

# NaViSense Gun Detection

**Schools**
**Airports**
**Bank Branches**
**Hospitals**
**Public Spaces and more**

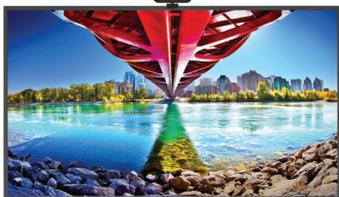

The threat of gun violence in public spaces is rising. Everyone wants a safer experience in the places we gather, schools, hospitals, airports, stadiums, stores, everywhere. Sharp/NEC has been working with Computer Vision AI for over five years and based on requests from our customers and partners, has created NaViSense Gun Detection. Benefits include:

- ▶ Highly trained and very accurate computer vision AI program detects potential guns and alerts designated security resources.
- ▶ Provides an early warning and extra layer of protection as situations unfold, potentially saving lives.
- ▶ Utilizes existing IP cameras providing a cost-effective solution to leverage across multiple locations.
- ▶ Pairs with additional detection models such as; people count and unattended baggage to provide a depth of information and inform security and response measures.
- ▶ Brought to market by a global technology company renowned for its expertise in B2B and consumer innovation, Sharp Electronics.

NaViSense uses existing IP video cameras paired with a trained and very accurate Computer Vision AI program to detect and alert on potential guns.

## Industry-Leading Tools, Made Easy

**NaViSense** is an easy-to-implement solution that combines computer vision, edge computing, and analytics to operationalize environmental data and drive business value, often in near-real time. NaViSense enables companies across industries to use existing camera equipment and data dashboards, making your transition to computer vision as seamless as possible.

## The Unique Value of a Robust Partner Ecosystem

With the support of its partner ecosystem, NaViSense can adapt to any variety of environments and use cases. Sharp/NEC works with partners to build a business around its services, which can include installation, integration, API provisioning, and ongoing support. Unlike other "set it and forget it" solutions, you will never miss a beat with NaViSense.
