User's Manual

DLP Cinema® Projector

NP-NC603L

Sharp NEC Display Solutions, Ltd.

Model No.
NP-NC603L

Important Information

Precautions: Please read this manual carefully before using your **NP-NC603L** and keep the manual handy for future reference.

The NP-NC603L is called the “projector”, and the IMB (integrated media server) is called the “media block” or “IMB” in this manual.

- DLP (Digital Light Processing), DLP Cinema and DLP Cinema logo are trademarks of Texas Instruments.
- Microsoft and Windows are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.
- Oracle and Java are registered trademarks of Oracle and/or its affiliates.
- Linux is a registered trademark of Linus Torvalds in the United States and/or other countries.
- Other product names and logos mentioned in the user’s manual may be the trademarks or registered trademarks of their respective holders.
- The display screens and illustrations shown in this manual may differ slightly from the actual ones.
- GPL/LGPL Software Licenses
- The product includes software licensed under GNU
- General Public License (GPL), GNU Lesser General Public License (LGPL), and others.
- For more information on each software, see “readme.pdf” inside the “about GPL&LGPL” folder on our website.

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION

TO PREVENT ELECTRIC SHOCK, DO NOT OPEN TOP COVER. NO USER SERVICEABLE PARTS INSIDE.

This symbol warns the user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to make any kind of contact with any part inside of this unit.

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

Laser Safety Caution

This product is classified as Class 1 of IEC 60825-1 Third edition 2014. This product is classified as RG3 of IEC/EN 62471-5 First edition 2015.

- This product complies with performance standards for laser products under 21 CFR Part 1040 except with respect to those characteristics authorized by Variance Number 2015-V-3435 effective on April 7 2016.

Obey the laws and regulations of your country in relation to the installation and management of the device.

- Outline of laser emitted from the built-in light module
Wave length: Blue 449–471 nm
Maximum power: Blue 385 W

CAUTION

CLASS 1 LASER PRODUCT

Use of controls or adjustments of procedures other than those specified herein may lead to hazardous laser radiation exposure.

- No direct exposure to the beam shall be permitted, RG3 IEC/EN 62471-5:2015.
Operators shall control access to the beam within the hazard distance and install the product at the height that will prevent exposures of spectators’ eyes within the hazard distance.
- Do not look into the lens while the projector is on. Serious damage to your eyes could result.
- Do not look at operating light source. Eye injury may result.
- Not for household use.
- Direct exposure of human eyes to beam is prohibited.
- The following graphic symbol indicating that looking into the projector is prohibited is displayed on the projector cabinet.

- Do not allow to look into the projector beam at any distance from the projector. An adult should supervise the children to prevent exposure risks.
- Check that there is no one looking at the lens, when using the remote control for starting the projector.
- Do not look at the projected light using optical devices (binoculars, telescopes, magnifying glasses, reflectors, etc). Doing so could result in vision impairment.
- When performing the lens shift adjustment, make sure that you are behind or beside the projector. Doing so from the front of the projector may cause intense light to enter into your eyes, resulting in damage to them.
- [WARNING: MOUNT ABOVE THE HEADS OF CHILDREN.] The use of a ceiling mount is recommended with this product to place it above the eyes of children.
- This projector, which is an RG3 product, is for business use and must be installed in location where safety is assured. For this reason, installation of the projector and mounting and removal of the lens unit must be performed by professional service personnel. To do the works, be sure to consult your dealer. NEVER install the projector by end users. Doing so may cause visual impairment and other injuries.
- Keep any items such as magnifying glass out of the light path of the projector. The light being projected from the lens is extensive, therefore any kind of abnormal objects that can redirect light coming out of the lens, can cause unpredictable outcome such as fire or injury to the eyes.
- When turning on the projector, ensure that nobody is facing towards the lens in the path of the light emitted from the laser.

- This product can only be operated in theaters by specified personnel. Customers should not operate this product.

Machine Noise Information Regulation - 3. GPSGV,

The highest sound pressure level is less than 70 dB (A) in accordance with EN ISO 7779.

WARNING

Operation of this equipment in a residential environment could cause radio interference.

FCC Information (for USA only)

WARNING

- The Federal Communications Commission does not allow any modifications or changes to the unit EXCEPT those specified by Sharp NEC Display Solutions of America, Inc. in this manual. Failure to comply with this government regulation could void your right to operate this equipment.
- This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Supplier's declaration of conformity

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

- (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

U.S. Responsible Party: Sharp NEC Display Solutions of America, Inc.
Address: 3250 Lacey Rd, Ste 500
Downers Grove, IL 60515
Telephone Number: 630-467-3000
Type of Product: Projector
Equipment Classification: Class A Peripheral
Model Number: NP-NC603L

WARNING

THE END USER IS NOT ALLOWED TO OPEN OR MODIFY THE PRODUCT.

NO USER SERVICEABLE PARTS.

MAINTAIN AND SERVICE OF THE PRODUCT IS ONLY TO BE HANDLED BY Sharp NEC Display Solutions AUTHORIZED TECHNICIANS.

Important Safeguards

These safety instructions are to ensure the long life of your projector and to prevent fire and shock. Please read them carefully and heed all warnings.

Installation

1. Do not point the projection beam toward other people or reflective objects.
2. Consult your dealer for information about transporting and installing the projector. Do not attempt to transport and install the projector yourself.
The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury.
3. Place the projector on a flat, level surface in a dry area away from dust and moisture. Tilting the front of the projector up or down from level could reduce laser life. Do not put the projector on its side when the laser is on. Doing so may cause damage to the projector.
4. Do not place the projector in direct sunlight, near heaters or heat radiating appliances.
5. Exposure to direct sunlight, smoke or steam could harm internal components.
6. Handle your projector carefully. Dropping or jarring your projector could damage internal components.
7. When moving the projector, be sure to remove the lens from the projector before moving it.
8. To carry the projector, a minimum of four persons are required.
9. Do not hold the lens part with your hand. Otherwise the projector may tumble or drop, causing personal injury.
10. Do not place heavy objects on top of the projector.
11. Turn off the projector, and disconnect the power cable before moving the projector.
12. The cooling fan settings need to be configured when using the projector in a location at an altitude of approximately 5500 feet/1600 meters or higher. Consult your dealer in advance.
13. Turn off the projector when removing and installing lenses. Failure to do so can cause loss of vision.
For mounting or replacing the lens, please contact your dealer.
14. Do not install and store the projector in the below circumstances.
Failure to do so may cause malfunction.
 - In powerful magnetic fields
 - In corrosive gas environment
 - Outdoors
15. If you wish to have the projector installed on the ceiling;
 - Do not attempt to install the projector yourself.
 - The projector must be installed by qualified technicians in order to ensure proper operation and reduce the risk of bodily injury.
 - In addition, the ceiling must be strong enough to support the projector and the installation must be in accordance with any local building codes.
 - Please consult your dealer for more information.
16. When moving the projector, check the following:
 - That the projector is turned off, the power plug is disconnected from the outlet
 - That the connector cable that connects the device to the projector is unplugged

Important Information

WARNING

1. Do not cover the lens with the supplied lens cap or equivalent while the projector is on. Doing so can lead to distorting or melting of the cap and burning your hands due to the heat emitted from the light output.
2. Do not place any objects, which are easily affected by heat, in front of the projector lens. Doing so could lead to the object melting from the heat that is emitted from the light output.
The following graphic symbol is shown on the projector cabinet.

When using the projector tilted in the forward or backward direction, use it in the range of (+15° to -15°) from horizontal. If you tilt it outside of this range or tilt it to the left or right, it may become damaged.

When installed on a floor or a desktop

Power Supply

1. The projector is so designed that it operates with the power supply voltage described below.
 - Projector
AC200–240V single phase 50/60Hz
Ensure that your power supply fits this requirement before attempting to use your projector.
 2. The power cable is not included with the projector. Ask your dealer for the power cable to select and purchase. Use a power cable that meets the standards and power supply voltage of the country where you are using the projector.
Refer to “2-2. Connecting the Power Cable” (page 22) for details on connecting the power cable.
 3. Handle the power cable carefully. A damaged or frayed power cable can cause electric shock or fire.
 - Do not bend or tug the power cable excessively.
 - Do not place the power cable under the projector, or any heavy object.
 - Do not cover the power cable with other soft materials such as rugs.
- Do not heat the power cable.
 - Do not change the arrangement of the installed power cable.
4. If the projector will not be used for an extended period of time, turn off the projector, and disconnect the power plug from the outlet.
 5. Placing the power cable and the signal cable closely to each other can cause beat noise. If this happens, keep the two separated so that beat noise is not generated. Beat noise is corruption of the picture often seen as a rolling band moving through the image.
 6. Do not touch the projector during a thunder storm. Doing so can cause electrical shock or fire.
 7. When installed on the ceiling, install the breaker in a location that is easy to reach by hand.

Fire and Shock Precautions

1. Ensure that there is sufficient ventilation and that vents are unobstructed to prevent potentially dangerous concentrations of ozone and the build-up of heat inside your projector. Allow at least 12 inches (30cm) of space between your projector and a wall. In particular, clear a space of 20 inches (50cm) or more in front of the air outlet on the rear surface.
2. Prevent foreign objects such as paper clips and bits of paper from falling into your projector. Do not attempt to retrieve any objects that might fall into your projector. Do not insert any metal objects such as a wire or screwdriver into your projector. If something should fall into your projector, turn off the projector, disconnect the power plug from the outlet and have the object removed by a qualified service person.
3. Turn off the projector, unplug the power cable and have the projector serviced by a qualified service personnel under the following conditions:
 - When the power cable or plug is damaged or frayed.
 - If liquid has been spilled into the projector, or if it has been exposed to rain or water.
 - If the projector does not operate normally when you follow the instructions described in this user's manual.
 - If the projector has been dropped or the cabinet has been damaged.
 - If the projector exhibits a distinct change in performance, indicating a need for service.
4. Keep any items such as magnifying glass out of the light path of the projector. The light being projected from the lens is extensive, therefore any kind of abnormal objects that can redirect light coming out of the lens, can cause unpredictable outcome such as fire or injury to the eyes.
5. Never remove or open the projector cabinet and never modify the projector. Otherwise, fire, electric shock, or leakage of laser light may cause visual impairment or burn injuries.
6. When using a LAN cable:
For safety, do not connect to the connector for peripheral device wiring that might have excessive Voltage.
7. Do not try to touch the air outlets on the projector during normal projector operation as it is hot.

Cleaning

1. Turn off the projector and unplug the power cable before cleaning the cabinet or replacing the laser.
2. During cleaning, turn off the projector, and disconnect the power plug from the outlet.
3. Clean the cabinet periodically with a cloth. If heavily soiled, use a mild detergent. Never use strong detergents or solvents such as alcohol or thinner.
4. Use a blower or lens paper to clean the lens, and be careful not to scratch or mar the lens.
5. Do not touch the projector or the power plug with wet hand. Doing so can cause electrical shock or fire.

