buttons on the main unit or the VOL + and - buttons on the remote control.</li> </ul> | P.24,<br>P.26,<br>P.72 |  |  |  |

### Others (when connected via RS-232C or LAN)

| Symptom                               | Cause and solution   | Reference |
|---------------------------------------|--|-----------|
| Control via RS-232C is not available. | Check that the RS-232C crossover cable is correctly connected.     | P.51      |
| Control via LAN is not                | Check that the LAN cable (Cat.5 or higher) is correctly connected. | P.52      |
| available.                            | Check that the Network Settings are correctly configured.          | P.52      |

### When using a media player

| Symptom  | Cause and solution  |      |  |  |
|--|---|------|--|--|
| The media player function does not recognize the USB storage device. | Check that a USB storage device is correctly connected to the USB port. | P.32 |  |  |

### When using a video device

| Symptom                                       | Cause and solution   |      |  |  |  |  |
|---|--|------|--|--|--|--|
| There is no image and no sound.               | Check that the external device (video player, etc.) is correctly connected and operates properly. For more information, see the manual of the external device. |      |  |  |  |  |
|   | The power management function of the monitor may be functioning. Check that the external device is operating (playing).  |      |  |  |  |  |
| There is no color or the colors are abnormal. | Adjust the [Color] setting.  | P.71 |  |  |  |  |

### [Notice] About the MPEG-4 AVC, MPEG-4 Visual license included in this product

### 1. MPEG AVC

THIS PRODUCT IS LICENSED UNDER THE AVC PATENT PORTFOLIO LICENSE FOR THE PERSONAL USE OF A CONSUMER OR OTHER USES IN WHICH IT DOES NOT RECEIVE REMUNERATION TO (i) ENCODE VIDEO IN COMPLIANCE WITH THE AVC STANDARD ("AVC VIDEO") AND/OR (ii) DECODE AVC VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED TO PROVIDE AVC VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION MAY BE OBTAINED FROM MPEG LA, L.L.C. SEE HTTP://WWW.MPEGLA.COM

### 2. MPEG-4 Visual

THIS PRODUCT IS LICENSED UNDER THE MPEG-4 VISUAL PATENT PORTFOLIO LICENSE FOR THE PERSONAL AND NON-COMMERCIAL USE OF A CONSUMER FOR (i) ENCODING VIDEO IN COMPLIANCE WITH THE MPEG-4 VISUAL STANDARD ("MPEG-4 VIDEO") AND/OR (ii) DECODING MPEG-4 VIDEO THAT WAS ENCODED BY A CONSUMER ENGAGED IN A PERSONAL AND NONCOMMERCIAL ACTIVITY AND/OR WAS OBTAINED FROM A VIDEO PROVIDER LICENSED BY MPEG LA TO PROVIDE MPEG-4 VIDEO. NO LICENSE IS GRANTED OR SHALL BE IMPLIED FOR ANY OTHER USE. ADDITIONAL INFORMATION INCLUDING THAT RELATING TO PROMOTIONAL, INTERNAL AND COMMERCIAL USES AND LICENSING MAY BE OBTAINED FROM MPEG LA, LLC. SEE HTTP://WWW.MPEGLA.COM.

### Appendix B External Resources

Additional specification documents and accessories, and optional software applications referenced in this product manual are listed below.

#### **Regional websites**

Global: https://www.sharp-nec-displays.com/global/ Asia-Pacific: https://www.sharp-nec-displays.com/ap/contact/index.html North America: https://www.sharpnecdisplays.us/ Europe, Russia, Middle East and Africa: https://www.sharpnecdisplays.eu/p/hq/en/home.xhtml Japan: https://www.sharp-nec-displays.com/jp/

#### **Additional Documentation**

#### **External Control" PDF document**

This document defines the communications protocol for externally controlling and querying the monitor via either RS-232C or LAN. The protocol uses encoded binary and requires calculation of checksums, and most functionality in the monitor can be controlled using these commands.

This document is available for download from our website in your region.

#### Software

Software is available for download on our website. https://www.sharp-nec-displays.com/dl/en/dp\_soft/lineup.html

#### NaViSet Administrator software

This free software is an advanced and powerful network-based control, monitoring and asset management system for NEC monitors and projectors. The software is available for Microsoft Windows and macOS.

The latest version of the NaViSet Administrator software is available on our website.