CAUTION

1. Do not unplug the power cable from the wall outlet or projector when the projector is powered on. Doing so can damage the projector.
 - While projecting images
 - While cooling after the projector has been turned off.
(The POWER button LED blinks in green while the fan is rotating, and “cooling...” is displayed on the LCD screen.)
2. Do not turn of the AC power for 90 seconds after the laser is turned on and while the POWER indicator is blinking green. Doing so could cause premature laser failure.
3. Use of a wall outlet with a 20 A or more circuit breaker is recommended.
4. Keep hands away from the lens mounting portion while the lens shift is in operation. Failure to do so could result in fingers being pinched between the cabinet and lens cover.

Caution on Carrying the Projector/Handling the Optional Lens

The projector should always be carried by at least 4 people, holding the handles on the bottom. Remove the lens unit from the projector body when moving the projector. When installing / removing a lens, shut down the AC power to the projector.

When shipping the projector with the lens, remove the lens before shipping the projector. Always attach the dust cap to the lens whenever it is not mounted on the projector. The lens and the lens shift mechanism may encounter damage caused by improper handling during transportation.

Light Module

1. A light module containing multiple laser diodes is included in the product as the light source.
2. These laser diodes are sealed in the light module. No maintenance or service is required for the performance of the light module.
3. End user is not allowed to replace the light module.
4. Contact qualified distributor for light module replacement and further information.

Cable information

Use shielded cables or cables attached ferrite cores so as not to interfere with radio and television reception. For details, please refer to “2. Installation and Connection” in this user’s manual.

Installing the Projector

This projector is an RG3 product. The projector is for professional use and must be installed in location where safety is assured. For this reason, be sure to consult your dealer as installation and attachment/detachment of the lens unit must be performed by a professional service personnel. Never try to install the projector by yourself. This may result in visual impairment etc.

Connecting the power cord to earth

This equipment is designed to be used in the condition of the power cord connected to earth. If the power cord is not connected to the earth, it may cause electric shock. Please make sure the power cord is connected to the wall outlet directly and earthed properly.

Do not use a 2-core plug converter adapter.

Handling the power cord

- When connecting the power cord to the projector’s AC IN terminal, make sure the connector is fully and firmly inserted. Be sure to fix the power cord using the power cord stopper. Loose connection of the power cord could lead to fire or electric shock.
- Do not connect or disconnect the power cord with wet hands. Doing so could result in electric shock.

Lens shift, focus and zoom operations

- When shifting the lens or adjusting the focus or zoom, do so from either behind or to the side of the projector. If adjustments are performed from the front, your eyes could be exposed to strong light and get injured.
- Keep your hands away from the lens area when performing the lens shift operation. If not, your fingers could get caught in the gap between the cabinet and the lens.

(For Customers in U.K.)

IMPORTANT

- The wires in this mains lead are coloured in accordance with the following code:

GREEN-AND-YELLOW:	“Earth”
BLUE:	“Neutral”
BROWN:	“Live”
 - As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
 - The wire which is coloured GREEN-AND-YELLOW must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol \perp or coloured green or green-and-yellow.
 - The wire which is coloured BLUE must be connected to the terminal which is marked with the letter N or coloured black.
 - The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured red.
 - Ensure that your equipment is connected correctly. If you are in any doubt consult a qualified electrician.
- “WARNING: THIS APPARATUS MUST BE EARTHED.”**

Important Information

Disposing of your used product

EU-wide legislation as implemented in each Member State requires that used electrical and electronic products carrying the mark (left) must be disposed of separately from normal household waste.

This includes projectors and their electrical accessories. When you dispose of such products, please follow the guidance of your local authority and/or ask the shop where you purchased the product.

After collecting the used products, they are reused and recycled in a proper way. This effort will help us reduce the wastes as well as the negative impact to the human health and the environment at the minimum level.

The mark on the electrical and electronic products only applies to the current European Union Member States.

Outside the European Union

If you wish to dispose of used electrical and electronic products outside the European union, please contact your local authority and ask for the correct method of disposal.

For EU: The crossed-out wheeled bin implies that used batteries should not be put to the general household waste! There is a separate collection system for used batteries, to allow proper treatment and recycling in accordance with legislation.

According the EU directive 2006/66/EC, the battery can't be disposed improperly. The battery shall be separated to collect by local service.

For questions relating to unclear points or repairs

Contact your dealer or the following support branch for questions relating to unclear points, malfunctions and repairs of the product.

Label Information

Label A: Laser Explanatory and Risk Group / Lamp Safety Label

About the laser module used in the light source

- This product has a built-in laser module. Control and adjustment procedures other than those described in this document may result in exposure to hazardous laser radiation.
- This product is classified as a Class 1 of Laser Product Safety Standard JIS C 6802: 2018, IEC 60825-1 3rd Edition: 2014. This product is classified as Risk Group 3 of IEC/EN 62471-5 1st Edition: 2015.
- This product complies with performance standards for laser products under 21 CFR Part 1040 except with respect to those characteristics authorized by Variance Number 2015-V-3435 effective on April 7 2016.

[Overview of the built-in laser]
 Wave length: Blue 449–471 nm
 Maximum power: Blue 385 W

The explanatory label of the laser product is put on the top of the projector.

CLASS 1 LASER PRODUCT

⚠ WARNING RG3 PRODUCT

- No direct exposure to the beam shall be permitted.
- Do not look into the projector's lens. Serious damage to your eyes could result.
- Not for household use.
- Operators shall control access to the beam within the hazard distance and install the product at the height that will prevent exposures of spectators' eyes within the hazard distance.

RISK GROUP 3
WARNING
 DO NOT LOOK INTO THE BEAM.
 NO DIRECT EYE EXPOSURE TO THE BEAM IS PERMITTED.
 HAZARD DISTANCE: REFER TO THE MANUAL.

GRUPE DE RISQUE 3
MISE EN GARDE
 NE PAS REGARDER DIRECTEMENT DANS LE FAISCEAU.
 L'EXPOSITION DIRECTE DES YEUX AU FAISCEAU EST INTERDITE.
 DISTANCE A RISQUE: SE REPORTER AU MANUEL.

Laser radiation range/No entry range (HD: Hazard distance)

- The below table describes the radiation range of emitted light by the projector that is classified as Risk Group 3 (RG3) of IEC/EN 62471-5 First edition 2015.
- Please keep within bounds for installing the projector.
- Install a barrier for preventing human eyes from entering the RG3 area. For the barrier installation position, keep horizontal safety zone over 1 m from the RG3 area. In case to install the projector over head, keep at least 2 m (2.5 m for USA) distance between the floor surface and the RG3 area.
- This projector must be installed at a height that will prevent your eyes from being exposed within the RG3 zone. The equipment administrator (operator) must control the entry of viewers into the RG3 zone.

Important Information

When installed on a floor or a desktop

When installed on a ceiling

* If lens shift is utilized, please consider the shift of projected image according to the volume of lens shift.

CAUTION

Please heed all precaution for safety.

To install the projector

- For planning the layout of the projector, make sure to take safety measures instructed on the installation manual.
- In order to refuse danger, install either a wall outlet within easy reach for pulling out the power plug in emergency or a device as a breaker to shut down the power supply to the projector.
- Take safety measures preventing human eyes from entering the RG3 area.
- Considering the installation place, select an appropriate lens and secure safety zone that is determined for each lens. For operation on the powered projector as light adjustment, make sure appropriate safety measures have been taken.
- Check the validity of taken security measures if appropriate safety zone based on the installed lens is secured. Periodically check the validity and keep these results.
- Educate the administrator of the projector (operators) about safety before starting to operate the projector.
- This projector is an RG3 product. The projector is for professional use and must be installed in location where safety is assured. For this reason, be sure to consult your dealer as installation and attachment/detachment of the lens unit must be performed by a professional service personnel. Never try to install the projector by yourself. This may result in visual impairment etc.

To use the projector

- Instruct the administrator of the projector (operators) to perform inspections before powering on the projector. (Including the safety check against emitted light by the projector)
- Instruct the administrator of the projector (operators) to be in circumstances able to control the projector whenever the projector is powered on for an emergency.
- Instruct the administrator of the projector (operators) to keep the installation manual, user's manual and inspection records to a place where they can take these documents out easily.
- Instruct them to clarify if the projector is conformed to standards of each country and region.

What's in the Box? and the Names of the Projector Parts

1-1. Features

- **DLP Cinema® projector**

Complies with the strict projection standards defined by the Digital Cinema Initiatives (DCI) industry group in the United States using leading imaging technology. It also supports 3D projection and high frame rates (HFR).

- **Employs a long life laser light source**

The projector employs a newly developed laser light source offering excellent reliability and redundancy. Since the laser light source has a long life, this delivers low cost operation by removing the need for maintenance such as replacing and adjusting the light module over extended periods of time. Furthermore, it reduces the risk of the light source suddenly shutting off and leaving a black screen.

- **Delivers reduced installation space and increased freedom through a more compact and lightweight body**

The use of a 0.69" DLP cinema chip together with integration of the light module into the projector main unit both delivers a reduced installation area as well as improving the degree of freedom of installation, such as removing the need to connect to external ventilation ducting and supporting both pedestal-mounted and ceiling-suspended installation. A wide variety of optional lenses (sold separately) are also available for the projector in order to support a wide variety of installation methods (a lens is not mounted when the projector is shipped from the factory).

- **Equipped with easy to use functions**

(1) Lens memory function and light memory function that can be operated with one touch.

The projector is equipped with a lens memory function that can save the zoom position and shift position of the lens and a light memory function that can save the brightness setting separately for each input signal. This makes it possible to project using preconfigured settings simply by selecting the signal when projecting multiple different input signals each with different screen size and brightness settings (Refer to "6-9. Related products list" (page 78) for details on the lenses that support the lens memory function).

(2) Built-in automatic adjustment function that makes the brightness and color of the light source uniform

Degradation of brightness and variations in color that occur as the light source is used for longer periods of time are kept to a minimum (the period over which variations in brightness can be limited varies depending on the brightness setting).

1. What's in the Box? and the Names of the Projector Parts

(3) Frequently used titles can be registered in preset buttons

The projector has been equipped with 8 preset buttons that make it easy to select registered title (input signal). To this projector, 100 titles at most can be registered (input signal registration). Among the registered titles, any 16 titles can be assigned to the preset buttons.

(4) You can operate and configure the projector via a network from a PC

You can operate and configure the projector via a network from a PC by using the separately supplied software Digital Cinema Communicator (DCC) V2.

- **Advanced Dust Protection**

A dust control shield is arranged between each DMD chip of R, G and B, and the spectroscopic/condenser prism. It prevents dust and dirt in the air, and oily particles in smoke associated with event halls from coming into contact with the face of the DMD and causing operating problems.

- **Reduced running cost thanks to the use of metal filters**

The filters are made of metal, so they can be used repeatedly and do not have to be replaced when performing periodic cleaning.

This not only reduces running costs, but also contributes to preserving the environment since no spent filters are discarded.

1-2. What's in the Box?

Check the content of the accessories.

1-2-1. Projector

<input type="checkbox"/> Projector 	<input type="checkbox"/> Power cable stopper 
<input type="checkbox"/> Service Keys x 2 	<input type="checkbox"/> Important Information 
<input type="checkbox"/> Warranty (for Japan) 	

[TIP]
In the event that you did not receive all of the accessories outlined above, or some are damaged, contact your dealer/
distributor.
Differs slightly from the drawings in this manual, but there is no problem in actual use.
.....

1-3. Names of the Projector Parts

1-3-1. Front of the projector

1. SYSTEM status indicator

These indicate the status of the projector. When the projector is operating normally, these light/blink in green or orange. When an error occurs, they light/blink in red. When an error occurs, check the contents of the display on the LCD screen. (See page 61)

2. Main power switch

While AC power is being supplied, set the main power switch to ON position (1), then your projector will enter a standby state.

3. Power cable stopper

Prevents the power plug from falling out from the projector.

4. AC input

Connects to the AC power cable. The AC power cable is not an accessory. Consult with your dealer/distributor about the AC power cable.

5. Control panel

On the control panel, power to your projector is turned on or off, titles are selected, and various adjustments are made of projected screen. (See page 19)

6. Connection terminals

Various image signal cable are to be connected here. (See page 18)

You can expand signal input terminals by installing the optional board.

Contact your dealer/distributor for more information on separately sold optional products.

7. Air inlet

The air inlet for cooling inside the projector. Do not cover. An air filter is attached over the air inlet to prevent dust.

8. Remote interlock connector (inside front of projector)

This port is for safely using the laser in this device. It is used to externally control the laser illumination in the projector. Consult with your dealer/distributor about using this.

9. Lens (optional)

Images are projected from the lens. Request your dealer/distributor to install or replace the lens.

[NOTE] Do not cover the air inlets and outlet while the projector is in operation. Insufficient ventilation leads to a rise of the internal temperature and may cause a fire or malfunction.

1-3-2. Rear of the projector

1. Air inlet

The air inlet for cooling inside the projector. Do not cover. Air filters are attached over the air inlet to prevent dust.

2. Buzzer (inside rear of projector)

The buzzer rings when the power is turned on or an error has occurred.

3. Air outlet

The air outlet to exhaust heat inside the projector. Do not cover.

[NOTE] Do not cover the air inlets and outlet while the projector is in operation. Insufficient ventilation leads to a rise of the internal temperature and may cause a fire or malfunction.

1-3-3. Bottom of the projector

1. Handle (4 locations)

Handles for moving the projector.

2. Level adjusters (in 4 positions)

In the ordinary installation, you can adjust the projector inclination at 4 positions.

1. What's in the Box? and the Names of the Projector Parts

1-3-4. Connection terminals

1. Service terminal (REMOTE) (Stereo mini)

This terminal is used for service purpose only.

2. Ethernet port (LAN) (RJ-45)

The port for interfacing with an image signal server or controlling the projector from a PC via a network. Connect the projector and the PC with a commercially available Ethernet cable (10/100Base-T).

3. USB port (USB) (type A)

The port for the projector maintenance.

4. PC control terminal (RS-232) (D-sub 9P)

The terminal for operating the projector from a PC via an RS-232C or for service personnel to set data for the projector. Connect the projector and the PC with a commercially available RS-232C straight cable.

5. 3D terminal (3D) (D-sub 15P)

The terminal for connecting a 3D image system to the projector. (See page 77)

6. External control terminal (GP I/O) (D-sub 37P)

The terminal for externally controlling the projector or connecting a 3D image system to the projector. (See page 72)

7. Slot

The slot is used for an image media block (IMB). Contact your dealer/distributor for an installation of IMB.

Refer to the IMB instruction manual for details on IMB.

1-3-5. Control panel

1. ☀️ button (Light button)
Toggles ON and OFF the light on the control panel of the projector and the backlight on the LCD screen.
2. DOUSER indicator
Displays the douser open/close state. (See page 60)
3. TEMP. indicator
Displays the status of the temperature inside the projector. It blinks or lights up when the temperature inside the projector rises close to the operating temperature limit or exceeds the operating temperature. (See page 60)
4. LIGHT indicator
Displays the status of the light source. The indicators turn on when the light source is on and turn off when the light source is off. (See page 60)
5. POWER indicator
Displays the status of the power after the projector software has been started. (See page 60)
6. POWER (BOOT) indicator
Displays the status that the projector software is starting after the main power switch has been turned ON (see page 60). It goes off once the projector software startup and internal check are completed.
7. LCD screen
The LCD screen displays menus and setting values for the projector operations.
8. UP/DOWN/LEFT/RIGHT buttons
Press these buttons to select a menu item while a menu is displayed.
9. MENU button
Press this button to display the menu for various settings and adjustments. (See page 44)
10. ENTER button
Press this button to select the menu item.

1. What's in the Box? and the Names of the Projector Parts

11. EXIT button

Press this button to return to the previous menu item.

12. KEY LOCK button

Press this button to lock (KEY LOCK) the buttons on the control panel. Buttons on the control panel do not function while KEY LOCK is on.

Pressing the KEY LOCK button for one second or longer while KEY LOCK is off locks the buttons.

Pressing the KEY LOCK button for one second or longer while KEY LOCK is on unlocks the buttons. (See page 36)

[NOTE] KEY LOCK becomes automatically on if no control panel operation takes place in the standby state for 30 seconds by default. (See page 36)

13. ⏻ button (POWER button)

Press this button for more than three seconds to turn on or off (standby) the projector. (See page 60)

In order to start up the projector, turn on the main power switch for the projector to set the projector in the standby state. (See page 29)

14. DOUSER button

Press this button to open and close the douser. (See page 60)

15. ☀ button (LIGHT ON/OFF button)

Press this button for five seconds or longer to turn on or off the light source while the projector is on. (See page 37)

16. LIGHT button

Press this button to display the light source adjustment menu. (See page 35)

17. IMB button (planned to be supported in a future update)

This button is operable when the media block is installed in the projector.

Press this button to display the operation menu of the media block.

18. Play/pause button (planned to be supported in a future update)

This button is operable when the media block is installed in the projector.

Press this button to play or pause the image contents.

19. Stop button (planned to be supported in a future update)

This button is operable when the media block is installed in the projector.

Press this button to stop playing the image contents.

20. Preset buttons

Press the preset button to select a title (input signal) assigned to each button. Up to 100 titles (input signals) can be registered to this projector, and any 16 titles from them can be assigned to the preset button. Please request your dealer to register and change the titles of the buttons as required.

The preset button indicators show their assigned title or selection status. (See page 59)

.....
[TIP] To select a title allocated to one of the preset buttons, use the following procedure.

- To select a title allocated to one of "Preset Button1" to "Preset Button8"
Press the button which corresponds to the number of the preset button (button <1> to <8>).
 - Press the <1> button to select the "Preset Button1".
 - Press the <8> button to select the "Preset Button8".
 - To select a title allocated to one of "Preset Button9" to "Preset Button16"
Press the preset button (button <1> to <8>) while holding down the UP button.
 - Press the <1> button while holding down the UP button to select the "Preset Button9".
 - Press the <8> button while holding down the UP button to select the "Preset Button16".
-

2.

Installation and Connection

2-1. Steps for setting up and connecting

Use the following steps for setting up your projector:

- **Step 1**

Setup the screen and projector. (Contact your dealer to carry out the setup.)

- **Step 2**

Connect the power cable to the projector. (See page 22)

- **Step 3**

Connect cables to the image input terminals. (See page 27)

Connect cables to the various control terminals. (See page 27)

2-2. Connecting the Power Cable

The power cable is not included with the projector. Use a power cable that meets the standards and power supply voltage of the country where you are using the projector. Ask your dealer for the power cable to select and purchase.

WARNING

Carefully read the contents described in this section before connection and connect the cables according to the proper procedure. Inappropriate handling may cause fatal, serious or other bodily injuries due to fire or electric shock.

CAUTION

- Before connecting the power cables, check that the main power switch of the projector is turned off. Implement the connection with AC power shut off.
- Be sure to ground the equipment to ensure safety. Use a power cable that meets the standards and power supply voltage of the country where you are using the projector (page 69), and always connect the equipment to the ground. If the ground is not connected, it may cause electrical shocks.
- When connecting the power cable plugs to the AC IN and the electrical outlet, securely insert the plugs all the way in. If the connection between the power cable plug and the electrical outlet is loose, the plug area may generate heat, causing burns and accidents.

CAUTION

- This equipment is designed to be used in the condition of the power cord connected to earth. If the power cord is not connected to the earth, it may cause electric shock. Please make sure the power cord is connected to the wall outlet directly and earthed properly.
Do not use a 2-core plug converter adapter.

- [NOTE]
- Install the electric outlet nearby the projector main unit so that the power supply can be cut by unplugging the AC power cable.
 - When plugging in or unplugging the AC power cable, make sure that the main power switch is pushed to the [O] position. Failure to do so may cause damage to the projector.
 - Do not use a three-phase power supply. Doing so may cause malfunction.

1 Connect the AC power supply cable.

Connect the AC power supply cable to the projector.

2 Connect the power plug to the electrical outlet.

This completes the connection of the AC power supply cable.

2. Installation and Connection

Using the supplied power cable stopper

To prevent the power cable from accidentally removing from the AC IN of the projector, attach the supplied power cable stopper to clamp the power cable.

CAUTION

- To prevent the power cable from coming loose, make sure that all the prongs of the power cable are fully inserted into the AC IN terminal of the projector before using the power cable stopper to fix the power cable. A loose contact of the power cable may cause a fire or electric shock.
- Do not bundle the power cable. Doing this could cause heat or a fire.

- [NOTE]
- Do not clamp the power cable with other cables. Doing so can generate noise, which can affect adversely the signal cable.
 - Be careful not to insert the band inversely. Once the band is attached, it cannot be removed from the slot.

Attaching the power cable stopper

- 1** Insert the end of band of the power cable stopper into the slot next to the AC IN on the terminal panel.

- 2** Pass each band through the slits in the power cable stopper.

Pass the bands through them so that the power cable will be sandwiched from above and below.

3 Slide the clamber to the hilt of the power cable.

Pulling the knob in the arrow direction allows you to adjust the clamber position. Once the clamber position is adjusted, release the knob to lock the clamber.

4 Pull the band to hold the power cable.

Pulling the knob in the arrow direction allows you to adjust the band position. Pull the top and bottom bands by keeping their balance. Once the band position is adjusted, release the knob to lock.