# Appendix C OSD Controls List

### This Chapter Includes:

- ⇒ "Video Settings" on page 70
- ⇒ "Audio Settings" on page 72
- ⇒ "Setup" on page 73
- ⇒ "Control Settings" on page 75
- ⇒ "Media Player" on page 76
- ⇒ "Schedule" on page 77

Default values can be provided on request.

# **Video Settings**

| idec      | )                 |   |
|-----------|-------------------|---|
| ictu      | re Mode           | Provides pre-configured video settings suitable for various environments where this device may be used, or customize settings to your preference.               |
| HDR Video |                   | Video setting for the HDR format. (Can be selected only when an HDR signal is input.)   |
| D         | ynamic            | High-contrast video setting.  |
| S         | tandard           | Standard setting.   |
| E         | nergy Savings     | Video setting complying with International Energy Star standard.  |
| С         | onferencing       | Video setting suited for video conferences.   |
| Н         | ighBright         | Maximum backlight brightness with higher color temperature for brighter ambient environments  |
| С         | ustom             | Customizable settings.  |
| dva       | nced Video        | Menu used to adjust detailed video settings.  |
| A         | spect Ratio       | Select the aspect ratio of the screen image. For more information, see "Setting the Aspect Ratio" in this manual.   |
|           |                   | NOTE: • [Zoom] cannot be used when a 4K signal is input   |
|           |                   | • [Zoom] cannot be used when an FHD signal is input.  |
|           | Normal            | Maximizes the size without changing the aspect ratio.   |
|           | 1:1               | Shows the image in a 1 by 1 pixel format. (If the input resolution is higher than the recommended resolution, the image will be scaled down to fit the screen). |
|           | Full              | Fills the entire screen even if the aspect ratio needs to be changed.   |
|           | Zoom              | Fills the entire screen without changing the aspect ratio.  |
|           |                   | NOTE: The areas of the image that are outside of the active screen area are not shown   |
| 0         | verscan           | Selects the image display area.   |
|           | Auto              | The image display area is set automatically.  |
|           | On                | Approximately 95 % of the image will be shown on the screen.  |
|           | Off               | The whole image is displayed within the screen area. This setting may cause noise at the edges of the screen depending on the signal.                           |
|           |                   | <b>NOTE:</b> When you use a computer with an HDMI output, set it to [OFF].  |
| D         | imming Setting    | The brightness of the backlight is optimized, while the contrast can be increased and the power consumption reduced.  |
|           | Off               | The backlight is not controlled.  |
|           | Dynamic Backlight | Automatically adjusts the brightness level of the entire screen according to the input signal.  |
|           | Local Dimming     | Automatically adjusts each of the clusters of the LCD backlight independently according to the input signal.  |

| ïdec                 | )                    |  |
|----------------------|----------------------|--|
| Color Temperature    |                      | Adjusts the color temperature of the entire screen.<br>A low color temperature will result in a reddish screen. A high color temperature will make the screen bluish.<br>If a temperature needs further adjustment, the individual R/G/B/ levels of the white point can be adjusted. |
|                      | Cool                 | High color temperature setting. The screen will be bluish.   |
|                      | Normal               | Intermediate setting.  |
|                      | Warm                 | Low color temperature setting. The screen will be reddish.   |
|                      | Native               | Turns the color temperature adjustment off and displays the image with the panel characteristics.  |
|                      | Custom               | Customizable settings.   |
| Ν                    | oise Reduction*      | Reduces the image noise.   |
| A                    | daptive Contrast*    | Automatically adjusts the contrast according to the image. If [High] is set, the image is shown clearly but the brightness variation may appear unnatural.   |
| G                    | amma                 | Adjusts the brightness of gray and other intermediate colors. (SDR)  |
|                      | Native               | Gamma correction is handled by the LCD panel.  |
|                      | 2.2                  | Typical monitor gamma for use with a computer.   |
|                      | 2.4                  | Typical gamma settings for use with video devices, such as DVDs and Blu-rays.  |
| A                    | mbient Light Sensing | Automatically adjusts the brightness of the screen depending on ambient light within the room.<br>When set to [On], the brightness of the screen is adjusted automatically according to the room brightness.   |
|                      | olor Enhance*        | NOTE:When set to [ON], [Backlight / Brightness] cannot be changed.Changes the colors of the image and the saturation to create a more colorful image.  |
| _                    | DR Mode              | When the monitor detects an HDR signal, you can select preferred gamma correction from [Low], [Mid] and [High].  |
| ack                  | ight / Brightness    | Adjusts the brightness of the image using the backlight.<br>Press the ◀ and ▶ the buttons to adjust the brightness. In general, use this function to adjust the brightness.  |
|                      |                      | <b>NOTE:</b> When [On] is selected in [Ambient Light Sensing], this function cannot be changed.  |
| ontr                 | ast                  | Adjusts the image brightness in relationship to the input signal. Press ◀ or ► button to adjust.   |
| idec                 | Black Level          | Adjusts the black luminance.   |
| harp                 | oness*               | Adjusts the crispness of the image. Press ◀ or ► button to adjust.   |
|                      |                      | <b>NOTE:</b> The lines may appear as double lines depending on the setting. In such a case, lower the sharpness setting.   |
| olor                 | *                    | Adjusts the color density of the screen.<br>Press the ▶ button to increase the density, or the ◀ button to decrease it.  |
| ïnt*                 |                      | Adjusts the color tint of the monitor screen between R0-R50 and G0-G50.  |
| Reset Video Settings |                      | Returns all settings in the Video menu to their default values.  |

\*: Such as DVI signals through DVI/HDMI conversion cable, those signals with no InfoFrame information and analog RGB signals are not supported.

# **Audio Settings**

| Audio                |  |
|----------------------|--|
| Sound Mode           | Set pre-configured audio settings suitable for various environments where the monitor may be used, or customize settings to your preference.   |
| Standard             | Standard sound setting.  |
| Music                | Optimized settings for music playback or audio in conference rooms.  |
| Movie                | Surround sound for clarity in retail stores and other signage applications.  |
| Custom               | Customizable settings.   |
| Balance              | Press the ► button to move the audio signal to the right. Press the ◄ button to move the audio signal to the left.   |
| Surround             | Artificially produces surround sound audio.  |
| Internal Speakers    | Configures the settings for the internal speakers output.  |
| Auto                 | The sound is not output from the speakers when a cable is connected to the HEADPHONE terminal.   |
| Off                  | Sound is not output from the speakers.   |
| On                   | Sound is always output from the speakers.  |
| Digital Output       | Select the optical digital audio format of the S/PDIF terminal.<br><b>RAW:</b> Outputs in the RAW format.<br><b>PCM:</b> Outputs in the PCM format.  |
| Audio Input          | Selects whether to use the audio signal of the Audio In terminal when the audio signal is not included in the HDMI signal (DVI signals, etc.).<br>HDMI: The HDMI terminal is used.<br>Audio in: The Audio in terminal is used. |
| Audio Delay          | Adjusts the delay time until the audio is output.  |
| Reset Audio Settings | Returns all settings in the Audio menu to their default values.  |

### Setup

| Setup               |   |
|---------------------|---|
| OSD Settings        |   |
| Language            | Select the language used in the OSD.  |
| Transparency        | Set the transparency level of the OSD menu between 30%, 50%, 70% and Off.<br>The higher the percentage, the more transparent the OSD menu is.   |
| Information OSD     | Displays or hides the Information OSD.<br>Information OSD contains the messages that are displayed on the screen when the input is<br>switched or when the state of the input signal changes.   |
| Closed Caption      | Adjust the Closed Caption settings.<br>Caption Display / Analog Captions  |
| Power save settings | Enables or disables the monitor entering power saving mode.   |
| Energy Mode         | Select a mode between Home, Retail, and Office<br>For more information, see "Energy Mode" page 34.  |
| Power Save          | Sets the time until the monitor enters the Power Save mode. When the set time has elapsed after the input signal has been lost, the Power Save function is activated.   |
| Quick Start         | When [On] is selected, the monitor will quickly return to the [On] state when a signal is detected. Enabling this option increases standby power consumption.   |
| Auto Power Down     | When turned [On], the monitor turns off automatically after 4 hours without any operation.  |
| Auto Input Change   | This function automatically selects the input terminal with an input signal.<br>When enabled, this option can detect and change inputs when a signal is applied or lost.<br>Press the INFO button of the remote control to display the selected input terminal on the<br>Information OSD.   |
| None                | The monitor does not search for video signal on the other input connections.  |
| First               | The monitor does not search for a video signal on the other input connections while the current input has a video signal.<br>If the current input connection does not have video signal present, the monitor will search for video signal on the other video input connections. If a video signal is found, the monitor will switch from the current input to the input with the active video source automatically. |
| Custom              | The input terminals included in the search performed by the monitor can be selected.  |
| HDMI Settings       |   |
| CEC                 | This function makes it possible to control a device supporting HDMI CEC connected to the HDMI terminal.<br>When set to On, HDMI CEC is enabled.   |
| EDID                | Sets the HDMI mode.<br><b>Mode 0:</b> Max resolution is 1920 x 1080 (60 Hz).<br><b>Mode 1:</b> Max resolution is 3840 x 2160 (30 Hz).<br><b>Mode 2:</b> Max resolution is 3840 x 2160 (60 Hz), HDCP 2.2, or HDR.  |
| Video Range         | Adjust the gradation range to be shown according to the video signal to improve the whiteout and blackout of the image.   |
| HPD Delay           | This function makes it possible to control the time until the video from the HDMI terminal is displayed.<br>When set to Off, the time until the video is output can be reduced but the video may not be output depending on the device. In such a case, set [HPD Delay] to On.  |