This completes the attachment of the power cable stopper.

2. Installation and Connection

Removing the power cable from the power cable stopper

- 1 Pull the knob of the clammer and loosen the band.

- 2 Pull the knob and slide the clammer away from the power plug.

CAUTION

The projector may become hot temporarily when the power is turned off or if the AC power is disconnected while the projector is projecting. Take care when handling the projector.

2-3. Connecting the image input terminals

Refer to the instruction manual of the IMB for details on connecting the video input ports with external equipment.

2-4. Connecting the various control terminal

For control, your projector comes with such ports as the PC control terminal and the Ethernet port (RJ-45).

- PC control terminal (RS-232) ----- Use this terminal when controlling the projector in serial connection from a PC.
- LAN port (LAN) ----- Use this port when controlling the projector in LAN connection from a PC.

3.

Projection of Images (Basic Operation)

3-1. Steps of projecting images

- Step 1

Turn on the power to the projector. (See page 29)

- Step 2

Select the title of input signal. (See page 31)

- Step 3

Adjust the position and size of the projected screen. (See page 32)

- Step 4

Turn off the power to the projector. (See page 38)

3-2. Turning your projector on

WARNING

The projector produces a strong light. When turning on the power, operate from the side or rear of the projector (outside the Restriction Zone (HD)). Also, when turning on the power, make sure no one within the projection range is looking at the lens.

- Preparation:**
- Connect the power cable to the projector (see page 22).
 - Supply AC power to the projector.

- [NOTE]
- Turn off the main power switch to the projector when supplying or cutting AC power to the projector. Supplying or shutting down the AC power while the main power switch is on will damage the projector.
 - Turning on and off the projector involves a two-step operation; the “main power switch” and the “POWER button”.
 - Turning power on. (See this page)
 - [1] Turn on the “main power switch” of the projector.
Your projector is set in a standby state.
 - [2] If KEY LOCK is on, press the KEY LOCK button for one second or longer.
KEY LOCK is off and buttons on the control panel become operable.
 - [3] Press the POWER button three seconds or longer.
Your projector is turn on.
 - Turning power off. (See page 38)
 - [1] Press the POWER button three seconds or longer.
Your projector is set in a standby state.
 - [2] Turn off the “main power switch” of the projector.
Your projector is turned off.

1 Remove the lens cap.

2 Turn on the main power switch on the side of the projector.

A buzzer will ring on the projector. The POWER button indicator will blink green and the SYSTEM status indicator will light orange (standby state). KEY LOCK becomes automatically on if no control panel operation takes place in the standby state for 30 seconds by default. Buttons on the control panel do not function while KEY LOCK is on. (See page 36)

3. Projection of Images (Basic Operation)

5 If KEY LOCK is on, press the KEY LOCK button for one second or longer.

KEY LOCK becomes off. The KEY LOCK button indicator turns off and buttons on the control panel become operable. (See page 36)

6 Press the POWER button on the control panel of your projector three seconds or longer.

Your projector is turn on.

When the startup of the projector completes, the status of the POWER button, DOUSER button, LIGHT ON/OFF button, and preset button (button <1> to <8>) changes as follows.

POWER button	Lit green
DOUSER button	Initial settings: Off (douser is off)
LIGHT ON/OFF button	Initial settings: Blinking green (light source is off)
Button <1> to <8>	The preset button which was last selected is lit green

7 Press the LIGHT ON/OFF button on the control panel for three seconds or longer.

The light source is turned on and the screen glows light about 15 seconds later.

The LIGHT ON/OFF button indicator blinks in cycles of 2 (and changes to steady green light 90 seconds later).

The douser is closed until the screen glows light (the DOUSER button indicator lights green). When the douser is open, the DOUSER button indicator turns off.

- [NOTE]
- While your projector is on, be sure to have the lens cap and glass protector cap removed from the lens. Otherwise, the lens cap or glass protector cap may get deformed due to a heat buildup.
 - In the following instances, the power to your projector cannot be turned on even if you press the POWER button.
 - When the inside temperature is abnormally high. The protective function prevents power from turning on. Wait some time (until the projector inside cools down) and then turn on the power.
 - When the SYSTEM status indicator is blinking in red without the light source lighting up after power-on. Your projector may be in trouble. Check the error display on the LCD screen and contact your dealer/distributor for instructions.
 - When turning on the projector, ensure that nobody is facing towards the lens in the path of the light emitted from the laser.

3-3. Selecting the title of input signal

This projector allows you to select pre-registered title (input signal) using the preset buttons on the control panel (up to 16 titles). Request your dealer/distributor for details on registering and changing titles. This section explains the steps for selecting registered titles.

1 Turn on the power to the image devices connected to the projector.

2 Press the MENU button.

3 Press the LEFT/RIGHT button to display “Title Select” on the LCD screen.

At each press of the LEFT/RIGHT buttons, the display will cycle as “Title Select” ↔ “Configuration” ↔ “(Title Setup)” ↔ “Information.”

4 Press the DOWN button.

The title of the input signal is displayed.

- When you have made a wrong selection, press the UP button. A return will be made to the previous menu.

5 Press the LEFT/RIGHT buttons to display “Title of Signal to be Projected” on the LCD screen.

6 Press the ENTER button.

The title of the signal to be projected is selected.

- The (*) mark on the LCD indicates that this is the currently selected item.

3-4. Adjusting the position and the size of projected screen

3-4-1. Displaying the test pattern

- 1 Press the MENU button, or select a test pattern from preset buttons (button <1> to <8>).

If you register the test patterns to the preset buttons (<1> to <8> buttons), select the test pattern according to "3-3. Selecting the title of input signal (See page 31)".

- 2 Press the LEFT/RIGHT button to display "Title Select" on the LCD screen.

- 3 Press the DOWN button.

The title of the input signal is displayed.

- 4 Press the LEFT/RIGHT button to display "TEST Pattern" on the LCD screen.

- 5 Press the DOWN button.

The LCD screen enters the mode where you can select a test pattern.

- 6 Press the LEFT/RIGHT button.

This switches the test pattern name displayed on the LCD screen.

- 7** Display on the LCD the name of the test pattern to be projected, then press the ENTER button.

The test pattern is displayed.

To cancel the test pattern display, select the title of the signal to project or select the "OFF" test pattern.

3-4-2. Adjusting the position of the projected screen (Lens shift)

CAUTION

- Perform the adjustment from behind or from the side of the projector. If adjustments are performed from the front, your eyes could be exposed to strong light and get injured.

- 1** Press the MENU button.
- 2** Press the LEFT/RIGHT button to display "Configuration" on the LCD screen.
- 3** Press the DOWN button.
- 4** Press the LEFT/RIGHT button to display "Lens Control" on the LCD screen.
- 5** Press the DOWN button.

The screen ("Lens Position") to adjust the position of the projected screen is displayed.

- 6** Press the UP/DOWN/LEFT/RIGHT button.

The position of the projected screen moves in the selected direction.

3. Projection of Images (Basic Operation)

- 7 Press the EXIT button when adjustment is complete.

The display will return to a menu one level above (where "Lens Control" is displayed).

3-4-3. Adjustment of the size (zoom) and focus of the projected screen

- 1 Press the MENU button.
- 2 Press the LEFT/RIGHT button to display "Configuration" on the LCD screen.
- 3 Press the DOWN button.
- 4 Press the LEFT/RIGHT button to display "Lens Control" on the LCD screen.
- 5 Press the DOWN button.

The screen ("Lens Position") to adjust the position of the projected screen is displayed.

- 6 Press the ENTER button.

The screen to adjust the size and focus of the projected screen is displayed.

Press the ENTER button to switch the display between "Lens Position" and "Focus Zoom" adjustments.

- 7 Adjust the size and focus of the projected screen.

Press the UP/DOWN button to adjust the focus.

Press the LEFT/RIGHT button to adjust the size.

Focus
(UP/DOWN button)

Zoom
(LEFT/RIGHT button)

- 8 Press the EXIT button when adjustment is complete.

The display will return to a menu one level above (where "Lens Control" is displayed).

3-4-4. Adjusting the brightness of the projected screen (Light output)

[NOTE] If the internal temperature within the projector rises due to the temperature in the room being high, the light output may be automatically reduced. This is called "Thermal Protection Mode (Down Light Power)". When the projector is in the Thermal Protection Mode, the picture brightness decreases slightly. To clear Thermal Protection Mode, adjust the light output. Consult with your dealer/distributor for details.

1 Press the LIGHT button.

The screen to adjust the light output is displayed.

2 Press the LEFT/RIGHT button to adjust the light output.

The specified adjustment value is applied.

3-5. Preventing misoperations

Buttons on the control panel can be locked (KEY LOCK) to prevent misoperations. Buttons on the control panel do not function while KEY LOCK is on. KEY LOCK must be off to operate these buttons.

[NOTE]

- KEY LOCK is automatically turned on in the following cases.
 - When the projector has entered the standby state by turning on the main power switch of the projector while the AC power is supplied.
 - When the projector has entered the standby state after turning off the power using the POWER button.
- The timing where KEY LOCK is turned on while the projector is in standby state depends on the "Auto Key Lock" setting in the adjustment menu.
 - When Auto Key Lock is enabled, KEY LOCK becomes automatically on if no control panel operation takes place in the standby state for 30 seconds. KEY LOCK becomes automatically on again even after KEY LOCK is turned off if no control panel operation takes place for 30 seconds.
 - When Auto Key Lock is disabled, KEY LOCK becomes automatically on when the projector enters the standby state; however, it stays off after KEY LOCK is turned off.

3-5-1. KEY LOCK setting

- Press the KEY LOCK button on the control panel for one second or longer.

KEY LOCK becomes on. The KEY LOCK button indicator lights orange. When you press a button on the control panel of the projector while KEY LOCK is on, "Panel is Locked. (KEY LOCK)" is displayed, and the button will not function. (See page 40)

3-5-2. Turning KEY LOCK off

- Press the KEY LOCK button for one second or longer while KEY LOCK is on.

KEY LOCK becomes off. The KEY LOCK button indicator turns off.

3-6. Turning on/off the light with the projector turned on

3-6-1. Turning off the light

- Press the LIGHT ON/OFF button on the control panel for three seconds or longer.

3-6-2. Turning on the light

- Press the LIGHT ON/OFF button on the control panel for three seconds or longer.

3-7. Turning your projector off

- 1 Press the POWER button on the projector control panel for three seconds or longer.

The light is turned off, the POWER button indicator blinks green, and the STATUS indicator blinks orange (cooling state). The fan will continue to rotate while cooling, and the amount of time remaining for cooling is displayed on the LCD screen. The cooling-off time is 90 seconds.