| Setup               |   |
|---------------------|---|
| /GA Options         | This option is only enabled when a VGA signal is input.   |
| VGA Mode            | Select [RGB] or [YPbPr] depending on the signal received into the VGA input terminal.   |
| Auto Adjust         | Automatically adjusts settings such as the image position.  |
| H.Position          | Adjusts the horizontal position of the screen.<br>Press the ► button to move the screen to the right or the ◄ button to move it to the left.  |
| V.Position          | Adjusts the vertical position of the screen.<br>Press the ▶ button to move the screen to the top or the ◀ button to move it to the bottom.  |
| Clock               | Adjust this setting when vertical lines appear on the screen or when the size differs at the right and left of the screen.  |
| Phase               | Adjust this setting when noise appears in the horizontal direction, when the characters are blurred, or when the contours are not sharp.  |
| H.Resolution        | The video can be enlarged/reduced in the horizontal direction using this function only when [Standard] is selected in [Aspect Ratio].<br><b>NOTE:</b> This function may not operate depending on the input signal.  |
| VDecelution         |   |
| V.Resolution        | The video can be enlarged/reduced in the vertical direction using this function only when [Standard] is selected in [Aspect Ratio].   |
|                     | <b>NOTE:</b> This function may not operate depending on the input signal.   |
| Reset VGA Options   | Resets the VGA Options settings to their default values.  |
| Other settings      |   |
| Input Labels        | Renames the input terminal currently being displayed. Letters (A-Z), numbers (0-9), and some symbols can be used.   |
| Key Lock Settings   | <ul> <li>Prevents the monitor from being controlled using the buttons on the monitor control panel.</li> <li>Off: All buttons operate normally.</li> <li>Mode 1: Only the power button and the input switching function operate.</li> <li>Mode 2: All buttons are locked. (Only the power button can be used during standby mode</li> </ul>   |
| IR Lock Settings    | <ul> <li>Prevents the monitor from being controlled using the remote control.</li> <li>Off: All buttons operate normally.</li> <li>Mode 1: Only the POWER and the SOURCE buttons operate.</li> <li>Mode 2: All buttons are locked. (Only the power button can be used during standby mode</li> </ul>  |
| Power supply        | You can configure the power supply to the USB Type-C port.<br>The power consumption increases when set to [On].   |
| LED Indicator       | Set it to Off to turn off the power indicator when the monitor is turned on (normally lit blue).  |
| Mute Settings       | Allows you to mute the monitor's audio and video output.<br><b>Audio:</b> Mutes the audio output when the remote control's MUTE button is pressed.<br><b>Video:</b> Mutes the video output when the remote control's MUTE button is pressed.<br><b>Audio &amp; Video:</b> Mutes the audio and video output when the remote control's MUTE button is pressed.  |
| Image Rotation      | When [On] is selected, rotates the image 180 degree.  |
| Thermal Management  | The monitor is equipped with thermal sensors and displays a warning when the ambient<br>temperature exceeds the operation guaranteed temperature. If a warning is displayed, turn the<br>monitor off since using the monitor in such environment may cause a malfunction.<br><b>Warning Message:</b> A temperature warning is displayed on the screen when the internal<br>temperature has exceeded the operation guaranteed temperature.<br><b>Shutdown:</b> The monitor turns off automatically when the internal temperature has<br>exceeded the operation guaranteed temperature. |
| Signal Information  | Displays the information regarding the input signal.  |
| Vonitor Information | Displays the information regarding the monitor.   |
| Factory Reset       | All settings except network are returned to factory default.  |