When the cooling is finished, the POWER button indicator turns off and the status indicator lights orange (standby state). KEY LOCK becomes automatically on if no control panel operation takes place in the standby state for 30 seconds by default. Buttons on the control panel do not function while KEY LOCK is on. (See page 36)

- 2 Wait till the projector enters standby state before turning off the main power switch of the projector.

The POWER button indicator is turned off and the main power is turned off.

- 3 Turn off the AC power to the projector.

NOTE In the following instances, do not turn off the main power switch or disconnect the AC power. Doing so can damage the projector.

- While projecting images
- While the fan is running after the power is turned off
 - While the projector is cooling down after the power was turned off.
 - When using the IMB: 90 seconds
 - During IMB operation (when the projector is not in the standby mode)

4. Using Menus

4-1. Basic operation with adjustment menus

To adjust the projector, display the menu on the LCD screen of the projector control panel.

4-1-1. Screen display

The menu display screen is composed of a menu display field (the upper two lines) and a setting item display field (the bottom two lines).

← Displays the main menu or submenu.

← Displays submenu or selection items.

← Displays settings and selection status.

← Displays settings, selected items and information on selected menus.

The meanings of symbols in the menu display screen are outlined below.

	Indicates that there is a menu of a higher level. Press the UP button to return to a menu one level above.
	Indicates that there is a selected item or menu at the same level. Press the LEFT/RIGHT button to display other selected items or menus.
	Indicates that there is a menu of a lower level. Press the DOWN button to display the menu one level below.
	Indicates that there are setting items of a higher or lower level. Press the UP button to return to a menu one level above. Press the DOWN button to display the setting item one level below.

4. Using Menus

When not displaying menus, the following screen is normally displayed.

When in standby

When the projector is in a standby state (the main power switch in on), the following is displayed.

When power is turned on

When the power is turned on, the following is displayed.

When the power is turned off

When you press the POWER button on the control panel of the projector for 3 or more seconds, the projector starts cooling. When cooling finishes, the projector enters the standby mode. The amount of time remaining for cooling is displayed as shown below during cooling.

When a button is pressed while the key lock function is on

If a button on the control panel is pressed while the key lock function is on, the following is displayed and the button will not function.

4-1-2. Operating menus

Preparation: Turn your projector on. (See page 29)

- 1 Press the MENU button on the control panel of your projector.

The menu is displayed in the LCD screen.

- 2 Press the LEFT/RIGHT buttons to display "Information."

At each press of the LEFT/RIGHT buttons, the display will cycle as "Title Select" ↔ "Configuration" ↔ "(Title Setup)" ↔ "Information."

- 3 Press the DOWN button.

The submenu "Light Output" of "Information" is displayed.

The menu item can be selected by pressing the ENTER button instead of the DOWN button.

To return to the previous state, press the UP button, or the EXIT button.

- 4 Press the LEFT/RIGHT button to select the submenu "Version."

At each press of the LEFT/RIGHT button, the display will cycle as "Light Output" ↔ "Lens Type" ↔ "Preset Button" ↔ "Usage" ↔ "Error Code" ↔ "Version" ↔ "IP Address" ↔ "Setup Date" ↔ "Option Status."

- 5 Press the DOWN button.

The submenu "System" another rank lower than "Version" is displayed.

4. Using Menus

6 Press the DOWN button.

The submenu “BIOS” another rank lower than “Model” is displayed.

7 Press the LEFT/RIGHT button to select the submenu “Release Package.”

At each press of the LEFT/RIGHT button, the display will cycle as “Model” ↔ “Serial No.” ↔ “Release Package” ↔ “Kernel” ↔ “U-Boot” ↔ “System Files” ↔ “Cinema Firmware” ↔ “Cinema Data” ↔ “ICP Firmware” ↔ “ICP ConfigFile” ↔ “FMT FPGA” ↔ “Secure Processor” ↔ “Slave BIOS” ↔ “Slave Firmware” ↔ “Slave Data” ↔ “SSL FPGA” ↔ “LD Driver1” ↔ “LD Driver2” ↔ “LD Driver3” and each version information is displayed.

8 Press the UP button several times.

At each press of the UP button, the display will return to a menu one level above.

4-1-3. How to enter alphanumeric characters

Alphanumeric characters are entered for items, such as the log file of the specified period is written to USB memory. (See page 64)

Characters can be entered by pressing numeric buttons on the control panel on this projector.

Characters can be entered by pressing each button as shown in the following table.

- To delete a character during entry, press the DOWN button.

[Example of Entry]

To enter "XGA" for example, use the following procedure:

- (1) Press the "8" button three times.
V → W → X
- (2) Press the RIGHT button.
XG
- (3) Press the "3" button.
XG3
- (4) Press the RIGHT button.
XGA
- (5) Press the "1" button.
XGA

Button	Entered character
1	A → B → C → 1 → a → b → c → ! → ↑
2	D → E → F → 2 → d → e → f → " → ↑
3	G → H → I → 3 → g → h → i → # → ↑
4	J → K → L → 4 → j → k → l → \$ → ↑
5	M → N → O → 5 → m → n → o → % → ↑
6	P → Q → R → 6 → p → q → r → & → ↑
7	S → T → U → 7 → s → t → u → ' → ↑
8	V → W → X → 8 → v → w → x → (→ ↑
LIGHT	Y → Z → / → 9 → y → z → ? →) → ↑
IMB	* → , → . → 0 → ; → : → + → - → ↑

4-2. Table of adjustment menus

Menus in parentheses are menus for our service personnel. Normally, these menus cannot be used.

Main menu	Submenu		Description	Reference page	
Title Select	"Title Memory Name"		Selects the title of the signal to be projected.	45	
	TEST Pattern		Selects the test pattern to be projected.	45	
Configuration	Light Setup	Adjust	Adjusts light brightness.	46	
	Lens Control	Lens Position	Adjusts the position of the projected screen.	46	
		Focus Zoom	Adjusts the size and focus of the projected screen.	46	
	Reset	(FactoryDefault)		Returns the settings to their default values. Selects between preset buttons and titles only, LAN settings only and all settings.	-
		Filter Cleaning		Initializes the air filter usage time (for confirming the filter cleaning time).	47
		(Fan Usage)		Initializes the usage time of the fan.	-
		(Light Usage)		Initializes the usage time of the light source.	
		(Phosphor)		Initializes the usage time of the phosphor.	
		(Diffuser)		Initializes the usage time of the diffuser.	
	(Setup)	Douser Setup		Sets the douser open/close state.	-
		Panel Key Lock		Locks the buttons on the projector's control panel so that they cannot be operated.	-
		Auto Key Lock		Enables or disables Auto Key Lock.	-
		3D Reference		Sets the signal input terminal for a 3D image system (3D terminal or GPI/O terminal). Sets the video input port for 3D video systems.	-
		Off Timer		Sets the time until the projector power is turned off automatically.	-
		Message		Sets the time to display the message indicating the light replacement cycle, air filter replacement cycle, and air filter cleaning cycle.	-
		Silent Mode		Selects whether to use the status indicator, buzzer, indicators on the control panel and backlight.	-
		Installation (Note)	(Option Slot)		Configures the device installed in slot (only when the projector is in standby mode).
	(Orientation)			Sets the projection method and cooling fan operating mode.	-
	Lens Type (Note)			Sets the type of lens (supports or does not support the lens memory function) attached to the projector.	-
	Lens Calibrate (Note)			Performs calibration on lens that support the lens memory function (only when the projector power is turned on).	-
	Lens Center (Note)			Moves the lens shift position to the center (only when the projector power is turned on).	-
	(Baudrate)			Sets the PC control connector (RS-232) data transmission speed (bps).	-
	(Date/Time)			Sets the date and time on the projector.	-
	(Fan Speed Mode)			Sets the cooling fan operating mode.	-
	(Memory)	Light		The content of the selected light memory (light output power value) can be overwritten with the current settings.	-
		Lens		The content of the selected lens memory can be overwritten with the current settings.	-
	(Title Setup)	Preset Button	Preset Button 1–16	Sets the title to be assigned to the preset buttons (<1> to <8> buttons).	48
	Information	Light	Light Output	Displays the light module's brightness (output) setting value.	48
			S/N	Displays the serial number of the light module.	48
		Lens Type		Displays the lens type setting.	48
		Preset Button	Preset Button 1–16	Displays the titles which are assigned to the preset buttons (<1> to <8> buttons).	49
		Usage		Displays information related to projector usage.	49
Error Code		Displays the currently occurring error.	49		
Version		System	Displays the model name and various version information about the projector.	50	
		IMB	Displays the vendor name and version information about the media block (IMB).	50	
IP Address		System	Displays the IP address of the projector.	50	
Setup Date		Displays the date when the projector was set up (starting date of the warranty period).	51		
Option Status		Displays the link status of the device mounted in slot and projector.	51		

(Note) Requires logging into the projector with Advanced User or higher privileges.

4-3. Title Select

4-3-1. Title select (Title Memory)

Selects the title of the signal to be projected.

You can register up to 100 titles. You can also assign registered titles to the preset buttons (<1> to <8> buttons) on the projector's control panel and call them up directly using those buttons.

Request your dealer/distributor for details on registering and changing titles.

← Displays the currently selected item with asterisk (*).

← Selects the title to be projected.

4-3-2. Test Pattern

Selects the test pattern to be projected.

← Displays the currently selected item with asterisk (*).

← Selects the test pattern to be projected.

OFF, Alignment, Cross Hatch, Convergence, Red, Green, Blue, White, Black,
White 50% [IRE], H-Ramp, Logo, MCG CG-TEST

4-4. Configuration

Please request your dealer/distributor to perform the settings.

4-4-1. Light Setup

Adjust

Adjusts the light output (brightness).

← Displays the current output power value (%) when the light rated output is 100%.

4-4-2. Lens Control

Adjust the position, size, and focus of the projected screen.

Press the ENTER button to switch the display between "Lens Position" and "Focus Zoom" adjustments. Press the EXIT button to return to a menu one level above.

Lens Position

Adjusts the position of the projected screen.

The projected screen moves in the selected direction as you press the UP/DOWN/LEFT/RIGHT button.

Focus Zoom

Adjusts the size (Zoom) and focus (Focus) of the projected screen.

Press the UP/DOWN button to adjust the focus.

Press the LEFT/RIGHT button to adjust the size of the projected screen.

4-4-3. Reset

Filter Cleaning

Resets the air filter usage time (for confirming the filter cleaning time).

- [1] Press the ENTER button, the confirmation screen will appear.
- [2] Select "Yes" in the confirmation screen, and then press the ENTER button to reset the filter usage time.

← Press the ENTER button to display the confirmation screen.

4-5. Title Setup

Sets the title to be assigned to the preset buttons (<1> to <8> buttons) (up to 16 titles).
Request your dealer/distributor to perform the settings.

4-6. Information

Displays the hours of light use, the version information and error codes.