# **Control Settings**

| Сс                     | ontrol Settings |   |
|------------------------|-----------------|---|

# Appendix D Manufacturer's Recycling and Energy Information

#### This Chapter Includes:

- ⇒ "Disposing of your old NEC product" on page 79
- ⇒ "Energy Saving" on page 79
- ⇒ "About Conversion Cables Used with the AV Terminal" on page 81

We are strongly committed to environmental protection and sees recycling as one of the company's top priorities in trying to minimize the burden placed on the environment. We are engaged in developing environmentally friendly products, and always strive to help define and comply with the latest independent standards from agencies such as ISO (International Organization for Standardization) and TCO (Swedish Trades Union).

# **Disposing of your old NEC product**

The aim of recycling is to gain an environmental benefit by means of re-use, upgrading, reconditioning or reclamation of material. Dedicated recycling sites ensure that environmentally harmful components are properly handled and securely disposed. To ensure the best recycling of our products, we offer a variety of recycling procedures and gives advice on how to handle the product in an environmentally sensitive way, once it has reached the end of its life.

All required information concerning the disposal of the product and country-specific information on recycling facilities can be found on our following websites:

https://www.sharpnecdisplays.eu/p/greenvision/en/greenvision.xhtml (in Europe)

https://www.sharp-nec-displays.com/jp/ (in Japan)

https://www.sharpnecdisplays.us/ (in USA).

### **Energy Saving**

This monitor features an advanced energy saving capability. When a Display Power Management signal is sent to the monitor, the Energy Saving mode is activated. The monitor enters a single Energy Saving mode.

For additional information visit:

https://www.sharpnecdisplays.us/ (in USA)

https://www.sharpnecdisplays.eu/p/hq/en/home.xhtml (in Europe)

https://www.sharp-nec-displays.com/global/index.html (Global)

For ErP requirement/For ErP (Network standby) requirement:

Except for conditions below:

[Energy Mode] is set to [Retail mode] or [Office mode]. [Quick Start] is set to [On]. [Auto Input Change] is set to [First] or [Custom]. [Power supply] is set to [On].

Power consumption (Blinking red): 2.0 W or less. Time for power management function: 60 sec. (Default setting).

Power consumption (Lit red): 0.5 W or less. Time for power management function: 3 min. (Default setting).

#### WEEE Mark (European Directive 2012/19/EU and amendments)

#### Disposing of your used product: In the European Union

EU-wide legislation as implemented in each Member State requires that used electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste. This includes monitors and electrical accessories, such as signal cables or power cords. When you dispose of such products, please follow the guidance of your local authority or ask the shop where you purchased the product, or if applicable, follow applicable legislation or agreement you may have. The mark on electrical and electronic products may only apply to the current European Union Member States.uct, or if applicable, follow applicable legislation or agreement you may have. The mark on electronic products may only apply to the current European Union Member States.uct, or if applicable, follow applicable legislation or agreement you may have. The mark on electronic products may only apply to the current European Union Member States.uct, or if applicable, follow applicable legislation or agreement you may have. The mark on electronic products may only apply to the current European Union Member States.uct, or if applicable, follow applicable legislation or agreement you may have. The mark on electronic products may only apply to the current European Union Member States.

#### **Outside the European Union**

If you wish to dispose of used electrical and electronic products outside the European Union, please contact your local authority and ask for the correct method of disposal.

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

According to EU directive 2006/66/EC and amendments, the battery can't be disposed improperly. The battery shall be separated to collect by local service.

### **About Conversion Cables Used with the AV Terminal**

Use a commercially-available video cable with a 4-contact mini jack ( $\varphi$ 3.5 mm) at one extremity for conversion cables to connect to the AV terminal.

Check the wiring specification of the cable in advance and choose a proper cable.

**NOTE:** \*Different wiring specifications may exist for 4-contact mini jack cables.

| No. | Signal        |
|-----|---------------|
| 1   | Video         |
| 2   | Audio (left)  |
| 3   | Audio (right) |
| 4   | GND           |