4-6-1. Light

Displays the light source information.

← Displays the current setting (%).

Output	Displays the output setting value (%).
S/N	Displays the serial number of the light module.

4-6-2. Lens Type

Displays the current lens type setting.

← Displays the current lens type setting.

Without Sensor	Using a lens unit that does not support the lens memory function.
With Sensor	Using a lens unit that supports the lens memory function.

4-6-3. Preset Button

Sets the title to be assigned to the preset buttons (<1> to <8> buttons) on the projector's control panel.

- ← Selects the preset button number whose contents you want to display.
- ← Displays the assigned title numbers.
- ← Displays the registered names of the assigned titles.

TIP To select a title allocated to one of "Preset Button9" to "Preset Button16", press the preset button while holding down the UP button. For example, to select the title allocated to "Preset Button9", press the <1> button while holding down the UP button.

4-6-4. Usage

Displays information related to the projector usage, such as the usage time of the projector, light, air filters, and fan, and information about the light replacement cycle.

- ← Selects the item to display.
- ← Displays information about the selected item.

Projector	Displays the usage time of the projector. The upper row shows the usage time including standby mode while the lower row shows the usage time not including standby mode.
Light	Displays the usage time of the light.
Phosphor	Display of the usage time of the phosphor and the value that is displayed is the amount of usage time remaining (approximate).
Diffuser	Display of the usage time of the diffuser and the value that is displayed is the amount of usage time remaining (approximate).
Filter Cleaning	Displays the usage time of the air filter.
Fan Usage	Displays the usage time of the fan.

4-6-5. Error Code

Displays the error code when an error occurs.

- ← Displays the code of the error currently occurring.
- ← Displays the name of the error currently occurring.

When multiple errors occur, you can display them by pressing the LEFT/RIGHT buttons.

4. Using Menus

4-6-6. Version

Displays version information about the projector, optional boards, and IMB.

System

Displays the version information of the projector.

- Model
- Serial No.
- Release Package
- Kernel
- U-Boot
- System Files
- Cinema Firmware
- Cinema Data
- ICP Firmware
- ICP ConfigFile
- FMT FPGA
- Secure Processor
- Slave BIOS
- Slave Firmware
- Slave Data
- SSL FPGA
- LD Driver1
- LD Driver2
- LD Driver3

IMB

Displays the vendor name and version information about the media block (IMB). When the projector is in standby mode, the vendor name is blank and the version information displays "---".

4-6-7. IP Address

Displays the IP address set in the projector.

System	Displays the IP address set for the projector (System).
--------	---

4-6-8. Setup Date

Displays the date when the projector was set up (starting date of the warranty period).

← Displays the date when the projector was set up (starting date of the warranty period).

4-6-9. Option Status

Displays the link status of the device mounted in slot on the projector. The device name is displayed in () when the projector is in standby or when connection to the device cannot be confirmed.

← Displays the link status of the device in slot.

- <Vendor Name> IMB: Media block
- No Board: No device mounted

5.

Maintenance of Your Projector

[NOTE] Please request your dealer to perform cleaning of the projector inside.

5-1. Cleaning the Cabinet

 **WARNING**

Pull out the power plug from the power outlet before cleaning the cabinet.

 **WARNING**

Please do not use a spray containing flammable gas to remove dust attached to the cabinet, etc. Doing so may result in fires.

- Wipe with a dry, soft cloth without nap.
When the cabinet is excessively dirty, wipe with cloth well wrung after being dampened with a neutral detergent diluted with water and then finish up with a dry cloth.
When you use a chemical dust cloth, follow the instructions in the manual attached to it.
- Do not use a solvent, such as thinner or benzene. The coating may deteriorate or peel off.
- When removing dust on the ventilation opening, suck it off using an adapter with a brush on a vacuum cleaner. Never allow the cleaner without an adapter to come into direct contact or use a nozzle adapter in cleaning.
- Clean the ventilation opening at regular intervals. Dust, if allowed to accumulate there, may cause heating inside, which leads to functional trouble. The interval, which can vary with the location of your projector, is about 100 hours.
- Do not damage the cabinet by scratching it or allowing hard objects to hit it. This can scratch the projector.
- Consult your dealer/distributor about cleaning the inside of the projector.

[NOTE] Do not allow insecticide or other volatile liquid to splash on the cabinet, lens or screen. Also, do not allow any rubber or plastic object to remain in contact with the cabinet for a long time. The coating may deteriorate or peel off.

5-2. Cleaning the Lens

Clean the lens the same way as with camera lens (using a commercially available camera blower or cleaning paper for glasses). Take care not to damage the lens when cleaning.

WARNING

Pull out the power plug from the power outlet before cleaning the lens.

WARNING

- Do not look into the light module while the projector is ON. Strong light is emitted from the projector and visual impairment could result.
- Please do not use a spray containing flammable gas to remove dust attached to the lens, etc. Doing so may result in fires.

5-3. Cleaning the Air Filters

Air filters are provided on the projector's air intakes to prevent dust from entering the projector. Clean the air filters regularly to maintain the performance of the projector.

The air filters of the unit are metal air filters. They can be used over and over again if properly cleaned.

- The usage time of the air filters can be checked at “Information” - “Usage” (page 52) on the adjustments menu.

WARNING

Pull out the power plug from the power outlet before cleaning the air filters.

WARNING

- If dust accumulates on the air filters, air intake to the projector will be insufficient and the internal temperature will rise, leading to fire or malfunction.
- Do not use a flammable gas spray to remove dust from the filters. Doing so may lead to fire.

CAUTION

- Before cleaning the air filters, turn off the power, wait for the cooling fan to come to a complete stop, turn off the projector power switch and the light power switch, interrupt the AC power supply, and make sure that the projector has cooled sufficiently. Removing the filter units during operation may cause burns or electric shock if the inside is touched.

Air inlet
(Filter cover / Filter)

Air inlet
(Filter cover / Filter)

Air outlet

There are 4 air filters.

[NOTE]

- Do not wash the air filter in water. Doing so will cause the dust to clog the holes, reducing intake performance.
- Do not bend the air filter. Doing so could damage it, rendering it unusable.
- Clean the air filter at 4 locations at the same time. If you clean only one or two places, the correct filter usage time will not be displayed on the adjustments menu.

5-3-1. Cleaning the Air Filters

Preparation: Have a Phillips head screwdriver ready.

1 Remove the filter cover.

1. Twist the knob to the left until it turns without resistance.

2. Open the filter cover and remove it.

- The knob does not come off.
- If the knob will not turn, use a Phillips head screwdriver.

2 Undo the lock lever on the filter cover and remove it.

If the filter gets caught on the filter cover, press the filter cover down slightly and it will come out.

**3** Clean all the dust from the filters using a vacuum cleaner.

Carefully remove the dust from the filter covers as well as from both sides of the filter.

Remove the dust from the grates on the outside of the projector as well.

Some intake vents do not have grates. Be sure to also remove any dust stuck to the louver (blind with angled horizontal slats) with a vacuum cleaner.

**[NOTE]**

- Whenever you vacuum the filter, use the soft brush attachment to vacuum. This is to avoid damage to the filter.
- Do not wash the filter with water. Doing so can result in damage to the filter membrane and also cause clogging.

5. Maintenance of Your Projector

4 Fit the filter inside the filter cover.

Slide slowly the filter in, and close the lock lever.

5 Fix the filter inside the projector unit.

1. Snap the filter cover tabs into the cutout portion of the projector unit to secure it.
2. Turn the knob to the right to fix it in place.

6 Clean the other intake vent air filters in the same way.

[NOTE]

- Before turning on the power, make sure that all filter covers are in place. If they are not fitted properly dust could get inside the projector causing it to malfunction.
- Reset "FilterCleaning Time" after cleaning the filters. (See this page)

5-3-2. Resetting the Air Filter Usage Time

- 1** Turn on the power to the projector.
- 2** Reset the displayed message by selecting “Configuration” → “Reset”.
Select “Configuration” → “Reset” → “Filter Cleaning” in the adjustment menu. “FilterCleaning Time” message on the LCD screen is turned off.

This completes resetting the air filter usage time.

6.

Appendix

6-1. Troubleshooting

Before asking for repair, please check your connection, settings and operation once again. If the trouble cannot be corrected, please contact your dealer/distributor for instructions or repair.

6-1-1. Problems and where to check

Problem	Check these items
The projector cannot be turned on.	Check to see if AC power is supplied to the projector.
	Make certain that the main power switch is ON.
	Check to see whether the panel key lock function is activated. If so, the main unit's control buttons are locked and do not work.
	Is the temperature inside the projector too high? When the inside temperature is too high, the protective function does not allow your projector to be turned on. Wait some time and then turn it on.
The image cannot be projected.	Check to see if the connected input has been selected.
	Check to see if a cable is properly connected to the input terminal.
	Check to see whether the douser is closed.
	Check to see if the settings are all adjusted properly.
The image is distorted.	Check to see if the projector is properly set up.
The image is blurred.	Make certain that the lens is properly focused.
	Check to see if the screen and a projector are installed at correct angles.
	The projection distance may be larger than the focusing range.
	See if the lens and other parts have condensation on them. If the projector is turned on in a warm place after storage in a cold place, the lens and other optical components inside may develop condensation. In such a case, please wait several minutes until the condensation disappears.
Video image is disturbed.	Check whether the signal cable connected to the projector is disconnected.
The STATUS indicator blinks in red.	Your projector may have trouble. Please contact your dealer/distributor for instructions.
An error code is displayed.	Please contact your dealer/distributor for instructions.

6-2. Indicator display list

See the descriptions below when the buttons on the control panel or the STATUS indicator on the rear of the projector is lit or blinking. The projector also has a warning function that uses a buzzer.

6-2-1. Preset buttons

Indicator condition		Projector condition	Note
Off		No title is assigned to the button.	-
Steady light		A title is assigned to the button.	-
	Green	The title is being selected.	-
	White	The title is not selected.	-

6-2-2. KEY LOCK button

Indicator condition		Projector condition	Note
Off		The key lock is off.	-
Steady light	Orange	The key lock is on.	-

6. Appendix

6-2-3. DOUSER indicator

Indicator condition		Projector condition	Note
Steady light	Green	The douser is closed.	-
Off		The douser is opened.	-

6-2-4. TEMP. indicator

Indicator condition		Projector condition	Note
Steady light	Red	The projector temperature rises close to the operating temperature limit.	An error message is displayed in the LCD screen. Check the content of the error.
Blinking light	Red	The projector temperature exceeded the operating temperature.	An error message is displayed in the LCD screen. Check the content of the error.

6-2-5. LIGHT indicator

Indicator condition		Projector condition	Note
Off		The light source is off.	-
Blinking light	Green	The ON/OFF of the light source cannot be operated.	-
Steady light	Green	The light source is on.	-

6-2-6. POWER indicator

Indicator condition		Projector condition	Note
Off		The projector power supply is off.	-
Blinking light	Orange	While the projector software is starting	Wait for a moment.
	Green (cycles of 1) (Note 1)	Preparing to turn power on/cooling fan rotating (State from turning the power off to entering standby mode).	Wait for a moment.
	Green (cycle of 3 seconds) (Note 2)	When the sleep timer is activated	-
Steady light	Green	The projector is turned on.	-
	Orange	The projector is in standby.	-

(Note 1) Repeats 0.5 seconds on → 0.5 seconds off.

(Note 2) Repeats 2.5 seconds on → 0.5 seconds off.

6-2-7. POWER (BOOT) indicator

Indicator condition		Projector condition	Note
Steady light	Blue	While the projector software is starting	Wait for a moment.
Blinking light	Blue		Wait for a moment.
Off		The projector power supply is on, or the projector is in standby.	-

6-2-8. STATUS indicator

SYSTEM status indicator

Indicator condition		Projector condition	Note
Off		Main power is off.	-
Blinking light	Green	The projector is getting ready to turn on. The douser is closed. The light is off.	Wait for a moment.
	Orange	The projector is cooling down.	Wait for a moment.
	Red (With buzzer)	Safety problem, error.	An error message is displayed in the LCD screen. Check the content of the error.
	Red (Without buzzer)	Error with possible image project under certain conditions.	
Steady light	Green	The projector is turned on.	-
	Orange	The projector is in standby.	-
	Red	Error at a level with not affect on projection.	An error message is displayed in the LCD screen. Check the content of the error.

6-3. Operation using an HTTP browser

6-3-1. Overview

The use of HTTP server functions will allow control of the projector from a web browser.

This device uses “JavaScript” and “Cookies” and the browser should be set to accept these functions. The setting method will vary depending on the version of the browser. Please refer to the help files and the other information provided in your software.

[NOTE] The display's or button's response can be slowed down or operation may not be accepted depending on the settings of your network.
Should this happen, consult your network administrator.
The projector may not respond if its buttons are repeatedly pressed in rapid intervals. Should this happen, wait a moment and repeat.
Access is gained to the HTTP server functions by and specifying
`http://<the projector's IP address>/index.html`
in the entry column of the URL.

6-3-2. Preparation before use

Make network connections and set up the projector and confirm that it is complete before engaging in browser operations.

Operations with a browser that uses a proxy server may not be possible depending on the type of proxy server and the setting method. Although the type of proxy server will be a factor, it is possible that items that have actually been set will not be displayed depending on the effectiveness of the cache, and the contents set from a browser not be reflected in operation. It is recommended that a proxy server not be used unless it is unavoidable.

6-3-3. Handling of the address for operation via a browser

Regarding the actual address that is entered for the address or entered to the URL column when operation of the projector is via a browser, the host name can be used as it is with the host name corresponding to the IP address of the projector has been registered in the domain name server by a network administrator, or the host name corresponding to the IP address of the projector has been set in the “HOSTS” file of the computer being used.

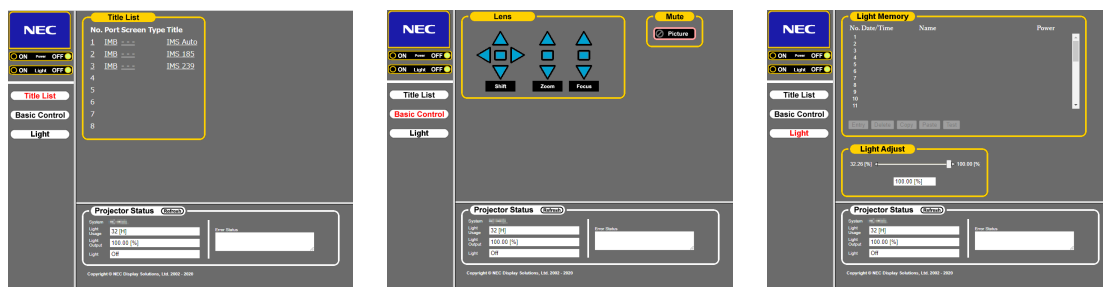

(Example 1) When the host name of the projector has been set to “pj.nec.co.jp”

`http://pj.nec.co.jp/index.html` is specified for the address or the entry column of the URL to access HTTP server functions.

(Example 2) When the IP address of the projector is “192.168.10.10”

`http://192.168.10.10/index.html` is specified for the address or the entry column of the URL to access HTTP server functions.

6-3-4. Structure of the HTTP server

Power	Controls the power to your projector. <ul style="list-style-type: none"> • On: Turns the power on. • Off: Turns the power off. 	
Light	Turn the light on/off. <ul style="list-style-type: none"> • On: Turns the light on. • Off: Turns the light off. 	
Title List	Displays titles set in the projector (such as input port, screen type, and title). Check, and the title will be changed.	
Basic Control	Displays the basic control items.	
Lens	Shift	<ul style="list-style-type: none"> ▲ : Shifts the projected screen upward. ▼ : Shifts the projected screen downward. ◀ : Shifts the projected screen leftward. ▶ : Shifts the projected screen rightward. ■ : Stops the shifting. Shifting can also be stopped by clicking the same button one more time.
	Zoom	<ul style="list-style-type: none"> ▲ : Zooms up the lens. ▼ : Zooms down the lens. ■ : Stops the zooming. Zooming the can also be stopped by clicking the same button one more time.
	Focus	<ul style="list-style-type: none"> ▲ : Focuses up the lens. ▼ : Focuses down the lens. ■ : Stops the focusing. Focusing can also be stopped by clicking the same button one more time.
Mute	Picture	Click and the douser closes and the projected picture disappears. Click once again and the picture will be projected again.
Projector Status	Displays the condition of the projector. <ul style="list-style-type: none"> • Light Usage: Displays the hours of light use. • Light Power: Displays light output (%). • Light Status: Displays the status of the light (On: Lights / Off: Off). • Error Status: Displays the status of errors occurring within the projector. • Refresh: Updates the display of the following conditions. 	
Light Memory	Entry	Saves the current light output value in the memory.
	Delete	Deletes the memory selected in the list from the Light Memory.
	Copy	Copies the memory selected in the list.
	Paste	Saves/overwrites the copied memory to the selected memory in the list.
	Test	Tests the adjustment value of the memory selected in the list.

6-4. Writing of the log file (Save Information)

Log files saved on the main unit can be written to USB memory connected to the USB port of the main unit. To perform the writing of the log file, use the following procedure.

1 Connect the USB memory to the USB port of the main unit.

Wait until the USB memory is recognized, and it enters the condition in which it can be used (5 or more seconds). For details, refer to the instruction guide of the USB memory.

2 Simultaneously press the UP button and ENTER button.

The "Save Info." screen is displayed.

TIP If you press the EXIT button during operation, operation is stopped and the display returns to the normal screen.

3 Press the LEFT/RIGHT button, and select the log file writing period.

The items that can be selected are as follows.

Today	Writes today's log files.
7days	Writes 7 days' log files from today.
30days	Writes 30 days' log files from today.
2years	Writes 2 years' log files from today.
Manual	Writes the specified period's log files.

4 Press the ENTER button.

When "Today", "7days", "30days" or "2years" is selected, the log file writing period is displayed.

← The log file writing period is displayed.

When "Manual" is selected, specify the log file writing period. For how to enter numerals, refer to "4-1-3. How to enter alphanumeric characters" (See page 43). If you press the ENTER button, the display advances to the following screen.

```

** Save Info. **
  Date Filter
  From Date
[2016/03/18 Fri]

```

← Enter the date/time to start writing.

Press the ENTER button.

```

** Save Info. **
  Date Filter
  To Date
[2016/12/21 Wed]

```

← Enter the date/time to stop writing.

Press the ENTER button.

```

** Save Info. **
2016/03/18 Fri
2016/12/21 Wed
◀ Execute ▶

```

← The log file writing period is displayed.

- 5** Confirm the log file writing period, press the LEFT/RIGHT button to select "Execute", and press the ENTER button.

The log files of the specified period are written to the USB device. When writing completes, the following screen is displayed.

```

** Save Info. **
  Complete(USB)
  <OK>
*****

```

- TIP** If you select "Cancel" and press the ENTER button, the writing of log files is stopped, and the display returns to the normal screen.

- 6** Press the ENTER button.

The display returns to the normal screen.

```

|Light| 100H|
|      |100.00%|
|      |Title|
|      |292-A|

```

- 7** Remove the USB from the USB port of the main unit.

6. Appendix

6-4-1. Names of log files

Written log files are saved with the following file names.

(Model name)_(Serial Number)_YYMMDDHHmm.txt

(Model name)	This shows the model of projector.
(Serial Number)	This shows the serial number of projector.
YYMMDDHHmm	Shows the date/time when written. YY: Year (lower 2 digits) MM: Month (2 digits) DD: Date (2 digits) HH: Hour (2 digits) mm: Minute (2 digits)

For example, if NC603L log file is written at 14:05 on November 10, 2016, it is saved with the "NC603L_abcd1234_1611101405.txt" file name.

6-5. Outline Drawing

6-5-1. Projector

The screws specifications for Ceiling Mount:

Screw type : M6

Screw hole dimension on the projector :
M6 with the maximum depth 10 mm

Units: mm

6-6. Specifications

Model name	NP-NC603L
Projection method	3 chip DLP Cinema® method 0.69-inch DC2K chip
Panel resolution	2048 x 1080
Light type	Laser diode
Screen sizes	Max. 11 m @14ft-L / Screen Gain 1.8 (Depends on setup conditions)
Contrast ratio	1650:1 with DCI specified color representation
Lens adjustment function	Motorized lens shift (vertical/horizontal), motorized zoom, motorized focus, douser
Signal input ports	When shipped from factory: Empty (for mounting optional components) (Note 1)
External Control	RS-232C (D-sub 9pin) x 1 GPIO port (D-sub 37 pin) x 1 Service terminal (stereo mini jack) x 1 3D CTL (D-sub 15 pin) x 1 USB (Type A) x 1 Interlock port x 1 Ethernet port (RJ-45 10/100Base-T) x 1
Power supply voltage	AC 200 to 240 V, 50/60 Hz single phase
Input current	7.4A (Note 3)
Power consumption	890 W (200V) (Note 2)
Cooling method	Air cooling system
Noise level	39 dB (Note 2)
Installation	Orientation: Desktop/front, Desktop/rear, Ceiling/front, Ceiling/rear
Net weight	59 kg (Excluding lens)
Dimensions	680 mm (W) x 860 mm (D) x 310 mm (H) (Does not include protruding portions and feet.)
Environment	Operating temperature: 10 to 35°C Operating humidity: 10 to 85% (non-condensing) Storage temperature: -10 to 50°C Storage humidity: 10 to 85% (non-condensing) Operating altitude: 0 to 3,000 m/10,000 feet

(Note 1) The video input slots are empty when the device is shipped. Input ports can be added by mounting option boards, which are sold separately.

(Note 2) The value is typical.

(Note 3) This product conforms to the harmonic current standard "EN 61000-3-2".

* Note that these specifications and design can change without prior notice.

6-7. Power Cable

NOTE Ask your dealer for the power cable to select and purchase.

Power Cable Electrical Specification

The projector is equipped with an IEC 60320 C20 Inlet to connect an AC power supply cable. Ensure that the AC power cables that connect the connectors built into the projector to the AC power maintains the current capacities as shown below.

Power supply voltage	Projector input current	Power cable current capacity
AC 200–240V	7.4A	250V 16A or higher

Type of Power Cable

Use plugs, cables, and connectors that are suitable for the regulations of the country of installation, as shown in the following table.

NOTE For users in North America
Use a power cable no longer than 4.5m/14.76 ft according to National Electrical Code.

Germany

Plug	Cable	Connector
CEE 7	H05VV-F 3G1.5	IEC 320 C19
		

USA

Plug	Cable	Connector
NEMA 6-15P	SJT 3 x AWG 14	IEC 320 C19
		

6. Appendix

Japan

Plug	Cable	Connector
JIS C 8303	VCTF 3 x 2.0mm	IEC 320 C19
		

China

Plug	Cable	Connector
GB2099	RWV 300/500	GB17465.1
		

Connector

Dimensions of the connector of the power cable are shown below.

6-8. Pin Assignment and Functions of Terminal

6-8-1. PC CONTROL connector (RS-232) (D-sub 9 pin)

This is an RS-232C interface for controlling the projector from a PC. The projector operates as a DCE (Data Communication Equipment), so use a straight cable when connecting to a PC.

Pin No.	RS-232C Signal Name	Functions as RS-232C	Projector Connector Operation
1	CD	Carrier detection	Not used (N.C.)
2	RXD	Reception data	Data transmission to an external device
3	TXD	Transmission data	Data reception from an external device
4	DTR	Data Terminal ready (Note)	Connection to 6 pins
5	GND	Signal GND	Signal GND
6	DSR	Data set ready (Note)	Connection to 4 pins
7	RTS	Transmission request	SYSTEM: Hi-Z (Not used) CINEMA: Hi-Z (Used)
8	CTS	Transmission available	SYSTEM: Fixed at -6.5 V (Not used) CINEMA: ± 10.5 V (Used: Depends on communication status)
9	RI	Ring indicator	Not used (N.C.)

(Note) Do not use DTR and DSR signals when communicating.

6. Appendix

6-8-2. External control connector (GP I/O) (D-sub 37 pin)

It is possible to control the projector with an external device and to control the external device from the projector using an external control connector (GPIO: General Purpose I/O Ports). Each pin is electrically separated from the projector internal circuits by a photo-coupler. 8 port input and 8 port output are available.

Please contact your dealer/distributor regarding how to use and to operate them.

EXT_GPIN1 - EXT_GPIN4: You can control the projector externally by combinations of input signals (high/low). (Projector power supply/turning the light source on or off/image mute/title selection)

EXT_GPOUT1 - EXT_GPOUT4: Functions in the above table are default settings. You can change the assigned functions.

Input Connector

• Using GPIO Control

Momentary "ON" pulse enables you to control projector. To enable "ON" pulse, hold it for at least 500 ms. Hold "OFF" for at least 500 ms before "ON". (See page 74)

Here is function list to control projector by using GPIO port.

Pin No.	Photo-coupler ON/OFF				Function
1-20	ON/OFF				3D L/R timing signal input ON/OFF
2-21	ON/OFF				3D L/R display timing signal input ON/OFF
3-22	-				System reserved (used internally)
4-23	-				System reserved (used internally)
5-24 6-25 7-26 8-27	8-27	7-26	6-25	5-24	The following functions apply depending on the combination of input terminals.
	OFF	OFF	OFF	ON	Power ON
	OFF	OFF	ON	OFF	Power OFF
	OFF	OFF	ON	ON	Light source ON
	OFF	ON	OFF	OFF	Light source OFF
	OFF	ON	OFF	ON	Image douser ON
	OFF	ON	ON	OFF	Image douser OFF
	OFF	ON	ON	ON	System reserved (used internally)
	ON	OFF	OFF	OFF	Selects the title registered to the preset button 1
	ON	OFF	OFF	ON	Selects the title registered to the preset button 2
	ON	OFF	ON	OFF	Selects the title registered to the preset button 3
	ON	OFF	ON	ON	Selects the title registered to the preset button 4
	ON	ON	OFF	OFF	Selects the title registered to the preset button 5
	ON	ON	OFF	ON	Selects the title registered to the preset button 6
	ON	ON	ON	OFF	Selects the title registered to the preset button 7
	ON	ON	ON	ON	Selects the title registered to the preset button 8

Example for dousing image: Input ON to 5-24 and 7-26 while 6-25 and 8-27 are OFF.

Example for selecting the preset button 2: Input ON to 5-24 and 8-27 while 6-25 and 7-26 are OFF.

[NOTE]

- The operation command coming from GPI/O port will be canceled when the projector is processing other tasks, such as light source cooling and switching title.
- Set all other pins than those in use to "OFF".
- The operation command is executed upon continuous input of the "ON" pulse for approximately 200 ms.

6. Appendix

• Timing chart of GPIO control

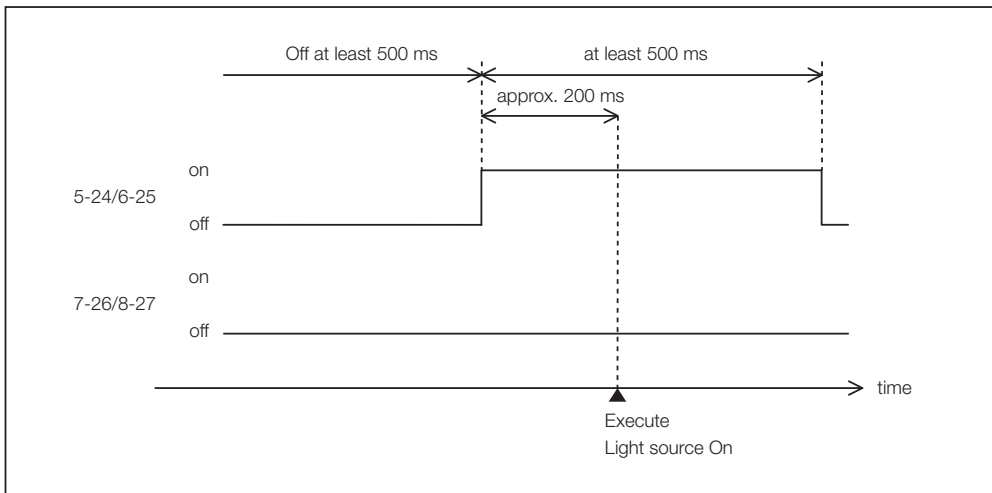

Example of Select Preset Button

Example for turning the image douser (Douser) on

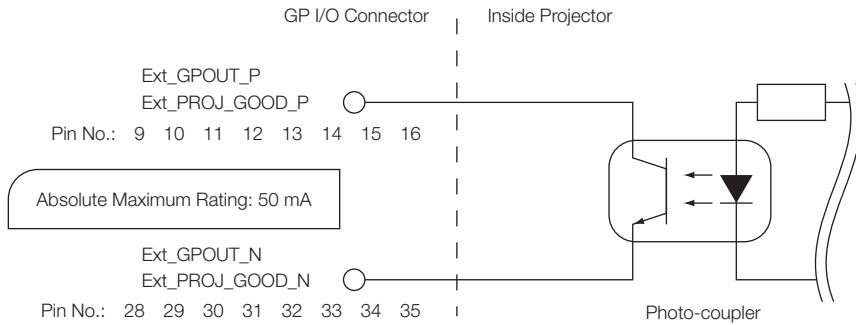

Example of Light source On

Example for turning the power off

Output Connector

• **Using GPIO Control**

You can use GPIO control for the projector’s health check and error check. Also, you can use the output as the trigger to control external devices.

The following functions are assigned to the pin number 13-32, 14-33, 15-34, and 16-35 (EXT_GPOUT1 - EXT_GPOUT4) as the default. You can change the assigned functions.

Pin No.	Photo-coupler ON/OFF	Function
9-28	ON/OFF	External 3D L/R timing signal output ON/OFF
10-29	–	System reserved (used internally)
11-30	–	System reserved (used internally)
12-31	ON/OFF	Internal 3D L/R timing signal output ON/OFF
13-32	ON/OFF	GPIO control status check ON: GPIO control (input) is unavailable. OFF: GPIO control (input) is available.
14-33	ON/OFF	Error check ON: Error OFF: No error
15-34	ON/OFF	IMB status check ON: The content is being played. OFF: The content is stopped/paused.
16-35	ON/OFF	Health check (heart beat) ON and OFF are alternately output when operations are normal.

6-8-3. 3D connector (D-sub 15 pin)

This is used to connect a 3D image system to the projector.

Pin view of a female connector

Pin No.	Signal Name	I/O	Function
1	+12V	PWR	Supplies power (+12V) to the 3D image system
2	GND	GND	Ground
3	GND	GND	Ground
4	RS232_RX	IN	Data transmission from the 3D image system (1200 Baud, 8 bits, No Parity)
5	RS232_TX	OUT	Data transmission to the 3D image system (1200 Baud, 8 bits, No Parity)
6	CONN_3D_MODE+	OUT	3D mode status (+) (Connects to the collector of the output transistor of the photo coupler inside the projector)
7	CONN_SYNC+	OUT	3D L/R switching timing signal (+) (Connects to the collector of the output transistor of the photo coupler inside the projector)
8	3D_INPUT_REFERENCE+	IN	3D L/R timing signal (+) (Connects to the anode of the input diode of the photo coupler inside the projector)
9	+12V	PWR	Supplies power (+12V) to the 3D image system
10	3D_INPUT_REFERENCE-	IN	3D L/R timing signal (-) (Connects to the cathode of the input diode of the photo coupler inside the projector)
11	3D_DISPLAY_REFERENCE+	IN	3D L/R display timing signal (+) (Connects to the anode of the input diode of the photo coupler inside the projector)
12	3D_DISPLAY_REFERENCE-	IN	3D L/R display timing signal (-) (Connects to the cathode of the input diode of the photo coupler inside the projector)
13	CONN_3D_MODE-	OUT	3D mode status (-) (Connects to the emitter of the output transistor of the photo coupler inside the projector)
14	CONN_SYNC-	OUT	3D L/R switching timing signal (-) (Connects to the emitter of the output transistor of the photo coupler inside the projector)
15	N/C	-	Unused
